## YOUR SYSTEMS ARE JUST A CLICK AWAY

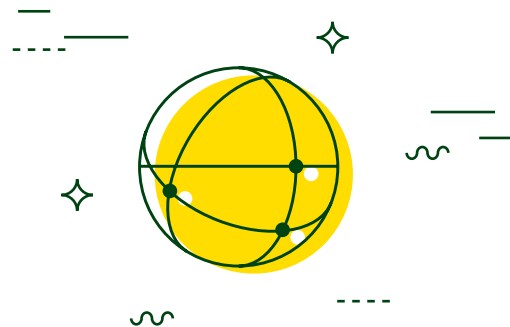

### THE SERVICE THAT MAKES LIFE EASIER

D.Connect makes monitoring DAB products easy and intuitive. All adjustments are also possible remotely. For total control with no surprises.

### IMMEDIATELY READY TO USE

D.Connect does not require specific infrastructures. The installation only requires an internet connection and a smartphone. Just follow the few steps of the connection wizard to connect your pumps.

### TECHNOLOGY FOR EVERYONE

Based on state-of-the-art technology, the D.Connect system offers many advantages than typical BMS systems.

## UNRIVALLED ADVANTAGES

### D.Connect

#### TAILOR DESIGN

Developed for both residential and commercial building service application.

#### USE

No fixed work station is required as the D.Connect is all about portability, the only thing you need is a internet connection.

#### SOFTWARE & HARDWARE

You do not need to buy any expensive software, nor do you need to pay for updates or for dedicated work stations.

#### VALUE

It lowers the overhead costs, increasing the value of your building.

# D+CONNECT BOX

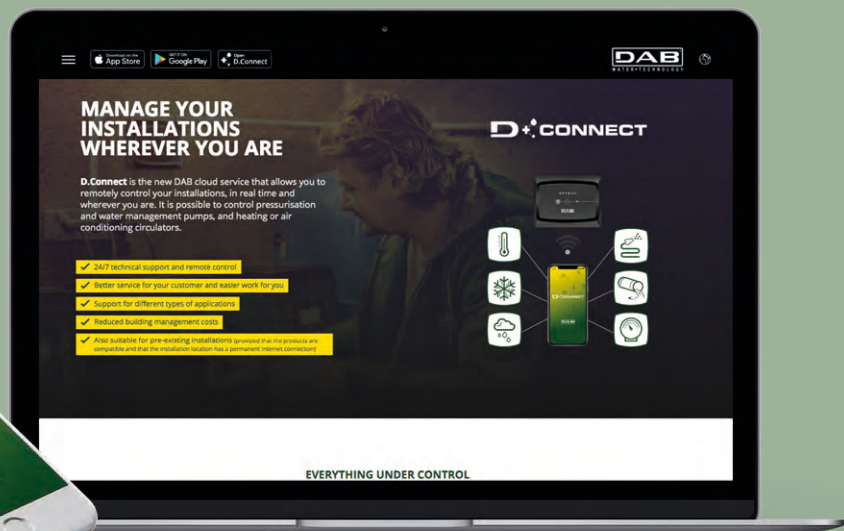

The compact electronic device can be used to easily connect to D.Connect a wide range of DAB products, both new and already installed. The only thing required is a wired connection on site and you're then set to go!

## APP & DESK

Download the App from the App Store or Google Play, or visit the site [internetofpumps.com](http://internetofpumps.com), and you're ready to view the connected installations on the network and check their individual settings. The user interface couldn't be clearer and more functional, it brings all the data you need to your fingertips.

## PACK CONTENT:

- D.Connect Box.
- Wall-mounted power supply unit, plugin socket and ferrite core.
- Screws and plugs for wall-mounted installation.
- DIN rail installation bracket.
- Electric connectors for Modbus, Canbus, I/O, Relay connections.
- Instruction manual.

[INTERNETOFPUMPS.COM](http://INTERNETOFPUMPS.COM)

## A SINGLE INTERFACE FOR EVERY APPLICATION

The D.Connect system can be used in all the main fields of application: from pressurisation systems to circulation systems, from waste water recovery installations to swimming pool filtering systems.

It is a multi-channel service of high added value that can be used with any system, irrespective of its nature and size and in the same environment and with the same instruments.

Being modular, D.Connect can manage up to 8 different installations in a highly simple and integrated manner.

HEATING

CONDITIONING

RAIN WATER

GARDENING &  
IRRIGATION

WATER BOOSTING

WASTE WATER

### SMART BUILDING MANAGEMENT

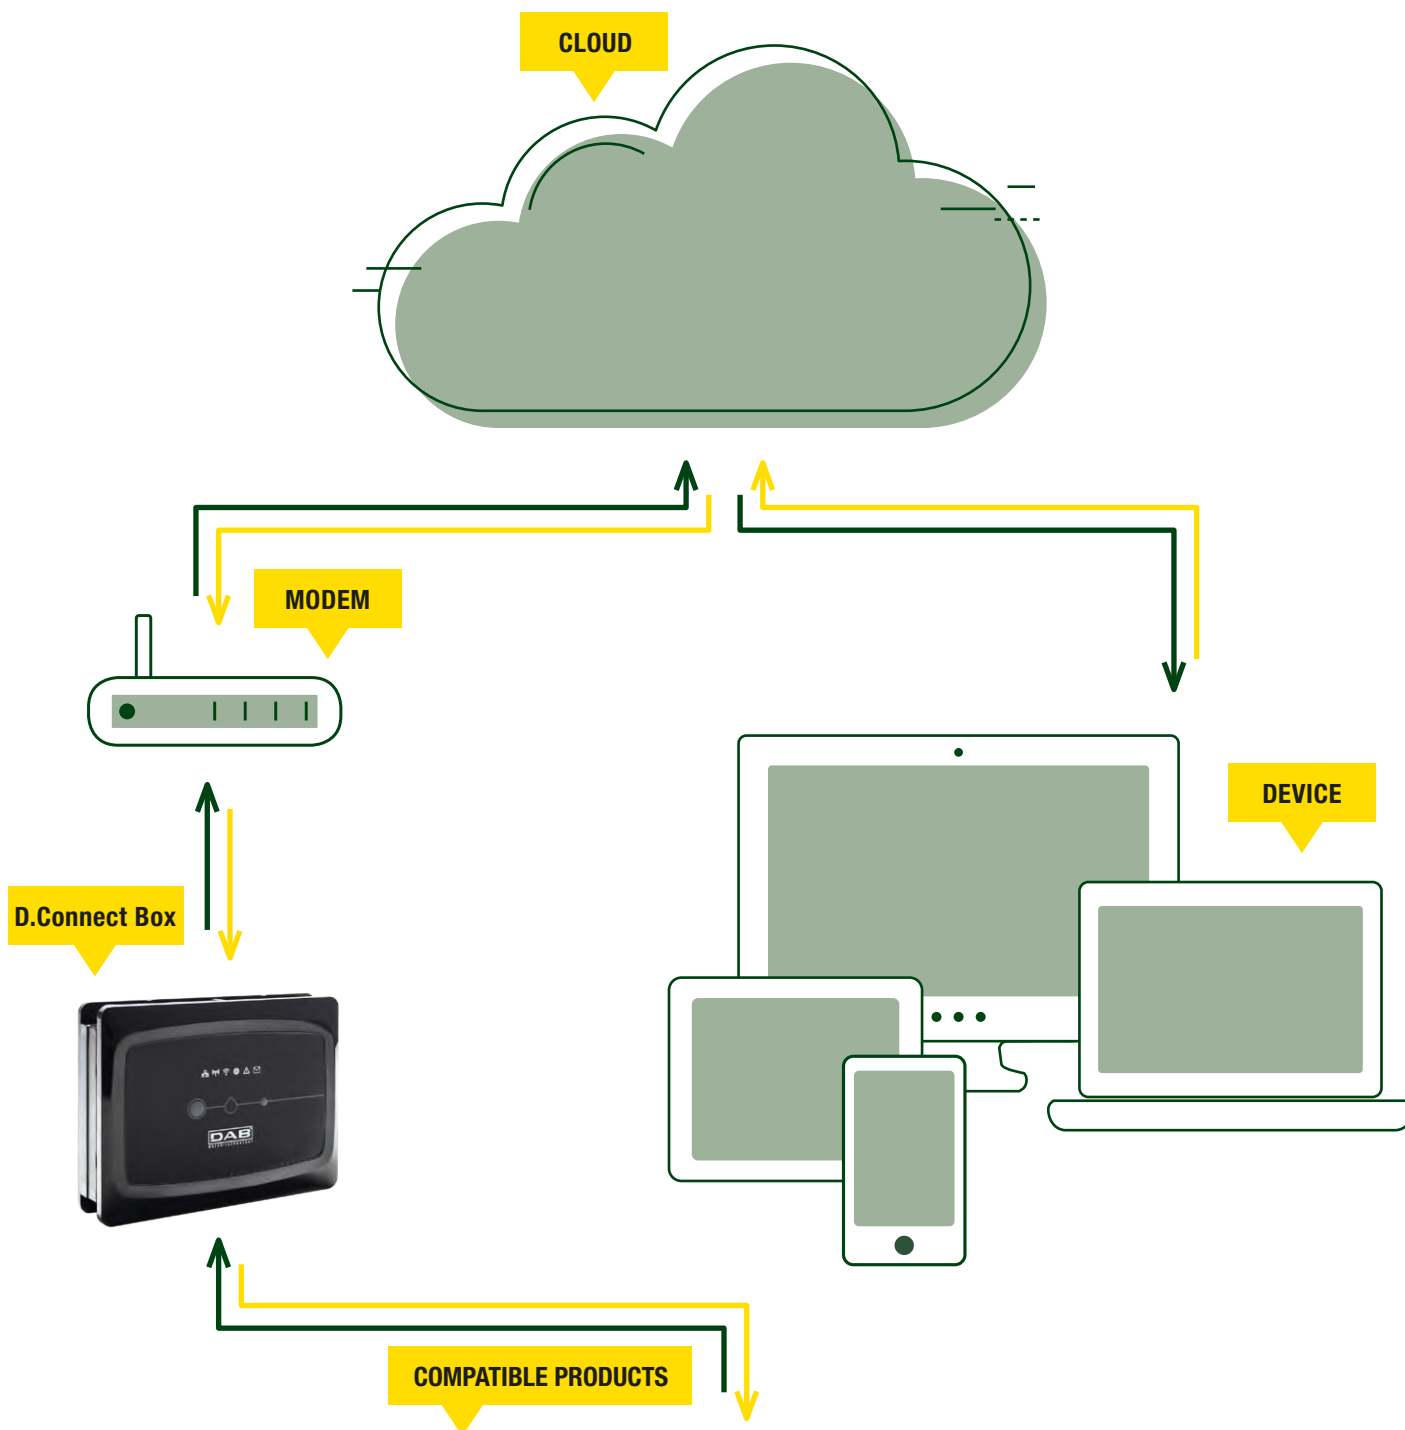

D.Connect permits easier, controlled and more rational management of the system, lowering the overhead costs and increasing the absolute value of the building in terms of efficiency and overall comfort.

# MCE/C

## INVERTER

**MCE/C** inverters are used for the management of circulation pumps and set themselves apart due to ease of use, power, simplicity of installation and management.

**MCE/C** inverters are designed for use with circulator pumps to enable simple control of differential pressure, thereby adapting pump performance to match effective system requirements.

The solution of mounting on the motor base greatly simplifies installation of the pump with **MCE/C** in minimal times.

Ease of programming is guaranteed by the use of an interface similar to DAB Dialogue and a graphic display.

**MCE/C** inverters feature dual microprocessor architecture to guarantee maximum efficiency and reliability. Sturdy and reliable construction is combined with modern and innovative styling to complete the product also in terms of aesthetics.

**MCE/C** inverters protect the pump thanks to integrated safety devices. They are also able to prolong the useful lifetime of the pump thanks to the elimination of water hammer and rotation of the pump at the minimum rpm necessary to meet the requirements of the user.

Last but not least, these inverters save power by keeping pump consumption to the minimum levels strictly necessary to meet user requirements.

**Equipped with communication module for the creation of twin pumpsets.**

**Should  $\Delta P-v$  proportional differential pressure regulation be required, specify the pump model on which the inverter will be installed.**

**When installing twin sets, the connection cable must be ordered separately.**

# MCE/P

## INVERTER

**MCE/P** inverters are used for the management of pressurization pumps intended for complex professional applications. MCE/P inverters can drive three-phase pumps up to 15kW. These units combine the simplicity with the robust design and power of an inverter drive.

**MCE/P** are mounted on the pump, and are equipped with pressure sensors and the **optional flow sensors** as required. The use of a flow sensor, moreover, allows a better pressure regulation.

The **MCE/P** can easily be set up in booster sets, thanks to a standard wire cable connection.

Comfort, energy saving, protections and simplicity are the keywords of this professional series.

The **MCE/P** units are air cooled.

The **MCE/P** can be easily installed in existing systems and can operate with all pumps. Facility to create sets with interchange of up to 8 pumps

# ADAC

## INVERTER

### ADAC inverters are intended for **HEAVY PROFESSIONAL APPLICATIONS.**

They can drive pumps of up to 15 kW. These units combine the simplicity with the robust design and power of an inverter drive. They can be installed in a control panel and must be supplied with external pressure.

The use of a flow sensor (OPTIONAL), allows a better pressure regulation.

The **ADAC** can easily be set up in booster sets, thanks to a standard wire cable connection.

Comfort, energy saving, protections and simplicity are the keywords of this professional series.

The ADAC units are air cooled. These extremely robust panel-mounting inverters feature a metal body and are suitable for heavy-duty applications. ADAC ensure the utmost practicality and increase the average workinglife of the system, permitting also significant savings in power consumption.

# ACTIVE DRIVER PLUS

INVERTER

## ACTIVEDRIVER plus

Active Driver Plus are inverters used for the control of hydraulic pumps. Their obvious fields of application are domestic, industrial, and agricultural constant pressure pumping systems.

The OLED display offers an extremely simple and intuitive graphic interface. Displaying or changing any parameters is extremely simple, which in turn also simplifies maintenance.

Installation is also very easy: the installation wizard asks the user for the parameters required for the configuration.

Active Driver Plus inverters provide a reduction of electric consumption, thanks to the inverter technology, whilst at the same time ensuring maximum comfort thanks to the constant pressure.

They are extremely versatile, as they do not require external sensors and non-return valves. There is in-fact a built-in pressure sensor, a flow switch, and a non-return valve.

The advantages of Active Driver Plus are:

- comfort, thanks to the constant pressure,
- energy savings, thanks to the inverter technology.
- less noise,
- compact shape,
- all the built-in protections: dry run, overload, abnormal voltage, overtemperature, freezing.

**Line voltage** 115V and 230V single-phase.  
400V three-phase

**Electric pump voltage** 115V and 230V single-phase, 230V and 400V three-phase

**Power supply frequency** 50 Hz - 60 Hz.

**Installation**  
vertical and horizontal (M/M and M/T only)

**Maximum liquid temperature** 50°C.

**Max operating temperature** 50°C.

**Max flow rate** 18m<sup>3</sup>/h.

**Maximum working pressure** 13 bar.

**Pressure regulation range** from 1 to 13 bar.

**Suction diameter (DNA)** 1 1/4" male.

**Delivery diameter (DNM)** 1 1/2" female.

**Protection level** IP55.

**Communication interface for sets**

YES, an Active Driver Plus for each pump

**Non-return valve not required**

**Equipped with graphic display**

# SUNDRIVER

ELECTRONIC PROTECTION AND CONTROL PANELS WITH INVERTER FOR SOLAR PANEL SYSTEMS

## NEWS

Protection and control inverter control panel for "off-grid" (not connected to the electricity network) photovoltaic systems, for use with different types of pumping systems, from collection from the subsoil, to swimming pool circulation and filtering, to the transfer and accumulation of water from tanks and vessels.

Designed to be mainly powered by solar energy; however, in case of need powering from the electricity network or from a generator is also possible - using a manual selector switch -, therefore also ensuring operation when solar energy is not available.

It's equipped with overcurrent, overvoltage, overtemperature, motor short circuit and dry run protection systems.

Level probes, a float and a flow switch may be connected to the control panel. The control panel is air-cooled by active fans.

When used in conjunction with pumps, it allows energy savings when compared with pumps without inverters, and also provides protection from hammering effects.

Two electric probes are supplied as standard.

### Nominal power input voltage

VDC 420 V.

VAC 300 V.

**Frequency** 50 Hz - 60 Hz.

### Maximum power of use

0,37-3 kWatt.

0,5-4 Hp.

### Pump operating range

230 V pump power input:

pump on = above 290 Vdc / 206 Vac

pump off = below 190 Vdc / 135 Vac

115 V pump power input:

pump on = above 140 Vdc / 100 Vac

pump off = below 110 Vdc / 180 Vac

### Ambient temperature operation limits

+50°C.

**Protection class** IP 54

# E.BOX

## ELECTRONIC PROTECTION AND CONTROL PANEL

e.box plus D

e.box basic

**e.box plus** is an electronic control panel for the protection and automatic operation of one or two submersible pumps or pressurizing both single-phase and three-phase, installed in domestic, civil and industrial environments.

**e.box basic** is an electronic control panel for the protection and automatic operation of one or two electronic submersible pumps or single-phase pressurization for domestic applications.

### Nominal tension of power supply

**e.box plus** 1x 230 V / 3 x 230 V - 3 x 400 V  
(automatic selection)

**e.box basic** 1x 230 V

**Frequency** 50 - 60 Hz

### Maximum use of power

**e.box plus** 5,5 kWatt + 5,5 kWatt

**e.box basic** 2,2 kWatt + 2,2 kWatt

**Maximum use of current** 12 A + 12 A

### Starting capacitor

KIT supplied as an accessory

### Limits of use ambient temperature

-10° C + 40° C

### Limits of storage temperature

-25° C + 55° C

**Relative humidity to the air** 90% a 20° C

**Max altitude max** 1000 s.l.m.

**Degree of protection** IP 55

Reference standard for the construction of the panels EN 60335-1

## DISPLAY

Thanks to the configuration wizard, installation of display versions is much simpler. Management is also much easier, thanks to the status always being visible and to a range of additional functions, such as the anti-seizing of drainage pumps, the alarm log, the language selection, and the password protected settings.

# SMART PRESS

ON/OFF CONTROLLER

SMART PRESS is an ON/OFF electronic device designed to switch the pump ON/OFF without using an expansion vessel. The device protects the pump against dry running without using level probes or float switch.

It has an adjustable cut-in pressure and even with a high flow the pressure losses are small. All the SMART PRESS models have a MANUAL AND AUTOMATIC RESTART.

## RANGE

Only for EU markets

# A new range for the market of tomorrow

43 years of experience. over 20 million circulators sold.

History and know-how, together with the in-house design of the mechanics and electronics and the new DAB 4.0 factory, make the new Evosta electronic wet rotor circulators utterly innovative.

in terms of technology, reliability and performance.

## IPX5 TESTING

The infiltration of moisture in the mechanics and, most importantly, in the electronics of our products is no longer an issue.

The IPX5 degree of protection is tested by firing a water jet from a 6.3 mm nozzle on weak spots and openings with no infiltration into the device.

## IPX5

The waterproof electronics reduce faults to a minimum and ensure complete peace of mind.

## WET ROTOR ELECTRONIC CIRCULATORS

**NEWS**

## EVOSTA 2

Evosta 2 by DAB is a wet rotor electronic circulator designed for the recirculation of water in domestic and residential heating and air conditioning systems.

Evosta 2 has a permanent magnet synchronous motor and inverter electronics that automatically adapt performance to system requirements, ensuring energy savings and protection from hammering effects.

With its compact size and all-round performance, it's the perfect replacement of old three-speed circulators. It combines the strength of the mechanical circulator with the benefits of the electronic one.

Its configuration is very simple: a sequential key can be used to scroll through the nine operating modes, three with proportional pressure, three with constant pressure and three with constant speed.

All the models have a breather plug and allow manual release of the motor shaft. Threaded suction and delivery ports. Technopolymer impeller. Cathaphoretic paint coated cast iron body, stainless steel motor casing. Water resistant electronics with IPX5 protection class.

### Operating range

0,4-3,6 m<sup>3</sup>/h with head up to 6,9 metres

### Pumped liquid temperature range

from -10 °C to +110°C

### Working pressure

10 bar (1000 kPa)

### Protection class

IP X5

### Insulation class

F

### Installation

with horizontal motor axis

### Standard power input

single-phase 1x230 V~ 50/60 Hz

### Pumped liquid

Clean, free of solids and mineral oils, non-viscous, chemically neutral, with properties similar to water (glycol max 30%).

# EVOSTA 3

WET ROTOR ELECTRONIC CIRCULATORS

**NEWS**

Evosta 3 by DAB is a wet rotor electronic circulator designed for the recirculation of water in domestic and residential heating and air conditioning systems.

It's the first circulator with IPX5 protection class. It has a permanent magnet synchronous motor and inverter electronics that automatically adapt performance to system requirements, ensuring energy savings and protection from hammering effects.

Its configuration is very simple: a sequential key can be used to scroll through the nine operating modes, three with proportional pressure, three with constant pressure and three with constant curve.

All the models have a breather plug, automatic degassing function and allow manual release of the motor shaft. Threaded suction and delivery ports. Technopolymer impeller. Insulation casings included. Cataphoretic paint coated cast iron body, stainless steel motor casing. Evosta 3 has a screen for the display of the height of the selected curve in metres, instantaneous power absorption in watts, instantaneous head and instantaneous flow rate. Thanks to the new standard interchangeable plug, Evosta 3 can be used with connectors of other brands without the need to redo the electrical connections.

### Operating range

0,4-4,2 m<sup>3</sup>/h with head up to 8+ metres

**Pumped liquid temperature range**  
from -10 °C to +110°C

**Working pressure** 10 bar (1000 kPa)

# EVOSTA 2 SOL

WET ROTOR ELECTRONIC CIRCULATORS

**NEWS**

Evosta 2 Sol by DAB is a wet rotor electronic circulator designed for the recirculation of water in domestic and residential thermal solar panel heating and air conditioning systems.

It has a permanent magnet synchronous motor and inverter electronics that automatically adapt performance to system requirements, ensuring energy savings and protection from hammering effects.

Its configuration is very simple: a sequential key can be used to scroll through the operating modes.

All the models have a breather plug and allow manual release of the motor shaft. Threaded suction and delivery ports.

Technopolymer impeller. Cataphoretic paint coated cast iron body, stainless steel motor casing.

A version controlled by PWM external signal (1.5 m plug cable) is also available. 1.5 m molex plug power cable.

### Operating range

0-4 m<sup>3</sup>/h with head up to 14,5 metres

### Pumped liquid temperature range

from -10 °C to +110 °C. (130 °C to 60 °C ambient)

### Working pressure

10 bar (1000 kPa)

### Protection class

IPX4

### Insulation class

F

### Installation

with horizontal motor axis

### Standard power input

single-phase 1x115-230 V ~ 50/60 Hz

### Power input connection

molex plug with 1.5m cable

### Pwm signal connector

plug with 1.5m cable (OEM versions only)

### Pumped liquid

Clean, free of solids and mineral oils, non-viscous, chemically neutral, with properties similar to water (glycol max 50%)

# EVOSTA 2 SAN V/R

WET ROTOR ELECTRONIC CIRCULATORS

NEWS

Evosta 2 San by DAB is a wet rotor circulator designed for the recirculation of domestic hot water in small domestic and residential systems.  
Synchronous motor. Threaded suction and delivery ports. Brass pump body.  
V versions with fittings with built-in check valve and on-off ball valve; R versions with threads and without check valve and on-off ball valve.  
Significant energy savings: circulator consumption 7 W only.

### Operating range

0-0,6 m<sup>3</sup>/h with head up to 1,1 m

**Pumped liquid temperature range**  
from +2 °C to +75°C

**Working pressure** 10 bar (1000 kPa)

**Protection class** IP 42

**Insulation class** II

### Installation

with horizontal motor axis

### Standard power input

single-phase 1x115-230 V~ 50/60 Hz

**Pumped liquid** Clean, free of solids and mineral oils, non-viscous, chemically neutral, with properties similar to water (glycol max 30%)

WET ROTOR ELECTRONIC CIRCULATORS

NEWS

Evosta 2 San by DAB is a wet rotor electronic circulator designed for the recirculation of domestic hot water in domestic and residential systems.  
It has a permanent magnet synchronous motor and inverter electronics that automatically adapt performance to system requirements, ensuring energy savings and protection from hammering effects.  
Its configuration is very simple: a sequential key can be used to scroll through the nine operating modes, three with proportional pressure, three with constant pressure and three with constant speed curve.  
All the models have a brass breather plug and allow manual release of the motor shaft. Threaded suction and delivery ports. Brass pump body. Electronics protected from water infiltrations; IPX5 protection class. No overload protection required.

### Operating range

0,4-4,2 m<sup>3</sup>/h with head up to 8 m

**Pumped liquid temperature range**  
from -10 °C to +110°C

**Working pressure** 10 bar (1000 kPa)

**Protection class** IP X5

**Insulation class** F

### Installation

with horizontal motor axis

### Standard power input

single-phase 1x230 V~ 50/60 Hz

**Pumped liquid** Clean, free of solids and mineral oils, non-viscous, chemically neutral, with properties similar to water (glycol max 30%)

# EVOPLUS SMALL

ELECTRONIC CIRCULATORS FOR SMALL COMMUNITY HEATING

EVOPLUS SMALL electronic circulators can be used in heating, ventilation and air conditioning systems for residential and commercial buildings. In all correctly sized installations, the electronically controlled wet rotor pumps constantly ensure sufficient power and, simultaneously, lower noise emissions, greater comfort and a significant reduction in running costs. All models fitted with flanged pump body are available in both single and the twin versions. The user interface is easy to use and easy to understand.

**Circulator protection rate** IP 44.

**Insulation class** F.

**Standard voltage**

single-phase 220/240V, 50/60Hz.

**In accordance with European standards**

EN 61800-3 - EN 60335-1 - EN 60335-2-51.

**Operating range**

from 2 to 12 m<sup>3</sup>/h with head up to 11 meters.

**Liquid Temperature range**

from -10 °C to 110 °C.

**Pumped liquid** clean, free from solids and mineral oils, not viscous, chemically neutral, close to the properties of water (max. glycol contents 30%).

**Maximum working pressure** 16 bar (1600 kPa).

**Standard flanging** The single version is available with 1 1/2" and 2" threaded ports and with flanged ports DN 32 and DN 40, PN 6 / PN 10 / PN 16.

The twin version is available with flanged pump body DN 32 and DN 40, PN 6 / PN 10 / PN 16.

**Installation** with horizontal motor shaft.

## VA

## WET ROTOR CIRCULATORS

Single body consisting of a cast iron hydraulic unit. Die-cast aluminium motor casing. Technopolymer impeller. Alumina driving shaft mounted on graphite brushings lubricated by the pumped liquid itself. Stainless steel protective rotor sleeve, stator sleeve and closing flange. Ceramic thrust bearing, E.P.D.M. O-rings and brass air outlet cap. The two-pole asynchronous motor with wet rotor is self-protected for resistance.  
**No overload protection required. Three-speed operation.**

**Operating range**

from 0.5 to 3,6 m<sup>3</sup>/h with head up to 6 metres.

**Liquid temperature range**

from -10°C to +110°C.

**Pumped liquid characteristics** clean, free from solids and mineral oils, non viscous, chemically neutral, close to the characteristics of water (max 30% glycol).

**Maximum working pressure**

10 bar (1000 kPa).

**Protection level** corresponding to IP 44

**Insulation class** F

**Cable grommet** PG 11

**Installation** with motor axis horizontal.

Only for extra EU markets. Please contact our sales network for more information

## WET ROTOR CIRCULATORS

Pump body in cast iron and motor casing in die-cast aluminium. Technopolymer impeller and tempered stainless steel driving shaft mounted on graphite brushings lubricated by the pumped liquid itself. Flanged vents, (threaded series A), provided with threaded connectors for controlling gauges. Stainless steel protective rotor sleeve, stator sleeve and closing flange. Ceramic thrust bearing, E.P.D.M. "O" rings and brass air outlet cap. The two-pole asynchronous motor with wet rotors designed for **three-speed** operation, single-phase version, for **two-speed** operation, for three-phase version. Thermal overload protection incorporated in the single phase version. In the twin version an automatic clapet type valve and blank flange are provided.

### Operating range

from 1 to 12 m<sup>3</sup>/h with head up to 11 metres.

### Liquid temperature range

from -10°C to +110°C.

**Pumped liquid characteristics** clean, free from solids and mineral oils, not viscous, chemically neutral, close to the characteristics of water (max 30% glycol).

**Maximum working pressure** 10 bar (1000 kPa).

**Protection level** IP 44

**Insulation class** F

**Cable grommet** PG 11

**Installation** with motor axis horizontal.

# BPH - BMH - DPH - DMH

## WET ROTOR CIRCULATORS

Pump for circulating hot water in small closed and pressurised or open tank civil and industrial community heating systems. Cast iron body and wet rotor motor. Die-cast aluminium motor casing. Flanged inlet and delivery mouths, fitted with threaded unions for pressure gauges. Technopolymer impeller, tempered stainless steel driving shaft. Stainless steel protective rotor sleeve and stator sleeve. Four pole asynchronous motor for the BMH and DMH versions, two pole motor for the BPH and DPH versions. The Single-phase circulator has been designed to work at three speeds - 230V, while the Three-phase circulator has been designed to work at two speeds - 230V and at three speeds - 400V. Thermal overload protection incorporated in the single-phase version. For the three-phase version the motor must be connected to the power supply through an external contactor. An automatic clapet type valve is incorporated into the delivery mouth of the twin version in order to prevent water from recirculating while the unit is not working; a blank flange is also supplied standard if one of the two motors must be serviced.

### Protection level

IP 44 three-phase - IP42 single-phase

### Operating range

from 1.5 to 78 m<sup>3</sup>/h with head up to 18 metres.

### Liquid temperature range

for three-phase version: from -10°C to +120°C (for the models BPH-DPH 150/340.65 T and BPH-DPH 150/360.80 T; BPH-DPH 150-180/280.50 T; BPH-DPH 180/340.65 T; BPH-DPH 180/360.80 T: from -10°C to +110°C).

For single-phase version: from -10°C to +110°C.

**Characteristics of pumped liquid** clean, free from solids and mineral oils, non viscous, chemically neutral, close to the characteristics of water (max. glycol 30%).

**Maximum operating pressure** 10 bar (1000 kPa).

**Standard flanging** DN 40, DN 50, DN 65, DN 80 in PN 6/PN 10 (4 holes)

**Flanging on request** DN 80 in PN 10/PN 16 (8 holes)

**Installation** with MOTOR AXIS HORIZONTAL

**Cable grommet** PG 11

CIRCULATORS FOR HEATING AND AIR-CONDITIONING SYSTEMS

Circulator for domestic hot water systems of the closed circuit pressurized type or open circuit type. Bronze pump body. Motor casing in die-cast aluminium. Technopolymer impeller. Ceramic motor shaft mounted on graphite bushings lubricated by the pumped liquid. Stainless steel rotor sleeve, stator sleeve and closing flange. Ceramic thrust ring, ethylene propylene sealing rings. Synchronous motor with permanent magnet rotor.

### Operating range

from 2 to 12 m<sup>3</sup>/h with head up to 11 meters.

### Liquid temperature range

from -10 °C to 110 °C.

**Pumped liquid** clean, free from solids and mineral oils, not viscous, chemically neutral, close to the properties of water.

### Maximum working pressure

16 bar (1600 kPa).

**Protection rating** IP 44.

**Insulation class** F.

**Installation** with horizontal motor shaft.

## VS

## WET ROTOR CIRCULATORS

Pump for hot water circulation in hot water domestic systems of the closed and pressurised or open tank type. Also suitable for solar power systems.

Single body formed of the bronze hydraulic unit. Die-cast aluminium motor casing. Technopolymer impeller. Alumina driving shaft mounted on graphite brushings lubricated by the pumped liquid itself.

Stainless steel protective rotor sleeve, stator sleeve and closing flange. Ceramic thrust bearing, E.P.D.M. "O" rings.

The two-pole or four-pole asynchronous motor with wet rotor is self-protected for resistance. **No overload protection required.**

**Operating range**

from 0.5 to 3,6 m<sup>3</sup>/h with head up to 6 metres.

**Liquid temperature range**

from -10°C to +85°C (for sanitary use)  
+110°C (for others use).

**Pumped liquid characteristics** clean, free from solids and mineral oils, non viscous, chemically neutral, close to the characteristics of water (max 30% glycol).

**Maximum working pressure**

10 bar (1000 kPa).

**Protection level** IP 44**Insulation class** F**Cable grommet** PG 11**Installation** with motor axis horizontal.ACCESSORIES

## ALME / ALPE

## ELECTRONIC IN-LINE PUMPS

Circulator for hot or cold water with in-line ports, suitable for installation directly on the pipes in civil and industrial heating air conditioning, refrigeration, and domestic water systems. Extremely versatile thanks to the use of the **MCE/C** inverter, the circulator performance is such as to allow automatic adaptation to meet the various requirements of the system, while keeping pressure differentials unchanged.

Pump body and motor support in cast iron.  
2" M-GAS inlet and outlet. Impeller in technopolymer, carbon/ceramic mechanical seal.

Four-pole totally enclosed asynchronous motor with external cooling for version **ALME** and two pole motor for version **ALPE**.

Rotor mounted on oversized greased sealed-for-life ball bearings to ensure silent running and long life.

Constructed following the CEI 2-3 standards.

**Operating range**

from 1 to 8.4 m<sup>3</sup>/h with head up to 21 metres.

**Liquid temperature range**

From -15 °C to +120°C.

**Liquid quality requirements** clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral, characteristics similar to water – maximum glycol percentage 30 % (for different glycol percentages, please contact the Technical Assistance Service).

**Installation** fixed horizontally.**Maximum ambient temperature** +40°C**Maximum working pressure** 10 bar (1000 kPa)**Protection rating** IP 55**Insulation class** FMCE/C

ELECTRONIC IN-LINE PUMPS

Circulator for hot or cold water with in-line ports, suitable for installation directly on the pipes in civil and industrial heating air conditioning, refrigeration, and domestic water systems. Extremely versatile thanks to the use of the **MCE/C** inverter, the circulator performance is such as to allow automatic adaptation to meet the various requirements of the system, while keeping pressure differentials unchanged. Pump body and motor support in cast iron. PN 10 Flanged inlet and delivery mouths, fitted with threaded holes for pressure gauges. To facilitate interchangeability in existing installations, the pump is designed to accept PN 6 counterflanges. Impeller in technopolymer. Carbon/ceramic mechanical seal. The pumps are available both in the single version (**KLME-KLPE**) and in the twin version (**DKLME-DKLPE**). An automatic clapet type valve is incorporated into the delivery mouth of the twin version in order to prevent water from recirculating while the unit is not working. In addition, a set of blank flanges is supplied for use when maintenance of one of the two motors is necessary. The twin version makes it possible to alternate operation of the pumps when the back-up unit is requested, or simultaneous operation of the two pumps. Four-pole totally enclosed asynchronous motor with fan-over cooling for versions **KLME** and **DKLME** and two pole motor for versions **KLPE** and **DKLPE**. Rotor mounted on oversized greased sealed-for-life ball bearings to ensure silent running and long life. Integral thermal and current overload protection. Constructed following the CEI 2-3 standards.

## Operating range

from 0.4 to 5.4 m<sup>3</sup>/h with head up to 13,7 meters.

## Liquid temperature range

From -15 °C to +120°C.

**Liquid quality requirements** clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral, characteristics similar to water - maximum glycol percentage 30 % (for different glycol percentages, please contact the Technical Assistance Service).

**Installation** normally horizontal or vertical provided the motor is always above the pump.

**Maximum ambient temperature** +40°C

**Maximum working pressure** 10 bar (1000 kPa)

**Protection rating** IP 55

**Insulation class** F

**Standard flanging** DN 40, DN 50, DN 65, DN 80 in PN 6/PN 10 (4 Holes)

ELECTRONIC IN-LINE PUMPS

Circulation pumps with in-line ports, suitable for installation in heating and air conditioning, refrigeration, and domestic hot water systems. Extremely versatile thanks to the use of the **MCE/C** inverter, they offer performance capable of adapting automatically to the system's various demands while keeping pressure differentials unchanged. Available in single and twin version. PN 16 flanged inlet and delivery mouths, fitted with threaded holes for pressure gauges. Pump body and support in cast iron, impeller in cast iron or technopolymer depending on model (in bronze, on request, only from DN 65 to DN 150). Stainless steel drive shaft. Sealing device: standardised mechanical seal made to DIN 24960 in carbon / carborundum with O' rings in EPDM. 4-pole three-phase indication motor with external cooling. Rotor running on ball bearings, oversized to ensure low noise and durability. Constructed following the CEI 2-3 standards.

**Operating range** from 1.2 to 360 m<sup>3</sup>/h with head up to 34 meters.

**Liquid temperature range** from -10°C to + 130°C for DN 40 - 50 from -10°C to + 140°C for rest of the range

**Liquid quality requirements** clean, free from solids or abrasive substances, non viscous, non aggressive, non crystallised and chemically neutral and close to the characteristics of water.

**Installation** Fixed, horizontal or vertical provided the motor is always above the pump.

**Maximum ambient temperature** +40°C

**Maximum working pressure** 16 bar

**Protection rating** IP 55

**Insulation Class** F

**Flanging** PN 16

**Counter-flanges on request**

DN 40 - DN 50 - DN 65 - DN 80 - DN 100 - DN 125 - DN 150; PN 16.

ELECTRONIC IN-LINE PUMPS

Circulation pumps with in-line ports, suitable for installation in heating and air conditioning, refrigeration, and domestic hot water systems. Extremely versatile thanks to the use of the **MCE/C** inverter, they offer performance capable of adapting automatically to the system's various demands while keeping pressure differentials unchanged. Available in single and twin version. PN 16 flanged inlet and delivery mouths, fitted with threaded holes for pressure gauges. Pump body and support in cast iron, impeller in cast iron or technopolymer depending on model (in bronze, on request, only from DN 65 to DN 150). Stainless steel drive shaft. Sealing device: standardised mechanical seal made to DIN 24960 in carbon / carborundum with O' rings in EPDM. 2 pole three-phase indication motor with external cooling. Rotor running on ball bearings, oversized to ensure low noise and durability. Constructed following the CEI 2-3 standards

**Operating range** from 1.2 to 230 m<sup>3</sup>/h with head up to 56 meters.

**Liquid temperature range** from -10°C to +130°C for DN 40 -50 from -10°C to +140°C for rest of the range

**Liquid quality requirements** clean, free from solids or abrasive substances, non viscous, non aggressive, non crystallised and chemically neutral and close to the characteristics of water.

**Installation** Fixed, horizontal or vertical provided the motor is always above the pump.

**Maximum ambient temperature** +40°C

**Maximum working pressure** 16 bar

**Protection rating** IP 55

**Insulation Class** F

**Flanging** PN 16

**Counter-flanges on request** DN 40 - DN 50 - DN 65 - DN 80 - DN 100 - DN 125 - DN 150; PN 16.

# ALM / ALP

IN-LINE PUMPS

Circulating pumps with in-line **connections**, suitable for civil and industrial installations for heating, air-conditioning and hot water for **domestic use**.

Technopolymer impeller and carbon/ceramic mechanical seal. Two-pole, asynchronous motor for the ALP version and four-pole for the ALM version.

Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version. Three-phase motors should be protected with a suitable overload protection complying with the regulations in force.

**Pump body and motor support in bronze.**

### Operating range

from 0,6 to 6,5 m<sup>3</sup>/h with head up to 7,7 metres.

### Liquid temperature range

from +15°C to +120°C.

**Pumped liquid characteristics** clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised, chemically neutral, close to the characteristics of water.

**Maximum ambient temperature** + 40°C

**Maximum working pressure** 10 bar (1000 kPa).

**Protection level** IP 55

**Insulation class** F

<sup>1</sup> Star (Δ) starting is possible

Blank counterflange supplied as standard for twin version

# CP / CP-G / DCP / DCP-G - 2 POLES

IN-LINE PUMPS

Circulating pumps with in-line connections, suitable for civil and industrial installations for heating, air-conditioning and hot water for domestic use. Pump body and motor support in cast iron. PN 16 flanged suction and delivery connections with threaded holes for control pressure gauges. Technopolymer impeller and carbon/ceramic mechanical seal. Three-phase, two-pole, asynchronous motor with external ventilation. To protect the motor it is advisable to use a thermal overload protection complying with the regulations in force.

### Operating range

from 3,6 to 420 m<sup>3</sup>/h with head up to 102 metres.

### Liquid temperature range

from -10°C to +140°C.

**Pumped liquid characteristics** clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

**Maximum ambient temperature** +40°C

**Maximum working pressure** 16 bar (1600 kPa).

**Protection level** IP 55

**Insulation class** F

PN 16 counter flanges on request.

IE3 ≥ 0,75 kW

# K-HA

## CENTRIFUGAL PRESSURE BOOSTING PUMPS

K-HA single impeller centrifugal pump is designed for water pressure boosting in households, flats (domestic properties) to provide additional pressure to hot and cold water taps and similar outlet points. K-HA centrifugal pump is mainly for use in open vented systems (tanks), but may also be installed directly on the incoming water mains supply to feed a boiler, provided approval has been obtained from the local Water Company. The pump is supplied with a 0,3 meter power cable.

**Operating range**  
up to 4,2 m<sup>3</sup>/h with head up to 22m.

**Liquid quality requirements** clean, free from solids or abrasive substances, non viscous, non aggressive, non crystallized, chemically neutral, close to the characteristics of water.

**Liquid temperature range** from 0°C to +100 °C

**Ambient temperature** from -10°C to +55 °C

**Environment humidity** ≤ 95%

**Maximum operating pressure**

4 bar (35° C liquid temperature)

2 bar (65° C liquid temperature)

**Minimum automatic (flow switch) operating pressure** 0,5 mwc

**Minimum automatic (flow switch) operating flow** 2,5 l/min

# CIRCULATORS AND IN-LINE PUMPS ACCESSORIES PROTECTION AND CONTROL SYSTEMS

---

# D.MAG COMPACT

MAGNETIC FILTER

Ideal to protect heating systems and the circulator from iron sludge and other impurities. It lengthens the life of the boiler and the pump, improving the efficiency of the entire system.

- High filtration performances
- Easy to install and service
- Extremely compact (< 200 mm)
- Improves the efficiency of the system

### Operating range

Flow rate up to 3 m<sup>3</sup>/h

### Liquid temperature range

up to + 90°C

### Fittings 1"

**Max operating pressure** 6 bar

**Filter height** 133 mm

# E.BOX

## PROTECTION AND CONTROL SYSTEMS

e.box basic

**e.box plus** is an electronic control panel for the protection and automatic operation of one or two submersible pumps or pressurizing both single-phase and three-phase, installed in domestic, civil and industrial environments.

**e.box basic** is an electronic control panel for the protection and automatic operation of one or two electronic submersible pumps or single-phase pressurization for domestic applications.

**Nominal tension of power supply**

**e.box plus** 1x 230 V / 3 x 230 V - 3 x 400 V (automatic selection)

**e.box basic** 1x 230 V

**Frequency** 50 - 60 Hz

**Maximum use of power**

**e.box plus** 5,5 kWatt + 5,5 kWatt

**e.box basic** 2,2 kWatt + 2,2 kWatt

**Maximum use of current** 12 A + 12 A

**Starting capacitor**

KIT supplied as an accessory

**Limits of use ambient temperature**

-10° C + 40° C

**Limits of storage temperature**

-25° C + 55° C

**Relative humidity to the air** 90% a 20° C

**Max altitude max** 1000 s.l.m.

**Degree of protection** IP 55

Reference standard for the construction of the panels EN 60335-1

exemplative photo

Supplied on the box in self-extinguishing thermoplastic material, complete with brackets for wall mounting. The framework is self-protected and protects the pump from overload, short circuits with manual reset.

Complete with:

- Power line switch with pad lockable door handle (except in single-phase version)
- Self-protected transformer for the power supply of the external controls
- Terminals for connecting the electric pump and the float / pressure control switches
- Terminals without potential for controlling alarm and remote installation of an audible / visual alarm
- Button on the front panel for manual operation (single phase versions)
- Switch on the front panel for manual operation - 0 - Automatic
- Amperometric protection reports
- Pump running indicator
- Voltage indicator
- Limits of use ambient temperature: -10° C +40° C
- Degree of protection IP55

### Ambient temperature operation limits

-10 °C +40 °C.

Protection class IP55.

## SELF-PRIMING CENTRIFUGAL PUMPS

Self-priming centrifugal pump with excellent suction capacity even when there are air bubbles. Particularly suitable for water supply in domestic installations, small-scale agriculture, gardening and wherever self-priming operation is necessary.

**Jet:** cast iron pump body.

**Jetinox:** stainless steel pump body.

**Jetcom:** technopolymer pump body.

Motor support in cast iron, technopolymer impeller, diffuser, Venturi tube and sand guard. Stainless steel adjustment rings.

Carbon/ceramic mechanical seal. Asynchronous motor closed and cooled by external ventilation. Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version. For the protection of the three-phase motor it is advisable to use a suitable overload protection complying with the regulations in force.

**Operating range** two-poles from 0.4 to 10.5 m<sup>3</sup>/h with head up to 62 metres

**Liquid temperature range**

from 0°C to +35°C for domestic use  
from 0°C to +40°C for other use

**Pumped liquid characteristics** clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

**Maximum ambient temperature** +40°C

**Maximum working pressure**

6 bar (600 kPa) for Jet and Jetcom  
8 bar (800 kPa) for Jetinox

**Protection level**

IP 44 (IP 55 terminal board protection).

**Insulation class** F

IE3 ≥ 0,75 kW

IE2 ≥ 0,75 kW

## PUMPS FOR DEEP SUCTION

DP 82-102

DP 151-251

Self-priming centrifugal pump for suction up to 27 metres, reached by means of an ejector. Cast iron pump body and motor support. Technopolymer impeller and diffusers. Stainless steel adjustment rings. Carbon/ceramic mechanical seal. Cast iron ejector body, technopolymer Venturi tube and brass nozzle. Asynchronous motor closed and cooled by external ventilation. Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version. For the protection of the three-phase motor it is advisable to use a suitable overload protection complying with the regulations in force.

**Operating range** from 0.15 to 4.3 m<sup>3</sup>/h

**Liquid temperature range**

from 0°C to +40°C for other uses  
from 0°C to +35°C for domestic use

**Pumped liquid characteristics** clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

**Maximum ambient temperature** +40°C

**Maximum working pressure**

6 bar (600 kPa) for DP 82 - DP 102  
8 bar (800 kPa) for DP 151 - DP 251

**Protection level** IP 44

**Insulation class** F

IE3 ≥ 0,75 kW

IE2 ≥ 0,75 kW

EJECTORS E 25	109200020	12
EJECTORS E 30	109200010	12

Don't provided with pump, to be ordered separately.

## INSTRUCTIONS FOR CONVERSION

### Conversion from DP 151-251 to JET 151-251

Screw the nozzle (9) into place on the ejector's body (2) and the Venturi tube (8). Put the O-rings (27) and (29) in their respective places and fix the ejector body (2) to the pump body (1) using the two screws (62).

MODEL	CODE
EJECTOR JET 151 ASS.Y	R00009981
EJECTOR JET 251 ASS.Y	R00009983

### Conversion from JET 151-251 to DP 151-251

Loosen and remove the two screws (62) connecting the ejector body (2) to the pump body (1). Save the O-rings (27) and (29), the Venturi tube (8) and the nozzle (9).

# GARDENJET - GARDEN INOX - GARDEN COM

SELF-PRIMING CENTRIFUGAL PUMPS

GARDENJET

GARDEN-INOX

GARDEN-COM

Portable self-priming centrifugal electropump for gardening, vegetable gardens, washing and hobbies.

Equipped with a handle for easy transport and 2-metre power cable type H07 RN-F complete with plug and switch. Compact and easy to install, self-priming so that it can take up water from tanks, wells or streams, tolerating air bubbles and water with small particles of sand.

**Gardenjet:** Cast iron pump body and die-cast aluminium motor support.

**Garden-com:** Technopolymer pump body and die-cast aluminium motor support.

**Garden-inox:** Stainless steel pump body. Die-cast aluminium motor support.

Technopolymer impeller, diffuser and Venturi tube.

Stainless steel seal disc and pressure discs.

Carbon/ceramic mechanical seal.

Induction motor, closed and cooled with external ventilation.

Rotor mounted on oversized greased sealed-for-life ball bearings to ensure silent running and long life.

Built-in thermal and current overload protection and a capacitor permanently in circuit.

Manufactured according to CEI 2-3 and CEI 61-69 standards (EN 60335-2-41).

**Motor protection** IP 44

**Terminal box protection** IP 55

**Insulation class** F

**Standard voltage**

single-phase 220-240 V/50 Hz

**Operating range**

from 0.4 to 5.4 m<sup>3</sup>/h with head up to 54 metres.

**Liquid quality requirements** clean, free from solids or abrasive substances, non viscous, non aggressive, non crystalline neutral, close to the characteristics of water.

**Liquid temperature range**

from 0°C to +35°C for domestic use

(EN 60335-2-41)

from 0°C to +40°C for other uses

**Maximum ambient temperature** +40°C

**Maximum suction depth** 8 metres

**Maximum operating pressure**

8 bar (800 kPa)

6 bar (600 kPa) only for technopolymer models (JETCOM)

**Installation**

fixed or portable in a horizontal position.

Special executions on request: other voltages and/or frequencies.

# EURO - EUROINOX - EUROCOM

## MULTISTAGE CENTRIFUGAL PUMPS

EURO

EUROINOX

EUROCOM

Multistage horizontal centrifugal pump, featuring extremely silent running suitable for domestic use for water supply and pressurisation, irrigation of gardens and vegetable gardens, and moving water in general.

**Euro:** pump body in 200 UNI ISO 185 cast iron.

**Euroinox:** stainless steel pump body.

**Eurocom:** technopolymer pump body.

Motor support in die-cast aluminium, seal holder in AISI 304 steel. Mechanical seal in carbon/ceramic. Rotor shaft in AISI 304 steel. Rotors, diffuser bodies and diffusers in technopolymer. Adjustment rings in stainless steel.

**Protection level of motor** IP 44

**Protection level of terminal board** IP 55

**Insulation class** F

**Operating range** from 10 to 120 l/min. with a head of up to 72 m.

**Pumped liquid characteristics** clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallised, chemically neutral and close to the characteristics of water.

**Liquid temperature range**

from 0°C to +35°C C for domestic use (EN 60335-2-41)

from 0°C to +40°C for other uses.

**Maximum ambient temperature** +40°C

**Maximum operating pressure** 8 bar (800 kPa)

**Euroinox self-priming**, other uses.

**Maximum ambient temperature** +40°C

**Maximum operating pressure** 8 bar (800 kPa)

**Euroinox** self-priming.

# MULTI INOX

## SELF-PRIMING HORIZONTAL MULTISTAGE PUMPS

Self-priming multistage pumps ideal for water supply in domestic and garden applications. High performances. Available with 3 - 4 - 5 **impellers in AISI 304 stainless steel**.  
Materials resistant to corrosion and oxidation.  
Motor with thermal overload protection.  
Double insulation between motor and hydraulic section.  
Optimal resistance to low temperatures.  
Supplied complete with power cable and plug.

### Liquid temperature range

from 0°C to +35°C (for domestic use)  
(EN 60335-2-41)  
from 0°C to +40°C (for other uses).

# JET - EUROINOX M-P

CENTRIFUGAL PUMPS FITTED

EUROINOX M-P

JET 151-251 T-P

## SINGLE-PHASE VERSION

Self-priming pump equipped with gauge, pressure switch, power supply cable with plug and three-way brass fitting for connecting to a tank.

## THREE-PHASE VERSION

Self-priming electropump equipped with gauge, pressure switch, overload cutout and three-way brass fitting for connecting to a tank.

## Operating range

from 0.4 to 10.5 m<sup>3</sup>/h with head up to 62 metres.

**Liquid quality requirements** clean, free from solid or abrasive contaminants, non-viscous, non-aggressive, uncrystallised and chemically neutral, close to the properties of water.

**Liquid temperature range** from 0°C to +35°C for domestic use (EN 60335-2-41).  
For other use: from 0°C to +40°C

**Maximum ambient temperature** +40°C

**Maximum operating pressure** 8 bar (800 kPa)

**Installation** fixed in a horizontal position.

**Special executions on request**  
different frequencies and/or voltage.

**Motor protection rating** IP 44

**Terminal block protection rating** IP 55

**Insulation class** F

**Standard input voltage**

single phase 220/240 V / 50 Hz  
three phase 230/400 V - 50 Hz

IE3 ≥ 0,75 kW

IE2 ≥ 0,75 kW

# AQUAJET - AQUAJETINOX

SELF-PRIMING AUTOMATIC BOOSTER

Automatic water lifting units, suitable for domestic use, small installations for civil, agricultural, industrial use, washing and hobby applications.

The unit is equipped with a JET or JETINOX type self-priming electropump, vessel, pressure switch for automatic operation, pressure gauge, fitting kit between pump and motor, all pre-assembled. Tank: horizontal, 20 litres capacity type, inner single diaphragm high-grade butyl membrane and virgin polypropylene liner, complete with stands at the bottom and brackets for fixing the pump to the top.

### Operating range

up to 5.4 m<sup>3</sup>/h with head up to 61 metres

### Liquid temperature range

from 0°C to +35°C for domestic use  
from 0°C to +40°C for other use

**Pumped liquid characteristics** clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

**Maximum ambient temperature** +40°C

**Maximum working pressure** 8 bar (800 kPa)

### Protection level

IP 44 (IP 55 terminal board protection).

**Insulation class** F

TANK WITH **5 YEARS**  
OF GUARANTEE

# ACTIVE SYSTEM

## ON/OFF AUTOMATIC ELECTRONIC BOOSTER SYSTEMS

ACTIVE J

ACTIVE EI

Automatic lifting units, particularly suitable for domestic use, small systems for civil, agricultural and industrial use, washing systems and hobby applications.

They are characterised by the use of:

- self-priming motor-driven pumps JET, JETINOX, EUROINOX that can even work when there are bubbles of air or gas. They are essential for drawing from artesian wells or wherever suction difficulties arise. The EURO - EUROCOM multistage centrifugal pumps are particularly appropriate for low-noise underwater operation.

The **ACTIVE** system helps increase pressure in systems where it is insufficient or irregular.

The **ACTIVE** system is a built-in, easy-to-install, and ready-to-use device which:

- controls it
- commands it automatically
- controls its operation
- limits starts
- guarantees pressure stability inside the hydraulic circuit.
- electronically controls starting pressure

### Operating range

from 0.4 to 4.8 m<sup>3</sup>/h with head up to 57 metres.  
Liquid quality requirements: clean, free from solid or abrasive contaminants, non-viscous, non-aggressive, uncrystallised and chemically neutral, close to the properties of water.

**Liquid temperature range** from 0°C to +35°C for domestic use (EN 60335-2-41).  
For other use: from 0°C to +40°C

**Maximum ambient temperature** +40°C

**Maximum operating pressure** 8 bar (800 kPa)

**Installation** fixed in a horizontal position.

**Special executions on request** different frequencies and/or voltage.

**Motor protection rating** IP 44

**Terminal block protection rating** IP 55

**Insulation class** F

### Standard input voltage

single phase 220/240 V / 50 Hz

three phase 230/400 V - 50 Hz

# BOOSTER SILENT

ON/OFF AUTOMATIC ELECTRONIC BOOSTER SYSTEMS

The world's quietest (67 dB) multi-impeller (3-4-5) self-priming pumps, with integral electronics for water supplies in homes and gardens. Equipped with an electronic safety device to prevent dry running. Integral check valve on suction.

Automatic Starting and Stopping when tap is turned on or turned off. Manual and automatic reset

**Supplied complete with power cable and plug.**  
**Supplied with 2 l tank.**

## Operating range

capacity up to 90 l/min; head up to 46 m.

## Liquid temperature range

**for domestic use** from +35°C to +35°C

**for other use** from 0°C to +40°C

## Liquid quality requirements

Clean, free from solid or abrasive contaminants, non-viscous, non-aggressive, uncrystallised and chemically neutral.

**Maximum suction depth** 8 metres

**Maximum ambient temperature** +40°C

**Protection rating** IPX4

**Insulation class** F

## Installation

fixed or portable in a horizontal position.

## Special executions on request

alternative voltages and/or frequencies.

# E.SYBOX MINI<sup>3</sup>

ELECTRONIC PRESSURISATION SYSTEM

## e.sybox mini<sup>3</sup>

E.SYBOX MINI<sup>3</sup> is the DAB compact automatic pressurisation system for the water supply of a single dwelling. E.SYBOX MINI<sup>3</sup> guarantees the comfort of constant pressure (Pressure Set Point adjustable from 1 up to 5,5 bar) inside the system, and energy savings thanks to the inverter technology. Suitable for use with drinking water, in domestic systems, and in gardening applications. E.SYBOX MINI<sup>3</sup> does not require any additional components for its installation.

It consists of a high frequency self-priming double impeller pump, management inverter electronics, pressure and flow sensors, adjustable high resolution LCD display with 1 litre built-in expansion vessel, and cartridge check valve.

The double suction and delivery ports allow both vertical and horizontal installation. Thanks to its compact sizes, installation is also possible in difficult places without high air exchange.

### Operating range

capacity up to 80 l/min; head up to 55 m

**Liquid quality requirements** clean, free from solid or abrasive contaminants, non-viscous, non-aggressive, uncrystallised and chemically neutral.

**Liquid temperature range** from 0°C to +35°C for domestic use

**for other use** from 0°C to +40°C

**Maximum suction depth** 8 meters

**Maximum ambient temperature** +50°C

**Maximum operating pressure**  
7,5 bar (750 kPa)

**Motor protection rating** IPX4

**Insulation class** F

**Installation** Horizontal or vertical fixed position

**Special executions on request**  
alternative types of electrical plug

## e.sybox

**E.SYBOX** is DAB's new integrated system for pressurization in domestic and residential areas.

**E.SYBOX** does not require any additional components for installation. It consists of a self-priming multistage pump, electronic inverter management, flow and pressure sensors, high-resolution swivel LCD display and an integrated 2 liter expansion tank. It can be installed both vertically and horizontally and even in tight spaces without a high air exchange.

The water-cooled engine, the hull protection in ABS with sound-absorbing function, the vibration damping feet and electronics make it an absolutely quiet (**43 dB**) and compact.

The wireless device facilitates the creation of pressurization units and connectivity with other DAB devices.

**Degree of protection** IP X 4

**Insulation class** F

**Pumped liquid** clean, free from solids or abrasive, non-aggressive, non-viscous, crystallized and not chemically neutral.

**Maximum liquid temperature** 40° C

**Maximum ambient temperature** 50° C

**Maximum suction depth**

self priming up to 8 metres.

**Maximum working pressure** 8 bar (800 kPa).

# NBB

## MOUNTING KIT FOR WATER COLLECTION AND PRESSURIZATION

### NBB is the solution for a domestic pressurizing system.

The basic concept is the modularity of its components such as: the NBB TANK KIT, the submerged or the surface pump, the inverter (in case the pump is without integrated electronics) and an assembling kit including the expansion tank (where this is not integrated in the pump itself). In all its different configuration the NBB is characterized by its compact dimension, great comfort and, in the version with inverter, also by an important aspect in terms of energy saving.

#### NBB TANK KIT consists of:

- 280 Lt. tank suitable for potable water compliant with the european norms EN1717 e EN13077
- Equipped with Filling valve and overflow valve
- Protection grid

Choosing the ADDITIONAL TANK KIT, consisting of a 280 liter tank, the junction elbow plus gasket and a belt, it's possible to double the capacity of the system. In addition to the NBB it is necessary to chose the assembling kit corresponding to the type of pump (or pump with inverter) to be utilized. The pump to be installed, as well as the inverter, are not included in the kit and must be order separately. The installation kit comprehends all the accessories necessary for the installation of the pump (or the inverter) to the NBB TANK KIT. For the PULSAR and EUROINOX installation kits also a 4 liter expansion tank is included.

#### Operating range

From 10 to 120 litres/min. with head up to 72 m.

#### Liquid temperature range

for domestic use: from 0°C to +35°C

#### Liquid quality requirements

Suitable for potable water pursuant to EN1717 and EN13077 European standards.

#### Maximum ambient temperature

+40°C

#### Max. operational pressure

8 bar (800 kPa) for surface pump configurations.

#### Max. inlet pressure

6 bar

#### Protection rating

IP44 for surface pumps.  
IP68 for submerged pumps.

#### Insulation class

F

# ACTIVE SWITCH

## RAIN WATER SYSTEM

Active Switch is a complete and pre-assembled system for using rainwater in one or two-family houses. The system comprises a recyclable polyethylene tank, an automatic pump Active EI 30/50 M series and a three-way automatic valve assembled on suction port of the pump.

The system has been designed to be wall-mounted. Supplied with wall bracket and float switch, with 20 mt. of cable, as a standard

### Working ambient temperature

min +5°C - max +40°C

**Max. Flow** 80 l/min

**Max. Head** 42,2 m

**Liquid temperature range** from +5°C up +35°C

**Max. Working pressure of the system**

6 bar (600kPa)

**Max. Pressure of main supply line**

4 bar (400kPa)

**Max. Height of working uses** 15 meters

**Potable water connector** 3/4"

**Pump suction and delivery ports** 1"

# AQUAPROF

## RAIN WATER SYSTEM

Aquaprof is a complete and pre-assembled system for using rainwater in one or two-family houses. The system comprises a recyclable polyethylene console, a completely automatic electronic control unit, three-way automatic valve and electropump Euroinox 30/50 M or Euroinox 40/50 M series. Supplied with wall bracket as a standard and float switch with 20 mt. of cable for Aquaprof Basic version, or probe sensor level with 20 mt. of cable for Aquaprof TOP.

**Protection Level** IP 42

**Working ambient temperature**

min. +5°C - max. +40°C

**Max. Flow** 80 lt/min.

**Max. Head** 42,2 m. (Aquaprof 30/50)  
57,7 m. (Aquaprof 40/50)

**Liquid temperature range**

from + 5°C up to +35°C

**Max. Working pressure of the system**

6 bar (600kPa)

**Max. Pressure of main supply line**

4 bar (400kPa)

**Max. Height of working uses** 15 meters

**Potable water connector** 3/4"

**Pump suction and delivery ports** 1"

# E.BOX

## ELECTRONIC PROTECTION AND CONTROL PANEL

e.box plus D

e.box basic

**e.box plus** is an electronic control panel for the protection and automatic operation of one or two submersible pumps or pressurizing both single-phase and three-phase, installed in domestic, civil and industrial environments.

**e.box basic** is an electronic control panel for the protection and automatic operation of one or two electronic submersible pumps or single-phase pressurization for domestic applications.

### Nominal tension of power supply

**e.box plus** 1x 230 V / 3 x 230 V - 3 x 400 V  
(automatic selection)

**e.box basic** 1x 230 V

**Frequency** 50 - 60 Hz

### Maximum use of power

**e.box plus** 5,5 kWatt + 5,5 kWatt

**e.box basic** 2,2 kWatt + 2,2 kWatt

**Maximum use of current** 12 A + 12 A

### Starting capacitor

KIT supplied as an accessory

### Limits of use ambient temperature

-10° C + 40° C

### Limits of storage temperature

-25° C + 55° C

**Relative humidity to the air** 90% a 20° C

**Max altitude max** 1000 s.l.m.

**Degree of protection** IP 55

Reference standard for the construction of the panels EN 60335-1

## DISPLAY

Thanks to the configuration wizard, installation of display versions is much simpler. Management is also much easier, thanks to the status always being visible and to a range of additional functions, such as the anti-seizing of drainage pumps, the alarm log, the language selection, and the password protected settings.

# SMART PRESS

## ON/OFF CONTROLLER

SMART PRESS is an ON/OFF electronic device designed to switch the pump ON/OFF without using an expansion vessel. The device protects the pump against dry running without using level probes or float switch.

It has an adjustable cut-in pressure and even with a high flow the pressure losses are small. All the SMART PRESS models have a MANUAL AND AUTOMATIC RESTART.

# E.SWIM - E.PRO

ELECTRONIC SWIMMING POOL PUMP

## NEW MODELS

E.SWIM

E.PRO

Electronic swimming pool pump with built-in high capacity strainer basket, ideal for water circulation and filtration in residential pools. The frequency converter technology combined with the high efficiency permanent magnet motor, cooled by the pumped liquid, grant the best energy saving and an extremely quiet running level. Thanks to the water cooled motor, the pump can be installed in small poorly ventilated spaces. Intuitive interface panel, with LCD display and keypad for easy programming, with diagnostic software integrated for pump and plant protection. Function mode with Speed control or Flow control, suitable for different swimming pool types. Possibility of control by remote with the connection cable kit.

High capacity prefilter that reduces the need for cleaning, with bayonet cover closing system for the E.swim and screw cover closing system for the E.pro.

### Operating range

up to 30 m<sup>3</sup>/h with head of up to 15,4 metres.

### Pumped liquid

clean water, or slightly contaminated water with suspended solid debris, or long fibres; highly aggressive water with high percentage of chlorine/bromine and PHMB (Polyhexamethylene biguanide), or chlorine electrolysis treated water.

### PH Range

6,5-8,4.

### Pumped liquid temperature range

up to 40 °C.

### Maximum ambient temperature

50 °C.

### Maximum operating pressure

2.5 bar.

### Installation

fixed, horizontal position.

### Connectors on request

2"/50 - 63 (two connectors+O-ring - see "Accessories") kit.

### Standard of reference

IEC - 60364.

### Protection class of the motor

IP X5.

### Protection class at the terminal board

IP X5.

### Insulation class

F

### Standard voltage

single-phase 230 V - 50/60 Hz.

At MCE 2016 fair the E.SWIM pump received a recognition: "efficiency and innovation path" and "beyond the class A"

Percorso Efficienza e Innovazione oltre la classe A

45 dB

## SWIMMING POOL CENTRIFUGAL PUMPS

High efficiency self-priming centrifugal pumps with built-in large capacity prefilter. Extremely quiet running and great reliability, developed for water circulation and filtration in domestic and residential swimming pools. Suitable also for special applications that call for handling of aggressive liquids, in fish farms, agriculture and industry. Pump body in fibreglass reinforced technopolymer. Strainer cover in clear antioxidant polycarbonate to guarantee constant visibility through time. Nylon strainer. Impeller in fibreglass-reinforced technopolymer. Mechanical seal in carbon / alumina / NBR / AISI 316. Pump body O-rings in NBR, threaded fasteners and reinforcing rings in AISI 304. Butterfly drain plugs that can be removed and refitted without tools.

Asynchronous continuous duty 2-pole motor (S1) with generous range of power ratings from 0.5 HP to 3 HP, single phase and three-phase (see technical specifications). Motor casing in die cast aluminium with electrophoretic surface treatment to prevent oxidation even in aggressive environmental conditions. Baseplate supplied as standard with rubber mounts to reduce vibration transmission.

Single phase version with integral thermal and overcurrent protection and permanent split capacitor (PSC), assembled inside the terminal box for all versions.

**Motor and terminal box protection rating** IPX5

**Insulation class** F

**Ball bearings**

water-proof, sealed, resistant to water and humidity. Motor construction to EN 60335-2-41 standards

**Standard voltage** Single phase 220-240V 50Hz  
Three-phase 230/400V 50Hz

**Operating range**

up to 42 m<sup>3</sup>/h with pressure head of up to 22 m

**Pumped fluid** clean water or water slightly contaminated with suspended particulate, long fibre; highly aggressive water with high percentage contents of chlorine/bromine and PHMB (Polyhexamethylene Biguanide) or water treated with chlorine electrolytic process.

**Liquid temperature range** up to 60°C

**Maximum ambient temperature** +50°C

**Maximum operating pressure** 2,5 bar

**Installation** fixed or portable in horizontal position

**Special executions on request**

alternative voltages and/or frequencies

**Fittings on request** 2"/50 - 63 kit (two fittings + O-ring - see "Accessories")

**Reference standard** IEC - 60364

# EUROPRO HIGH FLOW

## SWIMMING POOL CENTRIFUGAL PUMPS

Self-priming, high-performance centrifugal pumps, with built-in large capacity prefilter. 2 or 4 pole motor completely isolated from the water. Extremely quiet and highly reliable, developed for the circulation and filtration in large swimming pool filtration systems. Also suitable for particular applications that require handling of **seawater** thanks to the mechanical seal made of AISI 316. Prefilter body, pump body, volute, volute cover and pump body lid are made of polypropylene, resistant to chemical products found in swimming pools and reinforced with fiber glass. Prefilter basket made of polyethylene. Prefilter lid made of transparent polycarbonate with four knobs locking system. Closed asynchronous motor with external ventilation with 2 or 4 poles depending on the model, with a wide capacity range from 3 to 15 Hp. Terminal box with IP55 Degree of protection.

### Operating range

Up to 190 m<sup>3</sup>/h with head up to 22 m

### Standard Voltage

3 x 230-400V 50 Hz fino a 4 Kw  
3 x 400-690V 50 Hz oltre i 4 KW

### Insulation class F

**Temperature range of the liquid** up to 40°C

**Pumped Liquid** clean or slightly dirty water or a little aggressive (PolyHexamethylene Biguanide) or water treated with chlorine electrolysis process.

**Maximum ambient temperature** 40°C

**Installation** in horizontal position

**Special executions on request**  
other frequencies and/or voltages

IE3 ≥ 0,75 kW

# CAST IRON PREFILTERS

FOR MONOBLOC NORMALISED CENTRIFUGAL ELECTROPUMPS

PREFILTER

PREFILTER + PUMPS

New range of cast iron prefilters complying with DIN 2501, with connection from DN 65 to DN 200. They are provided with 3 or 4 closing knobs depending on the model, to ensure perfect sealing of the cap. Vessel and prefilter cap in cast iron, basket in stainless steel AISI 316.

The new range of prefilters allows the use of monobloc normalised centrifugal pumps series NKM-G/NKP-G, from DN 40 to DN 150, for water circulation in large filtration systems. The same filters can be used with normalised base pumps with joint (KDN) or with inverter MCE.

Monobloc centrifugal pumps with joint to which a prefilter has been applied on suction to make them ideal for water circulation in large filtration systems.

**The pump and prefilter are sold separately.**

Single-stage spiral body in cast iron complying with DIN-EN 733 (ex DIN2455), cast iron support, flanges complying with DIN 2533. Cast iron impeller, closed and dynamically balanced with compensation of the axial thrust through balancing holes. Pump shaft in stainless steel AISI 304, **carbon /silicon carbide mechanical seal with O-Rings in Viton.**

Closed type asynchronous motor with external ventilation, constructive shape B3/B5, with two poles for NKP and four poles for NKM. Vessel and prefilter cap in cast iron, basket in stainless steel AISI 316.

**Rotation speed** 1450-2900 1/min

**Operating range**

from 1 to 440 m<sup>3</sup>/h with head up to 24 metres.

**Pumped fluid** clean water or slightly dirty or slightly aggressive, on condition that in the last case the compatibility of the materials of which the pump is made is demonstrated, and that the power of the motor installed is suitable for the specific weight and viscosity of the fluid.

**Range of temperature of the fluid**

from -10°C to + 140°C

**Maximum environment temperature** +40°C

**Installation** in horizontal position

**TOP Version**

bronze impeller and cataphoresis treatment

SWIMMING POOL, POND AND SALT WATER PUMPS

# EUROCOVER

## SUBMERSIBLE SWIMMING POOL PUMPS

Totally automatic submersible electric pump, with wide support base specially designed to increase stability and to offer the possibility to operate also in positions which are not perfectly perpendicular to the ground.

Suitable for use during the winter period above the pool covers, to remove rainwater and avoid damage to the cover due to the excessive weight of the accumulated water. Electric pump made of resistant thermoplastic material. Motor, shaft, bolts and screws in stainless steel.

Triple interposed ring seal with oil prechamber.

Incorporated float for automatic operation.

Submersible with continuous duty asynchronous motor.

Stator positioned in stainless steel enclosure with cap to cover wiring and capacitor.

**Protection rating** IP68

**Insulation class** F

**Input voltage** 230V - 50Hz single phase

Supplied with 10m cable and Schuko plug / 10 m rope for positioning on sheets

Multi-hose fitting with clapet valve

**Operating range**

From 0.5 to 6 m<sup>3</sup>/h with head up to 6.5 m

**Liquid temperature range**

From 0 to 35 °C (EN 60335-2-41)

**Installation** fixed or portable in vertical position (max. inclination 10°)

**Particle size** 5 mm

**Automatic start/stop** start 55 mm - stop 35 mm

# JETCOM SP - EUROCOM SP

## SWIMMING POOL CENTRIFUGAL PUMPS

Self-priming centrifugal (Jetcom) or multistage (Eurocom) pump with excellent suction capacity even when there are air bubbles. Suitable for use with water containing small sand impurities. Especially suitable for water supplies in domestic systems: handling of aggressive water in general with chlorine contents (swimming pools). Pump body in technopolymer.

**Support and seal-carrier in AISI 316 STAINLESS STEEL.**

Carbon/ceramic mechanical seal.

**Rotor shaft in AISI 316 STAINLESS STEEL.**

Impellers, diffuser, Venturi tube, and sand guard in technopolymer. Clearance rings in stainless steel.

Continuous duty asynchronous motor.

Built-in motor overload cut out and a capacitor permanently on in the single-phase version.

Protection for the three-phase version is the responsibility of the user.

**Motor protection level** IP 44

**Terminals protection level** IP 55

**Insulation class** F

**Standard voltage** 220/240V - 50 Hz single-phase 230/400V - 50 Hz three-phase

**Operating range** from 10 to 80 l/min with head of up to 58 m depending on the model

**Liquid quality requirements** clean, free of solid or abrasive contaminants, swimming pool water (containing chlorine).

**Liquid temperature range**

from 0°C to +35°C for domestic use

(EN 60335-2-41)

from 0°C to +40°C for other uses.

**Maximum ambient temperature** +40°C

**Maximum operating pressure** 6 bar (600 kPa)

**Installation** fixed or portable in horizontal position

IE3 ≥ 0,75 kW

IE2 ≥ 0,75 kW

# MULTI 4 SW

SELF-PRIMING HORIZONTAL MULTISTAGE PUMPS

Is a self-priming multistage surface pump specifically constructed to pump salt water. Low noise and high pressure performance. **Available with 4-Noryl impeller.**

Anti-corrosive and rust-proof materials.

Motor with thermic overload protection.

Double sealing system between motor and hydraulic part. High resistance to frost and icing.

Supplied with power cable with plug, and self-sealing fitting.

Supplied complete with power cable and plug.

### Operating range

capacity up to 90 l/min; head up to 46 m.

### Liquid temperature range

from 0 °C to +35 °C for domestic use.

from 0 °C to +40 °C for other uses.

### Pumped liquid

Designed to specifically pump salt water.

**Maximum suction capacity** 8 metres.

**Maximum ambient temperature** +40 °C.

**Protection class** IPX4.

**Insulation class** F.

**Installation** fixed or portable, horizontal position.

Special versions on requests: alternative voltages and/or frequencies.

# NOVA SALT W

SUBMERSIBLE PUMPS

The Nova Salt WM-A is a multi-purpose submersible pump specifically constructed for use in **salt water**.

Anti-corrosive and rust-proof materials.

Motor casing, shaft, screws and nuts made of stainless steel AISI 316.

Cable with tin plated conductors.

Motor with thermic overload protection.

Wear resistant shaft and impeller.

Excellent cooling of the motor that enables the pump to operate even when it is partially submersible.

Manual and Automatic version with start/ stop float switch.

Supplied with power cable with plug and self-sealing fitting.

### Operating range

from 1 to 7.5 m³/h with head up to 6 metres.

### Liquid temperature range

from 0 °C to +35 °C for domestic use.

**Pumped liquid** dirty water, without fibre, including salt water.

**Max. immersion depth** 7 metres.

# NOVAPOND

## SUBMERSIBLE PUMPS

The models NovaPond are submersible pumps specially designed for the recirculation of water in garden ponds, to create waterfalls or other water features. They are designed to pump clean water containing solid particles with a maximum diameter of 10 mm.

Suitable for continuous operation.

Designed for horizontal or vertical installation.

Environmentally safe.

Materials resistant to corrosion and oxidation.

Motor with thermal overload protection.

Adjustable suction filter to enable transit of solid particles with a diameter from 5 mm to 10 mm.

Supplied with power cable and plug, and self-sealing coupling.

### Operating range

from 1 to 14 m<sup>3</sup>/h with head up to 9.4 metres. Suitable for continuous operation.

### Liquid temperature range

from 0 °C to +35 °C.

### Pumped liquid

clean water, without fibres and with particles with maximum diam. 10 mm.

**Max. immersion depth** 7 metres.

## SELF-PRIMING PERIPHERAL PUMPS

Self-priming peripheral pump with star impeller, with a great suction capacity. Cast iron body with brass ring. Motor support and impeller in brass to avoid the risk of blocking. Driving shaft in stainless steel. Carbon/ceramic mechanical seal. Asynchronous, closed motor, cooled by external ventilation. Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version. For the protection of the three-phase motor it is advisable to use a suitable overload protection complying with the regulations in force.

### Operating range

from 8 to 45 l/min. with head up to 53 metres.

### Liquid temperature range

from -10°C to +80°C  
from 0°C to +35°C for domestic use.

**Pumped liquid characteristics** clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

**Maximum ambient temperature** +40°C

**Maximum working pressure** 10 bar (1000 kPa).

### Protection level

IP 44 (IP 55 terminal board protection).

**Insulation class** F

IE3 ≥ 0,75 kW

IE2 ≥ 0,75 kW

## PERIPHERAL PUMPS

KPS

KPF

Frontal suction

Peripheral centrifugal pump, reduced encumbrance, able to generate high heads, it is suitable for domestic use and small industrial uses. Pump body and motor support in brass for the KP 60 version, in cast iron for the KPS 30 and KP 38 versions. Brass impeller. Mechanical seal in carbon/ceramic. Asynchronous, closed motor, cooled by external ventilation. Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version. For the protection of the three-phase motor it is advisable to use a suitable overload protection complying with the regulations in force.

### Operating range

from 1 to 50 l/min. with head up to 107 metres.

### Liquid temperature range

from 0°C to +35°C for domestic use.  
from -10°C to +50°C for other uses.

**Pumped liquid characteristics** clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

**Maximum ambient temperature** +40°C

**Maximum working pressure** 10 bar (6 bar for KPS-KPF 30/16).

**Protection level** IP 44

**Insulation class** F

## PERIPHERAL PUMPS

Pump body, motor support and impeller in brass. Carbon/ceramic mechanical seal. Stainless steel motor shaft. Asynchronous, closed motor cooled by external ventilation. Rotor mounted on oversized greased sealed-for-life ball bearings to ensure silent running and long life. Motor overload cut out equipped as standard in the single-phase version. Overload protection to be provided by the user for the three-phase version. Permanently connected capacitor for the single-phase version. Construction to CEI 2-3 and CEI 61-69 (EN 60335-2-41)

**Protection rating** IP 44

**Insulation class** F

**Standard voltage**

1x230V 50Hz single-phase  
3x230-400V 50Hz three-phase

**Operating range**

from 1 to 35 l/min with head up to 107 meters.

**Pumped liquid** clean, free from solids or abrasive substances, not aggressive.

**Liquid temperature range**

- from 0°C to +35°C for domestic use  
(EN 60335-2-41)

- from -10°C to +80°C for other uses.

**Maximum ambient temperature** +40°C

**Maximum working pressure** 10 bar (1000 kPa).

**Installation** fixed in horizontal position.

**IE3 ≥ 0,75 kW**

**IE2 ≥ 0,75 kW**

# KE TWIN IMPELLERS

TWIN IMPELLERS CENTRIFUGAL PUMPS WITH INVERTER MCE/P

Twin impeller centrifugal pump, suitable for pressure booster systems and domestic, civil, industrial and agricultural systems. Particularly versatile thanks to the use of the **MCE/P** inverter, this pump guarantees the automatic adjustment of its performance to the various system requirements, while maintaining constant the differential pressure. Pressure sensor included. Pump body and motor support in cast iron. Technopolymer impeller. Carbon/ceramic mechanical seal. Asynchronous, closed motor cooled by external ventilation. Motor shaft mounted on generously sized ball bearings to ensure silent running and long life.

### Operating range

from 2 to 30 m<sup>3</sup>/h with head up to 95 meters.

### Liquid temperature range

from -10 °C to 50 °C: for KE 35/40, KE 45/50, KE 55/100.

from -15 °C to 110 °C: for KE 55/50, K 66/100, K 90/100, K 70/300, K 80/300, K 70/400, K 80/400.

**Pumped liquid** clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral, close to the properties of water. **Installation:** normally horizontal or vertical provided the motor is always above the pump.

**Maximum ambient temperature** +40°C.

### Maximum working pressure

KE 35/40: 6 bar (600 kPa)

KE 45/50, KE 55/50: 8 bar (800 kPa)

KE 55/100, KE 66/100: 10 bar (1000 kPa)

KE 90/100, KE 70/300, KE 80/300 KE 70/400,

KE 80/400: 12 bar (1200 kPa).

**Protection rating** IP 44.

**Terminal box protection rating** IP 55.

**Insulation class** F.

# NKM-GE / NKP-GE WITH MCE/P

ENBLOC CENTRIFUGAL PUMPS WITH INVERTER

Enbloc electric centrifugal pumps with coupling, designed for a wide range of applications such as:

- homes;
- apartment blocks;
- camp sites;
- swimming pools;
- farms;
- well water supply;
- irrigation for greenhouses, gardens, agriculture;
- re-use of rainwater;
- industrial systems.

Highly versatile pumps thanks to the use of the **MCE/P** inverter, to guarantee performance able to automatically adapt to the various system requirements, while maintaining constant pressure. Spiral single-stage body in cast iron according to DIN-EN 733 (ex DIN 24255), cast iron support, flanges according to DIN 2533 and DIN 2532 for DN 200. Cast iron impeller, sealed and dynamically balanced with compensation of the axial thrust via balancing holes, operating (on request) on interchangeable wear rings. Pump shaft in AISI 304 stainless steel. Seal: standardised mechanical seal according to DIN 24960 in carbon/silicon carbide with O-rings in EPDM. Asynchronous, closed motor cooled by external ventilation, construction design B3/B5, 2-pole for NKPGE and 4-pole for NKM-GE. Rotor mounted on generously sized ball bearings to ensure silent and durable operation.

**Speed of rotation** 1450 - 2900 1/min.

**Operating range**  
from 1 a 450 m<sup>3</sup>/h head up to 72 metri.

**Liquid temp. range** from -10°C to +80°C.

**Pumped liquid** clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral and close to the characteristics of water. **Installation:** normally horizontal or vertical provided the motor is always above the pump.

**Max. ambient temperature** +40°C

**Maximum operating pressure**  
16 bar - 1600 kPa (for DN 200 max. 10 bar).

**Protection rating** IP 55

**Insulation class** F

**Flanging** PN 16 DIN 2533

**Special versions on request**

Pumps for liquids other than water.  
Other voltages and/or frequencies.  
Inverter modulation with 0-10V signal

IE3 ≥ 0,75 kW

**D CONNECT**

CENTRIFUGAL PUMPS

H (m)

# KDNE WITH MCE/P

STANDARDISED CENTRIFUGAL PUMPS ON SKID WITH INVERTER

Standardised centrifugal pumps on skid with elastic coupling, electronics designed for a wide range of applications such as:

- homes;
- apartment blocks;
- camp sites;
- swimming pools;
- farms;
- well water supply;
- irrigation for greenhouses, gardens, agriculture;
- re-use of rainwater;
- industrial systems.

Highly versatile pumps thanks to the use of the DAB **MCE/P** inverter, to guarantee performance able to automatically adapt to the various system requirements, maintaining constant pressure. Pressure sensor included. Spiral single-stage body in cast iron according to DIN-EN 733 (ex DIN 24255), cast iron seal cover and motor support, flanges according to DIN 2533 (DIN 2532 for DN 200). Cast iron impeller, sealed and dynamically balanced with axial thrust compensation via balancing holes, operating (on request) on interchangeable wear rings. Pump shaft in stainless steel mounted on two generously sized ball bearings, permanently lubricated and housed in a special chamber inside the support. Standard seal: standardised mechanical seal according to DIN 24960 in carbon/silicon carbide with O-rings in EPDM. On request, packing seals are available, with hydraulic lubrication ring and gland in two easily removable parts. Sealed, asynchronous motor cooled by external ventilation; 2-pole or 4-pole. Rotor mounted on generously sized ball bearings to ensure silent and durable operation. Electrical protection: according to standards transposed into the ELECTROMAGNETIC COMPATIBILITY DIRECTIVE EEC 89/336 and subsequent amendments, LOW VOLTAGE DIRECTIVE EEC 73/23 and subsequent amendments and standards CEI 2-3.

## Construction design B3

**Speed of rotation** 1450 - 2900 1/min.

## Operating range

from 1 a 440 m<sup>3</sup>/h with head up to 70 meters

**Liquid temp. range** from -10°C to +140°C.

**Pumped liquid** clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral, characteristics similar to water.

**Max. ambient temperature** +40°C

## Maximum operating pressure

16 bar - 1600 kPa (per il DN 200 max 10 bar).

**Protection rating** IP 55

**Thermal category** F

## Flanging

PN 16 DIN 2533

PN 10 DIN 2532 per DN 200

**Installation** fixed horizontally.

IE3 ≥ 0,75 kW

**D CONNECT**

# KVCE 30-50-80-120

MULTISTAGE CENTRIFUGAL PUMPS WITH VERTICAL AXIS WITH INVERTER MCE/P

Vertical multistage centrifugal pump suitable for small and medium consumption water systems. Particularly versatile thanks to the use of the **MCE/P** inverter, this pump guarantees the automatic adjustment of its performance to the various system requirements, while maintaining constant the differential pressure. Suitable for booster sets, feeding of drip and spray irrigation systems and washing systems. Innovative and sturdy design. Discharge/suction body in technopolymer and IN-LINE suction and discharge ports with threaded metal insert.

Impellers, diffuser bodies and diffusers in technopolymer, entirely stainless.

Pump liner, wear rings and seal plate in AISI 304 stainless steel. Mechanical seal in carbon/ceramic, mounted on motor shaft extension in stainless steel AISI 303. Asynchronous, closed motor cooled by external ventilation. Motor shaft mounted on oversized greased sealed-for-life ball bearings to ensure silent running and long life.

Construction to CEI 2-3 and CEI 61-69 (EN 60335-2-41)

**Protection rating** IP 55.

**Insulation class** F.

**Standard voltage**

single-phase 1x220-240 V / 50/60 Hz  
three-phase 3x400 V / 50 Hz

**Operating range**

from 1 to 12 m<sup>3</sup>/h with head up to 107 meters.

**Pumped liquid** clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral, close to the properties of water.

**Liquid temperature range**

from 0°C to +35°C for domestic use (Safety standards EN 60335-2-41).  
from 0°C to +40°C for other uses.

**Maximum ambient temperature** +40°C.

**Maximum working pressure** 12 bar (1200 kPa).

**Installation** fixed, in a vertical position.

MULTISTAGE CENTRIFUGAL PUMPS WITH VERTICAL AXIS WITH INVERTER MCE/P

## NEWS

DAB's NKVE 1, 3, 6, 10, 15, 20 S pumps are AISI 304 stainless steel multi-impeller vertical centrifugal pumps with coupling with MCE-P inverter installed as standard; designed for pressurization in civil and commercial environments, they can also be used in agriculture and in watering systems.

The pumps can be used for the recirculation of water in heating and air conditioning systems. They are particularly versatile, thanks to the use of the MCE-P inverter, which ensures performance levels capable of automatically adapting to the different needs of the system, keeping a constant pressure.

Pressure sensor supplied as standard. In all models, the parts in contact with the liquid are made of AISI 304 stainless steel (AISI 316 stainless steel, X version, only on request).

They are particularly versatile, thanks to the centre distance between the 2 in-line ports, designed to maximise interchangeability. Starting from 5.5 kW models, the silicon carbide-graphite mechanical seal can be removed without removing the motor.

Mechanical seals for aggressive liquids and different connections (round, oval, Victaulic, clamp flanges) available on request.

All the models are WRAS and ACS certified for use with drinking water. Rigid coupling to IE3 high energy efficiency electric motors.

### Operating range (flow rate and head)

1 m<sup>3</sup>/h to 30 m<sup>3</sup>/h with head up to 320 m

**Type of pumped liquid** Clean, free of solids and abrasive substances, non-viscous, non-aggressive, non-crystallised and chemically neutral

**Maximum % of glycol** 30%

### Min. and max. supported liquid temperature

-30 °C to +120 °C (EPDM)

-15 °C to +120 °C (Viton/FKM)

**Maximum ambient temperature** +50 °C

### Maximum operating pressure bar / kPa

25 bar / 2500 kPa

**Class of protection** IP 55

**Motor insulation class** F

### Impeller/s material

AISI 304 stainless steel for NKV S

AISI 316 stainless steel for NKV X (only on request)

**Single phase power input** 1x230 V up to 2,2 kW

### Three phase power input

380 - 415 V at 50 Hz from 3 kW

**Possible type of installation** Vertical position

### Special versions on request

Yes, available with different types of mechanical seals for aggressive liquids and connections (round, oval, Victaulic, clamp flanges), **with parts in contact with the liquid in AISI 316 stainless steel (X versions)**, other voltages and frequencies, ATEX version

IE3 ≥ 0,75 kW

CENTRIFUGAL PUMPS

### HIGH EFFICIENCY

The new NKVE pumps are supplied with IE3 class motors and comply with the highest energy efficiency standards on the water handling market.

### PERFORMANCE FOR EVERY NEED

They offer incredible application flexibility thanks to a complete performance range and the ability to work with ambient temperatures up to 50°C.

### ROBUSTNESS AND RELIABILITY

All parts in contact with liquids are made of AISI 304 stainless steel (AISI 316 X versions). DAB construction quality guarantees solidity and greater resistance to wear and tear.

### THE EASIEST REPLACEMENT EVER

In addition, the new range has been designed to simplify replacement thanks to the standard flanges and standard centre distances.

MULTISTAGE CENTRIFUGAL PUMPS WITH VERTICAL AXIS WITH INVERTER MCE/P

**NEW MODELS**

DAB's NKVE 32, 45, 65, 95 pumps are multi-impeller vertical centrifugal pumps with coupling with MCE-P inverter installed as standard; designed for pressurization in civil and commercial environments' they can also be used in agriculture and in watering systems.

For the recirculation of water in heating and air conditioning systems. They are particularly versatile, thanks to the use of the MCE-P inverter, which ensures performance levels capable of automatically adapting to the different needs of the system, keeping a constant pressure. Pressure sensor supplied as standard.

Pump body and upper flange in cathoretic paint coated cast iron; impellers, diffusers and pump liner made of AISI 304 stainless steel (AISI 316 stainless steel available on request - X version).

Versatility, thanks to the centre distance between the 2 in-line ports, designed to maximise interchangeability. Starting from 5.5 kW models, the silicon carbide-graphite mechanical seal can be removed without removing the motor. Mechanical seals for aggressive liquids and different connections also available (round, oval, Victaulic, clamp flanges).

All the AISI 316 stainless steel - X version - models are certified for use with drinking water (WRAS and ACS certified).

Pumps coupled by rigid coupling to IE3 high energy efficiency electric motors.

**Operating range**

From 1 m<sup>3</sup>/h to 120 m<sup>3</sup>/h with head up to 320 m

**Type of pumped liquid** Clean, free of solids and abrasive substances, non-viscous, non-aggressive, non-crystallised and chemically neutral

**Maximum % of glycol** 30%

**Min. and max. supported liquid temperature**

From -30 to +120°C (EPDM)

From -15°C to +120°C (Viton/FKM)

**Class of protection** IP 55

**Motor insulation class** F

**Impeller/s material**

AISI 304 stainless steel

AISI 316 for NKV X only on request

**Single phase power input** 1x230 V up to 2,2 kW

**Three phase power input**

380 - 415 V at 50 Hz from 3 kW

**Possible type of installation** Vertical position

**Special versions on request**

Yes, available with different types of mechanical seals for aggressive liquids and connections (round, oval, Victaulic, clamp flanges), **with parts in contact with the liquid in AISI 316 stainless steel (X versions)**, other voltages and frequencies, ATEX version

IE3 ≥ 0,75 kW

CENTRIFUGAL PUMPS

# NKM-GE / NKP-GE WITH MCE/C

ENBLOC CENTRIFUGAL PUMPS WITH INVERTER

Enbloc electric centrifugal pumps with coupling, designed for a wide range of applications such as:

- Circulation of hot water for heating.
- Circulation of cold water for air conditioning.
- Circulation of cold water for cooling.

Highly versatile pumps thanks to the use of the **MCE/C** inverter, to guarantee performance able to automatically adapt to the various system requirements, while maintaining constant differential pressure. Spiral single-stage body in cast iron according to DIN-EN 733 (ex DIN 24255), cast iron support, flanges according to DIN 2533 and DIN 2532 for DN 200. Cast iron impeller, sealed and dynamically balanced with compensation of the axial thrust via balancing holes, operating (on request) on interchangeable wear rings.

Pump shaft in AISI 304 stainless steel. Seal: standardised mechanical seal according to DIN 24960 in carbon/silicon carbide with O-rings in EPDM. Asynchronous, closed motor cooled by external ventilation, construction design B3/B5, 2-pole for NKPGE and 4-pole for NKM-GE. Rotor mounted on generously sized ball bearings to ensure silent and durable operation.

**Speed of rotation** 1450 - 2900 1/min.

**Operating range**  
from 1 a 450 m<sup>3</sup>/h head up to 72 metri.

**Liquid temp. range** from -10°C to +140°C.

**Pumped liquid** clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral and close to the characteristics of water. **Installation:** normally horizontal or vertical provided the motor is always above the pump.

**Max. ambient temperature** +40°C

**Maximum operating pressure**  
16 bar - 1600 kPa (for DN 200 max. 10 bar).

**Protection rating** IP 55

**Insulation class** F

**Flanging** PN 16 DIN 2533

**Special versions on request**

Pumps for liquids other than water.

Other voltages and/or frequencies.

Inverter modulation with 0-10V signal

IE3 ≥ 0,75 kW

CENTRIFUGAL PUMPS

# KDNE WITH MCE/C

STANDARDISED CENTRIFUGAL PUMPS ON SKID WITH INVERTER

Standardised centrifugal pumps on skid with elastic coupling, electronics designed for a wide range of applications such as:

- Circulation of hot water for heating.
- Circulation of cold water for air conditioning.
- Circulation of cold water for cooling.

Highly versatile pumps thanks to the use of the DAB MCE/C inverter, to guarantee performance able to automatically adapt to the various system requirements, while maintaining constant differential pressure.

Spiral single-stage body in cast iron according to DIN-EN 733 (ex DIN 24255), cast iron seal cover and motor support, flanges according to DIN 2533 (DIN 2532 for DN 200). Cast iron impeller, sealed and dynamically balanced with axial thrust compensation via balancing holes, operating (on request) on interchangeable wear rings. Pump shaft in stainless steel mounted on two generously sized ball bearings, permanently lubricated and housed in a special chamber inside the support.

Standard seal: standardised mechanical seal according to DIN 24960 in carbon/silicon carbide with O-rings in EPDM. On request, packing seals are available, with hydraulic lubrication ring and gland in two easily removable parts.

Sealed, asynchronous motor cooled by external ventilation; 2-pole or 4-pole. Rotor mounted on generously sized ball bearings to ensure silent and durable operation. Electrical protection: according to standards transposed into the ELECTROMAGNETIC COMPATIBILITY DIRECTIVE EEC 89/336 and subsequent amendments, LOW VOLTAGE DIRECTIVE EEC 73/23 and subsequent amendments and standards CEI 2-3.

**Construction design** B3

**Speed of rotation** 1450 - 2900 1/min.

**Operating range** from 1 a 440 m<sup>3</sup>/h with head up to 70 meters

**Liquid temp. range** from -10°C to +140°C.

**Pumped liquid** clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral, characteristics similar to water.

**Max. ambient temperature** +40°C

**Maximum operating pressure** 16 bar - 1600 kPa (per il DN 200 max 10 bar).

**Protection rating** IP 55

**Thermal category** F

**Flanging**

PN 16 DIN 2533

PN 10 DIN 2532 per DN 200

**Installation** fixed horizontally.

**Special versions on request**

IE3 ≥ 0,75 kW

## KI

## AISI 304 STAINLESS STEEL SINGLE IMPELLER CENTRIFUGAL PUMPS

## NEW MODELS

Axial suction AISI 304 stainless steel single impeller centrifugal pump for pressurization in civil and industrial environments (cold and hot liquids, and coolants), of thermal waters, and for industrial washing systems.

The standard construction materials ensure higher resistance to oxidation (rust) and therefore to erosion, and most of all operation at high temperatures (90°C).

Other possibilities of use are: in propylene glycol (V version) and ethylene glycol (E version) chiller systems; in industrial washing systems using cold water, hot water, and coolants; with moderately oily or aggressive liquids (V and VS version)

**Operating range**

up to 10 m<sup>3</sup>/h with head up to 32 metres.

**Pumped liquid** clean, free of solids and abrasives, non-viscous, non-crystallised and chemically neutral, with properties similar to water.

**Liquid temperature range** from -10 °C to +90 °C

**Maximum ambient temperature** +40 °C

**Maximum operating pressure** 8 bar (800 kPa)

**Protection class** IP 55

**Insulation class** F

**Standard voltage** 220-230 V/50 Hz single-phase, 230-400 V/50 Hz three-phase

**Installation** fixed horizontal or vertical position, provided that the motor is always above the pump.

**Special executions on request**

special mechanical seals:

**V version** Alox Ceramic/Carbon/FKM: for oily liquids (up to 110°C) and propylene glycol.

**VS version** SiC/SiC/FKM: for oily liquids (up to 110°C) and abrasive particles.

**Version E** SiC/Carbon/EPDM: water up to 120°C and ethylene glycol.

IE3 ≥ 0,75 kW

IE2 ≥ 0,75 kW

# K SINGLE IMPELLER

## SINGLE IMPELLER CENTRIFUGAL PUMPS

### NEW MODELS

K 35/1200 T

Single impeller centrifugal pump suitable for domestic, civil, industrial and agricultural installations and for decanting, mixing and irrigating uses. Cast iron pump body and motor support. Technopolymer impeller. Stainless steel driving shaft. Carbon/ceramic mechanical seal. Asynchronous, closed motor, cooled by external ventilation. Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version. For the protection of the three-phase motor it is advisable to use a suitable overload protection complying with the regulations in force.

**Operating range** from 1,8 to 96 m<sup>3</sup>/h with head up to 62 metres.

**Pumped liquid characteristics** clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised, chemically neutral and close to the characteristics of water.

#### Liquid temperature range

from -10°C to +50°C: for K 20/41, K 30/70, K 30/100, K 36/100, K 12/200, K 36/200, K 40/200.

from -15°C to +110°C: for the other pups.

#### Maximum operating range

TWIN IMPELLERS CENTRIFUGAL PUMPS

## NEW MODELS

K 35/40 M

K 70/300 T

Twin impeller centrifugal pump designed for use in pressurisation units for water supply systems for domestic, civil and industrial use. Suitable for sprinkling irrigation and other water supply applications. Cast iron pump body and motor support. Technopolymer impeller. Stainless steel driving shaft. Carbon/ceramic mechanical seal. Asynchronous, closed motor, cooled by external ventilation. Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version. For the protection of the three-phase motor it is advisable to use a suitable overload protection complying with the regulations in force.

### Operating range

from 1.2 to 30 m<sup>3</sup>/h with head up to 97 metres.

**Pumped liquid characteristics** clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised, chemically neutral and close to the characteristics of water.

### Liquid temperature range

from -10°C to +50°C: for K 35/40, K 45/50, K 35/100, K 40/100, K 55/100  
from -15°C to +110°C: for K 55/50, K 66/100, K 90/100, K 70/300, K 80/300, K 70/400, K 80/400.

### Maximum operating range

K 35/40, K 35/100, K 40/100: **6 bar (600 kPa)**

K 45/50, K 55/50: **8 bar (800 kPa)**

K 55/100, K 66/100: **10 bar (1000 kPa)**

K 90/100, K 70/300, K 80/300 K 70/400,

K 80/400: **12 bar (1200 kPa).**

**Maximum ambient temperature** +40°C

**Protection level** IP 44

**Terminal board protection level** IP 55

**Insulation class** F

IE3 ≥ 0,75 kW

IE2 ≥ 0,75 kW

## CENTRIFUGAL PUMPS FOR AIR CONDITIONING

KC

KCV

Pumping of water or other non-aggressive non-explosive liquids that do not contain solid particles or fibre. Especially suitable for handling water and glycol solutions in air conditioning circuits.

**- PLUS**

**VERSATILE:** thanks to the high quality construction materials and oversized motors, the KC and KCV series of pumps can be used in surroundings with temperatures up to 65°C and a glycol percentage of as much as 40% in the handled liquid.

**RELIABLE:** all components are sized to guarantee a working life of at least 50,000 duty hours (with the exception of the bearings and mechanical seals, the manufacturers of which guarantee an average life of 25,000 hours in the most severe duty conditions)

**RUST PROOF:** all components in contact with the liquid are made of thermoplastic (polypropylene or reinforced Noryl) and the pump shaft is made of AISI 304 stainless steel

**FLEXIBLE:** facility to rotate the pump body in steps of 90° for greater installation flexibility.

Complete hydraulic section (pump body, seal holder flange, impeller, diffuser) made of fibreglass reinforced technopolymer, shaft extension in contact with liquid in AISI 304 stainless steel, mechanical seal in silicon carbide/graphite.

O-rings in EPDM Externally cooled asynchronous motor for continuous duty (S1), 2 poles

**Maximum ambient temperature** 65°C

**Motor protection rating** IP55

**Insulation class**

F (copper wire with class H insulation)

**Standard input voltage**

three-phase 230-400 V/50 Hz

Sealed, water resistant and humidity resistant ball bearings Motor construction to EN 60335-2-41

**Operating range** from 3 to 45 m³/h

**Maximum head** 24 m

**Maximum working pressure** 6.5 bar

**Liquid temperature range** from -10 to +55°C

**Maximum glycol contents** up to 40%

**Installation** fixed or portable in horizontal position

**Pumped liquid**

Maximum ambient temperature: 65 °C

**Special versions on request**

alternative voltages and/or frequencies.

**IE3 ≥ 0,75 kW**

# NKM-G / NKP-G

STANDARDISED ENBLOC CENTRIFUGAL PUMPS

Enbloc centrifugal electric pumps with integral shaft designed for a wide range of applications, such as:

- Water supply
- Circulation of hot water for central heating.
- Circulation of cold water for air conditioning and refrigerating.
- Transfer of liquids in agriculture, horticulture and industries.
- Implementation of pumping systems

#### Pump construction characteristics:

Single-stage, cast iron spiral body made to DIN-EN 733 (formerly DIN 24255), cast iron support, flanges in accordance with DIN 2533. Cast iron impeller, encased and dynamically balanced with compensation of the axial thrust by means of balancing holes, operating (on request) with interchangeable consumable rings. AISI 304 stainless steel pump shaft.

Seal: standardised mechanical seal made to DIN 24960 in carbon / carborundum with O' rings in EPDM.

#### Motor construction characteristics

Closed, asynchronous motor with external ventilation, 2 poles for NKP and 4 poles for NKM. Rotor mounted on oversized ball bearings to ensure silent running and long life. We recommend using overload protection for the motor, in accordance with current norms. In the case of liquids denser than water, the motors must be proportionally more powerful.

**Built to** IEC 2-3 standards

**Protection level** IP 55

**Insulation level** F

**Standard voltage** 230/400 V 50 Hz up to 2,2 Kw included 400 V Δ 50 Hz over 2,2 Kw

**Speed of rotation** 1450 - 2900 1/min.

#### Operating range

from 1 to 105 m<sup>3</sup>/h with head up to 96 metres.

**Characteristics of pumped liquid** clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral and close to the characteristics of water.

#### Liquid temperature range

from -10°C to +140°C

**Maximum ambient temperature** +40°C

#### Maximum operating pressure

16 bar - 1600 kPa

**Flanging** PN 16 DIN 2533

**Installation** normally horizontal or vertical provided the motor is always above the pump.

#### Special versions on request

pumps for liquids other than water.  
Other voltages and/or frequencies.

IE3 ≥ 0,75 kW

CENTRIFUGAL PUMPS

# KDN

## STANDARDISED CENTRIFUGAL PUMPS

Enbloc, centrifugal electric pumps with coupling designed for a wide range of applications such as:

- Supplying water.
- The circulation of hot water for central heating.
- The circulation of cold water for air conditioning and refrigerating.
- The transfer of liquids in agriculture, horticulture and industries.
- The implementation of pumping systems.

These can be connected to a two or four poles electric motor with a coupling and mounted on a pressed metal bedplate in accordance with UNI EN 23661.

Single-stage, cast iron spiral body made to DIN-EN 733 (formerly DIN 24255), cast iron seal holder cover and motor support, flanges in accordance with DIN 2533 (DIN 2532 for DN 200).

Impeller in cast iron, encased and dynamically balanced with compensation of the axial thrust by means of balancing holes, operating (on request) with interchangeable consumable rings.

Stainless steel pump shaft supported by two large maintenance-free greased ball bearings, housed inside a special chamber of the support. Standard seal: standardised mechanical seal made to DIN 24960 in carbon/carborundum with O' rings in EPDM. Packing on request with hydraulic lubricating ring and stuffing box in two easily removable parts.

**Speed of rotation** 1450 - 2900 1/min.

### Operating range

from 1 to 500 m<sup>3</sup>/h with a head of up to 100 metres.

**Pumped liquid** clean, without solid or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral, close to water characteristics.

### Liquid temperature range

from -10°C to +140°C.

**Maximum ambient temperature** +40°C.

### Maximum working pressure

16 bar - 1600 kPa (for DN 200 max. 10 bar).

### Flanging

PN 16 DIN 2533 - PN 10 DIN 2532 for DN 200

**Installation** normally horizontal.

**Special versions on request** pumps for liquids other than water.

Other voltages and/or frequencies.

IE3 ≥ 0,75 kW

## STANDARDISED CENTRIFUGAL PUMPS

Single-stage centrifugal pump body with axial suction port, radial discharge port and horizontal shaft components. The KDN pumps have dimensions and nominal performances according to EN 733 (10 bar) but are designed for 16 bar operation wherever the shaft seal type allows it. The suction and discharge flanges are according to EN 7005 PN 10 or 16. All pumps are dynamically balanced according to ISO 1940 class 6.3 and impellers are hydraulically balanced. Pump and motor are mounted on a common baseplate in accordance with EN 23 661 in all-welded steel. Oversizes have profile base frames. Due to the pump design the complete bearing assembly including impeller and shaft seal can be dismantled without removing the pump body from the pipe system (back-pull-out design). Asynchronous, closed and cooled with external ventilation, 2, 4 or 6 poles motors.

Electrical protection: in compliance with the EEC 89/336 ELECTROMAGNETIC COMPATIBILITY directive and subsequent amendments, EEC 73/23 LOW VOLTAGE directive and subsequent amendments and CEI 2-3 standards.

- Flow** Max. 2200 m<sup>3</sup>/h
- Head** Max. 158 m
- Liquid temperature** from -25°C to +140°C
- Operating pressure** Max. 16 bar
- Motor construction** B3
- Protection level** IP 55
- Insulation class** F
- Supply voltage** Three-phase 230-400V 50 Hz up to 2.2 kW included 400V Δ 50 Hz over 2.2 Kw
- Special versions on request** other voltages and/or frequencies
- IE3 motor efficiency class available on request. Please contact our sales network for a price quotation.**

Complete electric pump or liquid end only is available – Please contact our sales network for a price quotation

## MULTISTAGE CENTRIFUGAL PUMPS WITH VERTICAL AXIS

KVC

KVCX

Vertical multistage centrifugal pump suitable for use in small and medium water supply installations.

Suitable for pressurization units, surge tank supply, rain irrigation and crop-dusting systems, fire-fighting and washing systems, conveyance of condensate and cooling water.

Innovative and robust design.

Technopolymer discharge/suction bodies and in-line suction and discharge ports with threaded metal insert.

Impellers, diffuser bodies and diffusers in technopolymer, fully rust-proof. Stainless steel AISI 303 pump jacket, adjustment rings and seal disk.

Silicon carbide/Carbon graphite mechanical seal, fitted on the AISI 303 stainless-steel drive shaft extension.

Asynchronous, closed motor cooled by external ventilation. Rotor mounted on oversized greased sealed-for-life ball bearings to ensure silent running and long life.

Built-in thermal and current overload protection and a capacitor permanently on in the singlephase version.

Protection for the three-phase version is the responsibility of the user. Built in CEI 2-3/CEI 61/69 (EN 60335-2-41) standards.

**Level of protection** IP 55

**Insulation class** F

**Standard voltage**

Single-phase 220-240 V / 50 Hz

Three-phase 230-400 V / 50 Hz

**Operating range**

from 50 to 200 litre/min. with head up to 113 m.

**Pumped liquid** clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral and close to the characteristics of water.

**Liquid temperature range**

from 0°C to +35°C for domestic use

(EN 60335-2-41 safety standards).

from 0°C to +40°C for other uses.

**Maximum ambient temperature** +40°C

**Maximum working pressure** 12 bar (1200 kPa).

**Installation** fixed, in vertical or horizontal position. Providing that the motor is positioned above the pump.

**Special versions on request**

Other voltages and/or frequencies.

IE3 ≥ 0,75 kW

IE2 ≥ 0,75 kW EXTRA EU

MULTISTAGE CENTRIFUGAL PUMPS WITH VERTICAL AXIS

## NEWS

DAB's new NKV S pumps are AISI 304 stainless steel multi-impeller vertical centrifugal pumps with coupling; designed for pressurisation in civil and commercial environments, they can also be used in agriculture, in watering systems.

The pumps can be used for the recirculation of water in heating and air conditioning systems.

In all models, the parts in contact with the liquid are made of AISI 304 stainless steel (AISI 316 stainless steel, X version, only on request).

They are particularly versatile, thanks to the centre distance between the 2 in-line ports, designed to maximise interchangeability. Starting from 5.5 kW models, the silicon carbide-graphite mechanical seal can be removed without removing the motor.

Mechanical seals for aggressive liquids and different connections (round, oval, Victaulic, clamp flanges) available on request.

All the models are WRAS and ACS certified for use with drinking water.

Rigid coupling to IE3 high energy efficiency electric motors.

### Operating range

1 m<sup>3</sup>/h to 30 m<sup>3</sup>/h with head up to 320 m

**Pumped liquid** Clean, free of solids and abrasives, non-viscous, non-aggressive, non-crystallised and chemically neutral

**Maximum glycol content** 30%

**Supported liquid temperature**

-30 °C to +120 °C (EPDM)

-15 °C to +120 °C (Viton/FKM)

**Maximum ambient temperature** +50° C

**Maximum operating pressure bar / kPa**

25 bar / 2500 kPa

**Motor protection class** IP 55

**Motor insulation class** F

**Impeller/s material**

AISI 304 stainless steel for NKV S

AISI 316 stainless steel for NKV X (only on request)

**Single-phase power supply**

Contact our sales network

**Three phase power input**

220 - 240 / 380 - 415 V at 50 Hz, up to 2.2 kW

380 - 415 V at 50 Hz, 3 kW

**Possible type of installation** Vertical position

**Special versions on request**

Available with different types of mechanical seals for aggressive liquids and connections (round, oval, Victaulic, clamp flanges), **with parts in contact with the liquid in AISI 316 stainless steel (X versions)**, other voltages and frequencies, ATEX version

IE3 ≥ 0,75 kW

ACCESSORIES  
PAG. 205

### HIGH EFFICIENCY

The new NKV pumps are supplied with IE3 class motors and comply with the highest energy efficiency standards on the water handling market.

### PERFORMANCE FOR EVERY NEED

They offer incredible application flexibility thanks to a complete performance range and the ability to work with ambient temperatures up to 50°C.

### ROBUSTNESS AND RELIABILITY

All parts in contact with liquids are made of AISI 304 stainless steel (AISI 316 X versions). DAB construction quality guarantees solidity and greater resistance to wear and tear.

### THE EASIEST REPLACEMENT EVER

In addition, the new range has been designed to simplify replacement thanks to the standard flanges and standard centre distances.

## SPECIAL VERSION

MODEL
NKV 1 - 3 - 6 - 10
NKV 15 - 20

### VERSION WITH SPECIAL MECHANICAL SEALS

- <sup>(1)</sup> Mech. seal SPECIAL type E2 = SIC - SIC - EPDM = Silicon Carbide/Silicon Carbide/AISI 316/EPDM
- <sup>(2)</sup> Mech. seal SPECIAL type V3 = SIC - SIC - VITON = Silicon Carbide/Silicon Carbide/AISI 316/FKM
- <sup>(3)</sup> Mech. seal SPECIAL type V4 = SIC - CAR - VITON = Silicon Carbide/Carbon/AISI 316/FKM
- <sup>(4)</sup> Mech. seal SPECIAL type E5 = WC - WC - EPDM = Tungsten Carbide/Tungsten Carbide/AISI 316/EPDM

# NKV 32-45-65-95

MULTISTAGE CENTRIFUGAL PUMPS WITH VERTICAL AXIS

**NEW MODELS**

DAB's NKV 32, 45, 65, 95 pumps are multi-impeller vertical centrifugal pumps with coupling; designed for pressurisation in civil and commercial environments, they can also be used in agriculture, for the distribution of liquids and in watering systems.

The pumps can be used for the recirculation of water in heating and air conditioning systems.

Pump body and upper flange in cathaphoretic paint coated cast iron; impellers, diffusers and pump liner made of AISI 304 stainless steel (AISI 316 stainless steel available on request - X version).

They are particularly versatile, thanks to the centre distance between the 2 in-line ports, designed to maximise interchangeability. Starting from 5.5 kW models, the silicon carbide-graphite mechanical seal can be removed without removing the motor.

Mechanical seals for aggressive liquids and different connections (round, oval, Victaulic, clamp flanges) available on request.

All the AISI 316 stainless steel - X version - models are certified for use with drinking water (WRAS and ACS certified).

Rigid coupling to IE3 high energy efficiency electric motors.

**Operating range**

1 m<sup>3</sup>/h to 120 m<sup>3</sup>/h with head up to 320 m

**Pumped liquid** Clean, free of solids and abrasives, non-viscous, non-aggressive, non-crystallised and chemically neutral

**Maximum glycol content** 30%

**Supported liquid temperature**

-30 °C to +120 °C (EPDM)  
-15 °C to +120 °C (Viton/FKM)

**Maximum ambient temperature** +50° C

**Maximum operating pressure bar / kPa**

NKV 65, 95: 25 bar / 2500 kPa  
NKV 32, 45: 32 bar / 3200 kPa

**Motor protection class** IP 55

**Motor insulation class** F

**Impeller/s material**

AISI 304 stainless steel  
AISI 316 for NKV X only on request

**Single-phase power supply**

Contact our sales network

**Three phase power input**

220 - 240 / 380 - 415 V at 50 Hz, up to 2.2 kW  
380 - 415 V at 50 Hz, 3 kW

**Special versions on request**

Yes, available with different types of mechanical seals for aggressive liquids and connections (round, oval, Victaulic, clamp flanges), **with parts in contact with the liquid in AISI 316 stainless steel (X versions)**, other voltages and frequencies, ATEX version.

**IE3 ≥ 0,75 kW**

**ACCESSORIES

Available on request separately from the pump. Used to level the pump during installation so as to make up for the difference in centreline heights between the pump and the motor. The kit comprises two shims with dimensions A (width), B (length), H (height) shown in the table. The shims with a height of over 20 mm are supplied complete with screws, nuts and washers in order to fix them to the pump and motor.

## SUBMERSIBLE PUMPS

NOVA M-A

NOVA M-NA

Pump body, impeller, cap and suction grid in technopolymer. Motor, rotor shaft and screws in stainless steel.

Triple O-ring seal interposed with an oil precombustion chamber. Continuous duty submersible asynchronous motor. Stator fitted in an airtight stainless steel casing.

Rotor mounted on overdimensioned, greased-for-life ball bearings. Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version. For the protection of the three-phase motor it is advisable to use a suitable overload protection complying with the regulations in force. Supplied with standard power cables for the single-phase version:

5 meters H05RN-F per: NOVA 180 M-A  
NOVA 300 M-A  
NOVA 600 M-A

10 meters H05RN-F per: NOVA 180 M-NA  
NOVA 200 M-NA

10 meters H07RN-F per: NOVA 600 M-NA

Standard cables supplied for the three-phase version: 5 metres of H07RN-F cable. For the single phase the standard is a SCHUKO plug EEC VII.

**For special version available with special stainless steel motor shaft.**

### Operating range

from 1 to 16 m<sup>3</sup>/h with head up to 10.2 metres

### Liquid temperature range

from 0°C to +35° C for domestic use

## SUBMERSIBLE PUMPS

NOVA UP M-A

NOVA UP M-NA

Vertical flow drainage pump in an automatic or manual version with removable filter for suction up to 2/3 mm, features that make it a strong pump and allow for installation versatility.

These pumps can be used with liquids that contain solids of a maximum size up to 10 mm.

Pump body, impeller, Cap and grille in technopolymer.

The motor, rotor shaft and screws in stainless steel.

Triple O-ring seal with interposed oil Chamber.

Asynchronous submersible motor for continuous operation. Stator in a sealed stainless steel enclosure.

Rotor mounted on ball bearings greased for life and oversized.

Thermal-ampere protection incorporated and condenser permanently connected.

### Operating range

from 1 to 15 m<sup>3</sup>/h with prevalence up to 10 meters.

### Temperature range of the liquid

from 0 °C to +35 °C for domestic use.

### Pumped liquid temperature

murky waters without fibers

### Minimum depth of draft

NOVA UP-300M - 120 mm

NOVA UP 300M - 60 mm

NOVA UP 600M - 165 mm

NOVA UP 600M - 70 mm

### Maximum immersion depth

7 meters.

### Installation

vertical, fixed or portable.

### Degree of protection

IP 68.

### Insulation class

INTEGRATED FLOAT SWITCH SUBMERSIBLE PUMPS

Submersible pumps specifically designed for uses in narrow pits with dimensions down to 20 cm x 20 cm. Suitable to pump clear water containing particles with maximum diameter up to 5 mm.

### Pump with built-in float switch

Anti-corrosive and rust-proof materials.

Integrated float switch.

Low suction capability: 2 – 3 mm (manual mode).

Very low priming and starting level of the pump: 10 – 15 mm (manual mode).

Knob for manual or automatic operation.

Easy access through sliding cover to float switch for cleaning.

Motor with thermal overload protection.

Excellent cooling of the motor that enables the pump to operate even when it is partially submersible.

Supplied with power cable with plug, non return valve and 4-step fitting.

### Operating range

from 1 to 10m<sup>3</sup>/h with head up to 9 metres.

### Liquid temperature range

from 0 °C to +35 °C for domestic use.

**Pumped liquid** dirty water without fibres.

### Pump priming limit

10-15 mm in manual operation.

**Max. immersion depth** 7 metres.

SUBMERSIBLE PUMPS

Submersible electric pump in AISI 304 Stainless Steel: pump body, impeller, motor flange, filter and filter cover, motor casing, outer casing with handle, cable compartment cover.

Shaft in AISI 316 stainless steel.

Handle coated with insulating rubber. **Double mechanical seal** with oil chamber interposed, carbon/alumina on motor side and silicon/silicon carbide on pump side. **Dry motor**, asynchronous, watertight, cooled by the pumped liquid itself. Standard thermal protection in the winding. Capacitor permanently on in the single-phase version. 10 metres of H07RN-F power cables with schuko plug are supplied as a standard USA plug instead could be also available on request. All models can be supplied either with or without float.

### Operating range

from 3 to 24 m<sup>3</sup>/h with head up to 14.2 mt.

### Liquid temperature range

from 0°C to +35°C for domestic use.  
from 0°C to +50°C.

### Pumped liquid characteristics

rain water, phreatic water, sandy water from building yards and clean waste waters, not aggressive.

### Maximum working temperature

+40°C with the motor out of the water.

**Free passage through the suction grid** 10 mm.

**Maximum immersion depth** 7 mt.

**Protection level** IP 68.

**Insulation class** F.

**Installation** fixed or portable, in a vertical position.

## SUBMERSIBLE PUMPS

Submersible pump with cast iron pump body, motor casing and adjustment ring impeller. Cast iron adjustment disk coated with abrasion-proof rubber. Stainless steel shaft, handle, filter, bolts and screws. Silicon/carbide mechanical seal, inspectionable oil chamber. Continuous duty submersible induction motor, in a watertight casing. Rotor mounted on oversized greased sealed-for-life ball bearings.

### THERMAL

PROTECTION in the windings, to be connected to the control panel. 10 mt of neoprene rubber power cable.

**\*In order to operate, the pumps must be equipped with a control and protection system, supplied separately and not connected to the electropumps(see panels)**

**Operating range** from 6 to 33 m<sup>3</sup>/h with head up to 19,2 mt for the single-phase version and 21,5 mt for the three-phase version.

### Liquid quality requirements

sandy, muddy or sludgy water from building sites, clean waste water, rain water, ground water, fountain, river or lake water, always non aggressive

**Liquid temperature range** from 0°C to +55°C

**Free passage through the suction grid** 12 mm

**Maximum immersion depth** 10 mt

**Installation** fixed or portable in a vertical position

**Liquid temperature range** from 0°C to +55°

## SUBMERSIBLE PUMPS

Submersible centrifugal pump with **ADJUSTMENT RING IMPELLER** suitable for lifting water from drainage waste containing solids having maximum size of **5 mm**. Top cover and motor body in anodized die cast aluminium. Impeller in ENGJL 200 cast iron. Pump body in ENGJL 200 cast iron. Double mechanical seals in oil chamber: motor side carbon/alumina, pump side in silicon carbide/silicon carbide. Dry type asynchronous sealed motor. Rotor mounted on ball bearings to ensure silent running and long life. In the single phase version capacitor is supplied in external control box equipped with current protection

**Protection level** IP 68

**Insulation class** F

Continuous duty, with completely immersed pump. The single-phase version can be equipped with float switch for automatic starting and stopping of the pump. Supplied as standard with 10 metre H07RN-F power cable.

**Operating range** from 3 to 66 m<sup>3</sup>/h with head up to 17 mt

**Liquid quality requirements**

Clear drain not aggressive water

**Liquid temperature range** from 0° to + 40°

**Maximum immersion depth** 10 mt

**Installation** portable, in vertical position

SEWAGE PUMPS WITH CUTTING SYSTEM

Submersible centrifugal pump fitted with cutting system suitable for pumping domestic wastewater with usual solid additions. Solids which cannot be transported are rejected outside of the pump by the cutting rotor as the cutting system is located upstream from the pump hydraulics. Cover, motor body, hydraulic section and impeller in cast iron ENGJL 200, grinding device in AISI440C. **Carbon/alumina** double mechanical seal. Dry type asynchronous sealed motor. Rotor mounted on ball bearings to ensure silent running and long life. In the single-phase version capacitor current protection in external control box, supplied with the pump.

**Motor protection level** IP 68

**Insulation class** F

Continuous duty with pump completely immersed. The single-phase version can be equipped with float switch for automatic starting and stopping of the pump. Supplied as standard with 10 mt H07RN-F power cable.

**Operating range**

from 3 to 18 m<sup>3</sup>/h with head up to 23 mt.

**Liquid quality requirements**

Not aggressive sewage, drain water

**Liquid temperature range** From 0° to +40°

**Maximum immersion depth** 10 mt

**Installation** portable, in vertical position.

**Free passage** 5mm

# FEKA 600

## SEWAGE PUMPS

Pump body, impeller, cap and suction grid in technopolymer. Motor, rotor shaft and screws in stainless steel.

Triple O-ring seal interposed with an oil precombustion chamber. Continuous duty submersible asynchronous motor. Stator fitted in an airtight stainless steel casing.

Rotor mounted on overdimensioned, greased-for-life ball bearings. Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version. For the protection of the three-phase motor it is advisable to use a suitable overload protection complying with the regulations in force. Supplied with standard power cables for the single-phase version:

5 metres HO5RN-F cable for: FEKA 600 M-A

10 metres HO7RN-F cable for: FEKA 600 M-NA

Standard cables supplied for the three-phase version: 5 metres of HO7RN-F cable. For the single phase the standard is a SCHUKO plug EEC VII.

### Operating range

from 1 to 16 m<sup>3</sup>/h with head up to 10.2 metres

### Liquid temperature range

from 0°C to +35° C for domestic use

### Pumped liquid characteristics

FEKA sewage water from septic tanks

### Granulometersc passage through the suction grid

FEKA 600 - 25 mm

### Min. suction depth

FEKA 600 A - 175 mm

FEKA 600 NA - 38 mm

**Maximum immersion depth** 7 metres

**Maximum dry running time** 1 minute

**Protection level** IP 68

**Insulation class** F

## SEWAGE PUMPS

### Powerful submersible pumps for drainage and emptying duty.

Designed for pumping foul water containing solid particles of no more than 38 mm in diameter.

Anti-corrosion and anti-oxidation materials.

Motor with THERMAL

PROTECTION against overheating.

Wear-resistant motor shaft and impeller.

Excellent motor cooling to allow pump to run even when only partially submerged.

Automatic version equipped with float switch for automatic starting and stopping of the pump, and Manual version.

Equipped with power cable with plug, and 3-level union, without check valve.

### Operating range

from 1 to 18 m<sup>3</sup>/h with head up to 12 metres.

### Liquid temperature range

from 0 °C to +35 °C.

### Pumped liquid

dirty water with maximum solid particle size 38 mm.

**Max. immersion depth** 7 metres.

## SEWAGE PUMPS

Submersible centrifugal pump with liquid vortex cast steel impeller, suitable for pumping sewer water and waste water in general containing solids up to a maximum size of 50 mm. Handle with insulating rubber cover. AISI 316 stainless steel drive shaft. Double mechanical seal with intermediate oil chamber (atoxic oil), in carbon/alumina on the motor side and silicon carbide/silicon carbide on the pump side. Dry, asynchronous, sealed and cooled by the pumped liquid. Rotor mounted on greased for-life ball bearings, oversized and selected to guarantee greater noise reduction and duration. Thermo-amperometersc protection as standard for single-phase version, and the user's responsibility for the three-phase version. Constantly active capacitor on the single-phase version. Construction in accordance with the IEC 2-3 IEC 61-69 (EN 60335-2-41) standards.

**Motor protection class** IP 68

**Insulation class** F

**Standard voltage**

220-240V 50Hz Single-phase

400V 50Hz Three-phase

Continual running with liquid at 35 °C and pump completely submersible. The single-phase version can be supplied with float for automatic function.

**Power supply cable** 10 mt of H07RN-F cable with Shuko plug for the single-phase version and 10 meters of H07RN-F cable for the three-phase version.

**Operating range**

from 0 to 32 m<sup>3</sup>/h with head up to 14 mt

**Pumped liquid** sewer water and waste water in general and non aggressive.

**Liquid temperature range** from 0°C to +35°C for household use (EN 60335-2-41), from 0°C to +50°C for other uses.

**Maximum ambient temperature for pump running with submersible motor** +40°C

**Maximum immersion depth** 10 mt

**Installation** fixed or portable, vertical.

**Free Passage** 50 mm

## SEWAGE PUMPS

VORTEX IMPELLER

CONTROL MDN \*

Submersible pump with cast iron pump body, motor casing and vortex impeller. Stainless steel shaft, handle, filter, bolts and screws. Silicon/carbide mechanical seal, inspectionable oil chamber.

Continuous duty submersible induction motor, in a watertight casing. Rotor mounted on oversized greased sealed-for-life ball bearings.

### THERMAL

PROTECTION in the windings, to be connected to the control panel with 10 metres of neoprene rubber power cable.

**\* In order to operate, the pumps must be equipped with a control box and protection system, supplied separately and not connected to the electropumps (see panels).**

**Liquid temperature range** from 0°C to +55°C

**Operating range** from 3 to 30 m<sup>3</sup>/h with head up to 14 mt for the single-phase version and 15,5 mt for the three-phase version.

**Liquid quality requirements** dirty waste water, untreated sewage containing solids and/or long fibres, always non aggressive

**Liquid temperature range** from 0°C to +55°C

**Maximum ambient temperature for pump operation with the motor emerging** +40°C

**Maximum immersion depth** 10 mt

**Installation** fixed or portable in a vertical position

**Free passage** 38 mm

## SEWAGE PUMPS

VORTEX IMPELLER

Cast iron submersible pumps vortex impeller for sewage, suitable for foul waste water with solid contents with **42 mm** as maximum diameter. Technopolymer upper cover with handle. Motor body, hydraulic section and any impeller in cast iron EN GJL 200. Double mechanical seals in oil chamber: motor side carbon/alumina, pump side in silicon carbide/silicon carbide. Dry type asynchronous sealed motor. Rotor mounted on ball bearings to ensure silent running and long life.

**\*For single phase version, capacitor and overcurrent protection are set in external control box supplied with Schuko plug.**

For three phase versions, thermal and overcurrent protection are responsibility of the user.

**Motor protection rating** IP 68

**Insulation class** F

Continuous duty with completely immersed pump. Supplied as standard with **10 metre H07RN-F** power cable.

**Operating range**

from 3 to 39 m<sup>3</sup>/h with head up to 17 metres.

**Liquid quality requirements**

Non-aggressive sewage, drain water

**Liquid temperature range** From 0° to + 40°.

**Maximum immersion depth** 20 metres

**Installation** portable, in vertical position.

**Free passage** 42 mm.

**Comes with** UNI 1092 PN 6 compliant flange.

**Lifting device available** see accessories.

SEWAGE PUMPS

VORTEX IMPELLER

Cast iron submersible pumps with vortex impeller for sewage, suitable for foul and waste water with solid contents with **62 mm** as maximum diameter.

Motor body, hydraulic section and any impeller in cast iron EN G.JL 200. Single mechanical seals pump side in silicon carbide/silicon carbide in oil chamber. Dry type asynchronous sealed motor. Rotor mounted on ball bearings to ensure silent running and long life.

On request: oil chamber with water level detector kit.

The single-phase version can be equipped with float switch for automatic starting and stopping of the pump.

**\*For single phase version, capacitor and overcurrent protection are set in external control box supplied with Schuko plug.**

For three phase versions, thermal and overcurrent protection are responsibility of the user

**Motor protection rating** IP 68

**Insulation class** F

Continuous duty with completely immersed pump.

Supplied as standard with **10 mt H07RN-F** power cable.

**Operating range**

from 6 to 48 m<sup>3</sup>/h with head up to 17 mt.

**Liquid quality requirements**

Non-aggressive sewage, drain water

**Liquid temperature range** From 0° to + 40°.

**Maximum immersion depth** 20 mt

**Installation** portable, in vertical position.

**Free passage** 62 mm.

**Comes with** UNI 1092 PN 6 compliant flange.

## SUBMERSIBLE PUMPS

Design for the pumping of wastewater and sewage from buildings and sites in private, commercial, industrial areas in accordance with European Standard EN 12050-1.

Vortex impeller with maximum solids handling with new no-clogging shape, single channel impeller with high efficiency and compliance with European Standard EN 12050-1. Single-unit cartridge seal with double mechanical seals, SiC-SiC at the pump side, SiC-C at the motor side. All seals are independent of rotation direction. DN 65, DN 80, DN 100 radial slot EN 1092-1 flange discharge.

Liquid Viscosity : 1mm<sup>2</sup>/s. Premium Efficiency IE3, three-phase, squirrel-cage motor. Continuously S1 rated motor in submerged applications, or discontinuous S3 according to minimum levels. Seal monitoring by a moisture sensor in the seal chamber, which signals an inspection alert if there is leakage at the mechanical seals (optional). Bi-metallic switch in stator windings, with max temperature (150°C). Stainless steel shaft. Designed with high resistance fatigue fracture.

Available in Ex version for use in potentially explosive atmosphere (ATEX certifications: II2G Ex db k IIB T4 or IECEx: Ex db IIB T4 Gb).

**Impeller type FKV:** Vortex.

**FKC:** Single channel.

**Solid handling** 65 ÷ 100 mm

**Nominal power** 1,1 ÷ 11 kW

**Outlet** DN 65 / 80 / 100 / 150

**Performance range**

from 4.3 to 280 m<sup>3</sup>/h with 41 meters head.

**Fluid** wastewater and sewage from buildings and sites in private, commercial, industrial areas.

**Fluid PH** 6.5 ÷ 12.

**Fluid temperature range** from 0° to +40°C.

For higher temperature please contact our sale offices.

**Max installation depth**

20 mt (with a proper cable length).

**Type of installation** fixed by Coupling Unit, portable in vertical position with pedestal. Continuous working with total submerged applications, or discontinuous S3 with respect of minimum levels.

**Approvals** EN 12050-1 e Ex (ATEX , IECEx).

**Degree of protection** IP 68

**Insulation class** F

**Max starting / hours** 20

PANELS  
PAG. 245

ACCESSORIES  
PAG. 235

ENERGY  
EFFICIENCY **IE3**

### NEW IE3 MOTORS

The new **IE3 premium efficiency motors** drastically reduce energy operation costs. Given the low running temperatures, it is guaranteed their operation up to 40°C, for higher temperatures please contact the sales department.

Thermal protection is standard and they have an insulation class equas to F.

### SINGLE-UNIT CARTRIDGE SEAL

A single-unit cartridge seal is a great advantage for maintenance of the pump as allows the removal and insertion of the seals in less time, having a total guarantee to carry out properly. It's an **exclusive patent DAB**: a double mechanical seal Sic-Sic with opposite faces, independent from the rotation direction of shaft, with Viton elastomers and leap seal.

**EN 12050-1**

### NEW NO-CLOGGING VORTEX IMPELLER

The guarantee of operation comes before efficiency. A new design of the Vortex impellers and the total solid handling are respectively the two guarantees to have no-clogging issues.

**Compliant with EN 12050-1**

**EN 12050-1**

### NEW SINGLE CHANNEL HYDRAULICS

The new high efficiency single-channel hydraulic has been designed especially for continuous wastewater operations with high flow demand and low fiber content.

**Compliant with EN 12050-1**

## SEWAGE PUMPS

FEKA 6200

SINGLE CHANNEL IMPELLER

Cast iron submersible pumps with vortex impeller for sewage single channel impeller (6000 vers.) and three vane impeller (8000 vers.), suitable for foul waste water with solid contents with **80-108 mm** as maximum diameter.

Motor body, hydraulic section and any impeller in cast iron EN G.JL 200.

Double mechanical seals in oil chamber: motor side carbon/steel, pump side in silicon carbide/silicon carbide. Oil chamber with water level detector kit.

Dry type asynchronous sealed motor. Rotor mounted on ball bearings to ensure silent running and long life. Thermal and overcurrent protection are installed in the motor windings as standard.

**Motor protection rating** IP 68

**Insulation class** F

Continuous duty with completely immersed pump. Supplied as standard with **10 metre H07RN-F** power cable.

**Free passage** 80-108 mm.

**Operating range** from 36 to 780 m<sup>3</sup>/h with head up to 28 mt.

**Liquid quality requirements**

Non-aggressive sewage, drain water

**Free passage** 150 mm.

**Liquid temperature range** From 0° to + 40°.

**Maximum immersion depth** 20 mt

**Installation** in vertical position.

# GENIX

## AUTOMATIC LIFTING STATIONS

### NEW MODELS

GENIX

GENIX WL

Its use is needful whenever the wastewater coming from the WC, the shower, the washbasin or the bidet cannot be expelled by gravity. GENIX models normally have a front WC connection. The difference in the GENIX WL is the side WC connection, specifically designed for WC wall-mounted installations or where there is no room enough behind the WC. In the model 130, beside the WC, three more lines can be connected, such as shower, washbasin, bidet or bathtub. The models offered stand out for silent running, even more improved in the Comfort version. The pump, powerful and reliable, and the grinding system, with blades in nickel plated stainless steel, make together a long lasting and basically daily maintenance-free product. Extremely easy the maintenance in case of clog or motor blocking, with the possibility to dismount the motor subassembly only operating on two screws, and with the unique discharge tap that will allow a clean, and free of problems, maintenance. In case of blockage, the motor unit can be accessed from the outside, with no need to remove the product. Extraordinary maintenance will be extremely easy, clean and without issues. The installation kit comes with easy-connect fittings adaptable to various pipe sections and including built-in non-return valves.

Available, as accessories, an acoustic alarm anti-flooding and an adaptor pipe, to adapt the GENIX to a vast majority of existing installations.

**Liquid temperature range** From 0° to +50°C.

#### Liquid pumped

Sewage water containing fecal matter as regulated by EN 12050-3.

#### Third parts certifications

VDE-GS, LGA, VDE-EMC.

**Tank capacity and delivery** approved for flush volumes of 6 and 9 liters as regulated by EN 12050-3.

**International Protection grade** IP44.

AUTOMATIC LIFTING STATIONS

## NEWS

Its use is needful whenever the wastewater coming from the WC, the shower, the washbasin or the bidet cannot be expelled by gravity. These lifting stations can be installed wherever there is the wish to add a toilet during new installations or constructions, renovations, or structural modifications.

GENIX 110 has the facility to connect one high drain utility, like a washbasin; GENIX 130 has the facility to connect up to three utilities, even with low drain as a shower, bidet or bathtub. Our models offer silent operation and reliable performance, thanks to a powerful motor which allows to work with temperatures up to 90°C. Extremely easy the maintenance in case of clog or motor blocking, with the possibility to dismount the motor subassembly only operating on two screws, and with the unique discharge tap that will allow a clean, and free of problems, maintenance.

The non-return valves are integrated in the delivery pipe, and for the 130 models in the lateral bottom inlets. Available, as accessories, an acoustic alarm anti-flooding and an adaptor pipe, to adapt the GENIX to a vast majority of existing installations.

### Liquid temperature range

From 0°C to +75 °C up to +90°C for 30 min.

### Liquid pumped

Sewage water containing fecal matter as regulated by EN 12050-3.

### Third parts certifications: LGA

**Tank capacity and delivery:** 1-90 m<sup>3</sup>/h with dynamic head up to 8 metres

**International Protection grade:** IP44.

# NOVABOX

SMALL LIFTING STATIONS FOR AUTOMATIC COLLECTING AND PUMPING SEWAGE

Automatic stations for collecting and lifting domestic waste water from bath tubs, wash basins, showers and washing machines located in basements or below the level of the sewage network. Equipped with a NOVA 300 electropump with 5 metres of power cable and plug mounted on a technopolymer plate, a 30-litre container in technopolymer and a check valve on delivery. Supplied with pump already assembled, ready to us

### Operating range

from 1 to 7,2 m<sup>3</sup>/h with head up to 6.9 metres

### Liquid temperature range

+50°C +90°C for a max. time of 3 min.

### Pumped liquid

waste water free from solids and/or fibres

**Pump motor protection level** IP 68

**Motor insulation class** F

# FEKABOX 110

AUTOMATIC PUMPING STATION

Automatic collection and lifting stations. Ideal for the collection and pumping into the sewer network of dirty and domestic drain waste water from underground locations below the level of the sewer network. FEKABOX 110 consists of a polyethylene tank with an effective capacity of 110 litres, with cover fitted with plastic seal.

**The FEKABOX range is ready for the use of only one single-phase automatic pump with float that must be ordered separately, without the need for a control panel.**

### Operating range

from 1 to 24 m<sup>3</sup>/h with head up to 9 m.

**Liquid temperature range** + 50°C.

### Pumped liquid

waste water and domestic drains.

Liquids compatible with EN12050 2.

### COMPONENTS INCLUDED

- Complete pump installation kit
- Cable gland for individual pump
- 2" F x 1 x 1/4 M connector for FEKA 600

SELECTION

\* The price refers to the tanks, pump and control panel must be ordered separately.

- Not compatible with the alarm system.

# NEW FEKABOX - FEKAFOS RANGE

example

## SELLING POINT

Certification according to European law 12050-1 to guarantee the watertight seal from odors and leaks

Light, but resistant to chemical and mechanical stress

Designed for easy installation and maintenance of the pump thanks to the lifting device

Tightening of the lid without the use of screws

The tank material is environmentally friendly, 100% recyclable

Designed with floats and a supplementary floating overflow alarm

The only one on the market that offers a complete professional solution with double pump also for domestic installations where space and cost are contained (FEKAFOS DOUBLE)

CK

## FEKABOX 200

AUTOMATIC PUMPING STATION

Tanks for domestic waste water arriving from drainage systems of various types or storm drains, for systems located below the sewer network such as garages or basements, when the sewers cannot be reached by gravity. The pump installed in the tank allows the waters to be conveyed into the sewer. The tank has numerous possibilities for connecting pipes at input, output and ventilation, allowing adequate use even in limited spaces. A grinder pump can also be installed in the tank, able to break up any foreign bodies in the waste water and project them at long distances.

**The FEKABOX is designed for use with just one automatic single-phase pump with float switch, which must be ordered separately.**

### COMPONENTS INCLUDED

- A lifting device 2" PP and anti-rotation bracket for FEKA VS
- Cable gland for single pump
- Connection 2" F x 1 x 1/4 M per FEKA 600
- Floating cable clamp kit FEKA VS

### Operating range

from 1 to 24 m<sup>3</sup>/h with a head of up to 15 mt.

**Maximum liquid temperature range** 45°C

**Pumped liquid** ground water, rain water, clear waste water, black waste water and water from rivers and lakes.

Liquids compatible with EN12050-1/2

**Installation** Inside or outside the building. Laid on the floor, under the ground or housed.

**Material** LLDPE

# FEKAFOS 280

AUTOMATIC PUMPING STATION

Tanks for domestic waste water arriving from drainage systems of various types or storm drains, for systems located below the sewer network such as garages or basements, when the sewers cannot be reached by gravity. The pump installed in the tank allows the waters to be conveyed into the sewer. The tank has numerous possibilities for connecting pipes at input, output and ventilation, allowing adequate use even in limited spaces. A grinder pump can also be installed in the tank, able to break up any foreign bodies in the waste water and project them at long distances.

**The FEKAFOS is designed for use with one non-automatic singlephase or three-phase pumps without float switch, which must be ordered separately together with the control panel.**

## COMPONENTS INCLUDED

- A lifting device DSD2" and anti-rotation bracket for FEKA VS
- 4 Cable glands for single pump and floats
- Connection 2" F x 1 x 1/4 M per FEKA 600
- Floating cable clamp kit FEKA VS
- 2 floating and floating alarm support

**Material** LLDPE

## Operating range

from 1 to 48 m<sup>3</sup>/h with a head of up to 23 mt.

**Maximum liquid temperature range** + 45°C

**Pumped liquid** ground water, rain water, clear waste water, black waste water and water from rivers and lakes. Liquids compatible with EN12050-1/2

**Installation** Inside or outside the building. Laid on the floor, under the ground or housed.

# FEKAFOS 550 DOUBLE

AUTOMATIC PUMPING STATION

Automatic collection and lifting stations, used for the collection and pumping of civil and industrial waste water into the sewer network. They consist of a high density 550 litre polyethylene tank with 2 covers that can be walked on (maximum weight 100 kg), fitted with hermetic seals that prevent gases and liquids from escaping. Supplied with 2 lifting devices (DSD2), to facilitate pump maintenance. The FEKABOX range is ready for the use of one or two single-phase non-automatic pumps, or three-phase without float, which must be ordered separately, in conjunction with the control panel.

## COMPONENTS INCLUDED

- 2 DSD2" lifting devices and rotation prevention bracket for FEKA VS
- 6 cable glands for double pump and floats
- 2 FEKA VS float cable stop kits
- 3 floats and alarm float support

## Material LLDPE

### Operating range

from 1 to 32 m<sup>3</sup>/h with head up to 23 m.

### Liquid temperature range + 45°C.

**Pumped liquid** ground water, rain water, clear waste water, grey waste water, and river or lake water. Liquids compatible with EN12050 1/2.

**Installation** Secured to the floor if inside a building. Underground if outside the building.

It cannot be driven on, but it can be walked on, maximum weight 100 kg.

# FEKAFOS MAXI 1200-3600

FK PUMP AUTOMATIC LIFTING STATION

Automatic collection and lifting station suitable for lifting clear and rain water, as well as water loaded with civil and industrial waste. It consists of a cylindrical polyethylene monobloc, and an appropriately shaped bottom for the housing of the pump and for avoiding water stagnation. The upper rectangular opening has polyethylene covers with locking system and smell prevention seals.

**1200 l to 3600 l capacity tanks available.**

**The tank may also be supplied with operation chamber with two gate valves and two non-return valves.**

**The station is ready for the use of two sewage water pumps, or non-automatic single-phase draining pumps, or three-phase pumps with delivery diameter from DN50 to DN80.**

**The pumps must be ordered separately in combination with the control panel.**

## Operating range

from 2 to 100m<sup>3</sup>/h with head up to 40m

**Pumped liquid temperature range** +50°C

## Pumped liquid

Rain water, ground water, waste water.

**Including** coupling feet for the housing of 2 pumps, inlet and outlet piping, bleeding systems, cable glands, floats, stainless steel sheets, anti-intrusion grid and cover with closing device.

## AVAILABLE ON REQUEST:

**GR:** with anti intrusion grid and inlet piping filtering grid.

**CV:** with cast iron check and gate valves.

**CV + GR:** with connection chamber for valves and filtering and anti intrusion grid.

FEKAFOS 280 DOUBLE

FEKAFOS 550 DOUBLE

Tank, pump and control panel are supplied separately and must be ordered separately.

When selecting a control panel other than E.BOX PLUS D, refer to the pump & control panel selection table in the E.BOX section on pag. 241

\* To install FEKA 2000, the FEKAFOS 550 support kit is required, code 60174813

# NOVAIR

## SUBMERGED AERATOR

The submerged aerator is designed for liquid waste aeration in small water treatment systems. Other fields of application include pond water oxygenation and fish farms. Thanks to its specific design, the new **NOVAIR** system guarantees optimal oxygenation of water treatment plants by means of a large and thick cloud of fine bubbles. The fluid dynamics study has been mainly focused on the impeller's blade profiles, with a view to avoid damaging microorganisms present in the water when starting operation. As the aerator is installed vertically, its body is supplied with a supporting base.

Technically speaking, motor cooling is guaranteed by large contact surfaces between motor casing and the liquid. The power cable is coated with resin against humidity and leaks and cabling has been made easier, in order to favour maintenance operations and cable replacement. The excellent wear resistance of the stainless steel motor shaft, with ceramic bush around the sealing rings, guarantees long product durability. Pump body, cable cover and impeller in technopolymer. Two-pole asynchronous submersible type motor from 0.18 and 0.4 kW with built-in THERMAL PROTECTION and permanently connected capacitor installed in the cable compartment. Steel motor shaft mounted on oversized, greased sealed-for-life ball bearings with ceramic bush. Triple interposed ring seal with oil pre-chamber.

**Operating range** air delivery 2 - 17 m<sup>3</sup>/h for depths from 20 – 90 cm, from the inlet axls.

**Protection level** IP68

**Insulating class** F

**Liquid temperature range** from 0 °C to 35 °C according to EN 60335-2-41 standard for domestic use

**Liquid quality requirements** sewage from septic tank fibre-less and free from solids, and clear water.

**Single-phase** monophase: 220 – 240 V/ 50 Hz

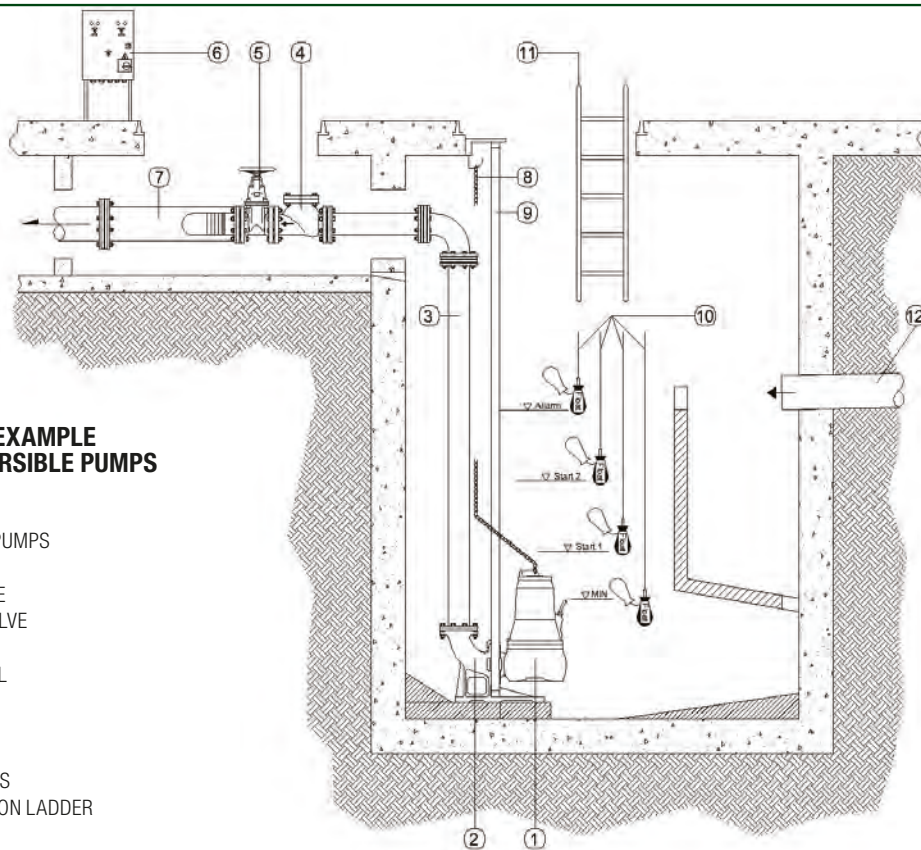

**Power cable** H07RNF8-F of 2 mt, 5mt e 10 mt and SCHUKO plug available. Supplied with gasket and 90 degrees band for vertical inlet.

## ELECTRONIC PROTECTION AND CONTROL PANEL

e.box plus D

e.box basic

**e.box plus** is an electronic control panel for the protection and automatic operation of one or two submersible pumps or pressurizing both single-phase and three-phase, installed in domestic, civil and industrial environments.

**e.box basic** is an electronic control panel for the protection and automatic operation of one or two electronic submersible pumps or single-phase pressurization for domestic applications.

### Nominal tension of power supply

**e.box plus** 1x 230 V / 3 x 230 V - 3 x 400 V (automatic selection)

**e.box basic** 1x 230 V

**Frequency** 50 - 60 Hz

### Maximum use of power

**e.box plus** 5,5 kWatt + 5,5 kWatt

**e.box basic** 2,2 kWatt + 2,2 kWatt

**Maximum use of current** 12 A + 12 A

**Starting capacitor** KIT supplied as an accessory

### Limits of use ambient temperature

-10° C + 40° C

**Limits of storage temperature** -25° C + 55° C

**Relative humidity to the air** 90% a 20° C

**Max altitude max** 1000 s.l.m.

**Degree of protection** IP 55

Reference standard for the construction of the panels EN 60335-1

## DISPLAY

Thanks to the configuration wizard, installation of display versions is much simpler. Management is also much easier, thanks to the status always being visible and to a range of additional functions, such as the anti-seizing of drainage pumps, the alarm log, the language selection, and the password protected settings.

# E.BOX

ELECTRONIC PROTECTION AND CONTROL PANEL

## EMPTYING/FILLING FUNCTION

Ideal for piloting the pumping stations of filling / emptying the drainage of rainwater or waste water in general.

- Operation with bulb floats or standard, max 5 (2/3 for operation, 2 for alarm)
- Operation with level trasducer (0-10V / 4...20mA)
- Exchange of the starting order of the pumps at every start, every 24 hours or at predefined intervals.

For pump power input voltages other than the standard 400V contact our sales distribution network.  
For pumps with power exceeding 4 kW or Y/D start see the ED panels.

exemplative photo

Supplied on the box in self-extinguishing thermoplastic material, complete with brackets for wall mounting. The framework is self-protected and protects the pump from overload, short circuits with manual reset. The models ED3M, ED3MHS, from ED2,5 to ED30T SD can handle the signal over temperature protection if the pump is provided with it.

The models ED3MHS and ED2, 4MHS are provided with additional electrolytic condenser for high startup torque.

Complete with:

- Power line switch with pad lockable door handle (except in single-phase version)
- Self-protected transformer for the power supply of the external controls
- Terminals for connecting the electric pump and the float / pressure control switches
- Terminals without potential for controlling alarm and remote installation of an audible / visual alarm
- Button on the front panel for manual operation (single phase versions)
- Switch on the front panel for manual operation - 0 - Automatic
- Amperometric protection reports
- Pump running indicator
- Voltage indicator
- Limits of use ambient temperature: - 10° C +40° C
- Degree of protection IP55

**Nominal power input voltage**

230V 1~ ± 10%

400V 3~ ± 10%

**Frequency** 50-60 Hz.**Ambient temperature operation limits**

-10 °C +40 °C.

**Storage ambient temperature limit**

-25 °C + 55 °C.

**Relative humidity (without condensation)**

50% at 40 °C MAX (90% a 20 °C).

**Protection class** IP55.**Panel construction**

to EN 60204-1 and EN 60439-1.

## ELECTROMECHANICAL PROTECTION AND CONTROL PANELS

exemplative photo

Supplied on the box in self-extinguishing thermoplastic material and in metal models E2D50TSD and E2D60TSD, complete with brackets for wall mounting.

The framework is self-protected and protects the pump from overload, short circuits with manual reset. The models E2D6M, E2D6MHS, from E2D5T to E2D60T SD can handle the signal over temperature protection if the pump is provided with it.

The models E2D6MHS IS provided with additional electrolytic condenser for high startup torque.

Complete with:

- Power line switch with pad lockable door handle (except in single-phase version)
- Self-protected transformer for the power supply of the external controls
- Exchange model for the alternation of starting pumps
- Terminals for connecting the electric pump and the float / pressure control switches
- Terminals without potential for controlling alarm and remote installation of an audible / visual alarm
- Button on the front panel for manual operation (single phase versions)
- Switch on the front panel for manual operation - 0 - Automatic
- Amperometric protection reports
- Pump running indicator
- Voltage indicator
- Limits of use ambient temperature: -10° C +40° C
- Degree of protection IP55

### Nominal power input voltage

230V 1~ ± 10%  
400V 3~ ± 10%

**Frequency** 50-60 Hz.

### Ambient temperature operation limits

## ELECTROMECHANICAL PROTECTION AND CONTROL PANELS

exemplative photo

Supplied on the box in self-extinguishing thermoplastic material and in metal model E3D22,5TSD, complete with brackets for wall mounting.

The framework is self-protected and protects the pump from overload, short circuits with manual reset. The models E3D9M, E9D6MHS, from E3D12T to E3D90T SD can handle the signal over temperature protection if the pump is provided with it.

The models E3D9MHS is provided with additional electrolytic condenser for high startup torque.

Complete with:

- Power line switch with pad lockable door handle (except in single-phase version)
- Self-protected transformer for the power supply of the external controls
- Exchange model for the alternation of starting pumps
- Terminals for connecting the electric pump and the float / pressure control switches
- Terminals without potential for controlling alarm and remote installation of an audible / visual alarm
- Button on the front panel for manual operation (single phase versions)
- Switch on the front panel for manual operation - 0 - Automatic
- Amperometric protection reports
- Pump running indicator
- Voltage indicator
- Limits of use ambient temperature:  $-10^{\circ}\text{C}$   $+40^{\circ}\text{C}$
- Degree of protection IP55

### Nominal power input voltage

230V 1~  $\pm 10\%$

400V 3~  $\pm 10\%$

**Frequency** 50-60 Hz.

### Ambient temperature operation limits

$-10^{\circ}\text{C}$  to  $+40^{\circ}\text{C}$ .

### Storage ambient temperature limit

$-25^{\circ}\text{C}$  to  $+55^{\circ}\text{C}$ .

### Relative humidity (without condensation)

50% at  $40^{\circ}\text{C}$  MAX (90% a  $20^{\circ}\text{C}$ ).

**Protection class** IP55.

### Control panel construction

According to EN 60204-1, and UNI EN 60439/-1.

## 4" PERIPHERAL SUBMERSIBLE PUMPS

SINGLE-PHASE

THREE-PHASE

Peripheral borehole pump single impeller (Idea 75 - 100), double impeller (Idea 150) for 4" wells or larger, capable of providing high heads with limited power. Suitable for water lifting and distribution applications in domestic systems, small agricultural concerns, pressurisation of pressure vessels and DIY uses.

Pump body and motor support in cast iron. Brass impeller. Impeller shaft extension and strainer in stainless steel. Submersible asynchronous two-pole motor, made entirely of stainless steel, dry design Canned-type AISI 304L stator. Squirrel cage rotor running on ball bearings, oversized to ensure reliability and durability. Graphite/alumina mechanical seal and lip seal. In the single phase version the start capacitor is enclosed in a rugged, electrically insulated high-density plastic enclosure. Overload protection to be provided by the user for the three-phase version.

**Protection rating** IP 68

**Insulation class**

**Liquid temperature range** from 0° C to +35° C

**Max. no. of starts** 20/h

**Maximum submersion** 20 m.

**Installation** in 4" or larger wells, tanks or cisterns, vertically.

**Liquid quality requirements** clean, free of solid or abrasive contaminants, non-viscous, chemically neutral, close to the properties of water.

**Removable H07RN-F power cable, length 15 m.**

**Supplied with 15 m of nylon rope.**

# DIVER - DIVER HF

5" MULTISTAGE SUBMERSIBLE PUMPS

DIVER electric pumps are utilised for lifting clear water from boreholes, first water collection tanks or cisterns, wells or water courses and are capable of distributing pressurised water to domestic installations, small agricultural plants, and sprinkler systems for lawns and gardens. The pump, which is very silent running, can be installed inside boreholes and sumps and eliminates all potential problems of suction and unpriming.

Multi-stage close-coupled borehole pump with hydraulic section below motor, which is cooled by the pumped liquid. Impellers and diffusers in fibreglass-reinforced Noryl with wear-resistant stainless steel thrust ring. Outer liner, stator sleeve, upper head with delivery connection and closing ring in AISI 304 stainless steel.

Supports in brass. Rotor shaft extension in AISI 304 stainless steel. Lip seal on motor side and silicon carbide/silicon carbide mechanical seal on pump side.

Submersible asynchronous two-pole motor made entirely of stainless steel, featuring dry design with external cooling by pumped liquid.

Canned AISI 304L stator. Squirrel cage rotor running on ball bearings, oversized to ensure low noise, reliability and durability.

**On request, CONTROL BOX for the single-phase version.**

Protection for the three-phase version is the responsibility of the user. Automatic version available with float switch.

**Protection rating** IP 68

**Insulation class** F

**Standard voltage input**

Single-phase: 230 V / 50 Hz.

Three-phase 230V / 50Hz and 400 V / 50 Hz

**Power cable** Removable H07RN-F, length 10 m.

<sup>(1)</sup>Required for single-phase versions

# PULSAR

## 5" MULTISTAGE SUBMERSIBLE PUMPS

PULSAR pumps, which are very silent running, can be installed inside boreholes and sumps and eliminates all potential problems of suction and unpriming.

Multi-stage close-coupled borehole pump with hydraulic section below motor, which is cooled by the pumped liquid. -Impellers, diffusers, strainer and oil sump in abrasion-proof thermoplastic. Outer liner, stator sleeve, upper head with delivery connection and closing ring in AISI 304 stainless steel. Rotor shaft extension in AISI 304.

Elastomers in NBR. Stainless steel screws.

Double mechanical seal with interposed oil chamber, made of ceramic/carbon on motor side and silicon carbide/silicon carbide on pump side.

Submersible with continuous duty asynchronous motor. Rotor running on ball bearings, oversized to ensure low noise and durability. Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version. To protect the three-phase motor use remote overload cut-outs in compliance with statutory regulations.

Constructed in compliance with CEI 2-3 and CEI 61-69 (EN 60335-2-41) standards.

### Operating range

from 0.9 to 7.2 m<sup>3</sup>/h with head up to 86 metres.

**Maximum permissible sand quantity** 50 g/m<sup>3</sup>

**Motor protection level** IP 68

**Insulation class** F

**Liquid temperature range** From 0° C to +40° C

**Standard cables** 20 m H07 RN F cable type.

**Cable complete with SCHUKO plug EEC 7-VII-UNEL 47166-68** for the single-phase version.

Single-phase versions can be equipped with or without float switches for automatic operation.

# PULSAR DRY

## 5" MULTISTAGE SUBMERSIBLE PUMPS

The PULSAR DRY pumps are used in lifting and pressurisation systems for water from primary collection tanks or wells and are suitable for providing pressurised water in domestic systems, small-scale farming and sprinkler systems for gardens and vegetable gardens. The pump is extremely silent and this feature makes it suitable for use with pressurisation systems in unventilated rooms or in areas prone to flooding. Single-piece multi-stage bore-hole pump or of surface with hydraulic assembly positioned under the motor which is cooled by the pumped liquid. Impellers, diffusers, filter and oil sump in abrasion-proof thermoplastic. Pump liner, stator sleeve, upper head with sleeve and sealing ring in AISI 304 steel. Upper and lower bearing supports in dezincification-proof pressed brass. Rotor shaft extension in AISI 304. Elastomers in NBR. Stainless steel hardware. Double mechanical seal separated by an oil chamber, in ceramic/carbon on the motor side and carburundum/carburundum on the pump side. The sealing system ensures the motor remains airtight and the mechanical seal holds even after brief periods of no-water operation.

Continuous service asynchronous submersible motor. Stator incorporated in an AISI 304 stainless steel airtight casing with a cover housing the cables and capacitor. Rotor mounted on oversized ball bearings to ensure silent running and long life. Incorporated thermal current protection and permanently connected capacitor in the single-phase version. As regards three-phase protection, a motor overload cut out should be fitted, in accordance with current standards. Built to IEC 2-3 and IEC 61-69 (EN 60335-2-41).

### Operating range

from 0.9 to 7.2 m<sup>3</sup>/h with a head of up to 86 m

**Max. quantity of sand in water** 50 gr/m<sup>3</sup>

**Protection level of motor** IP 68

**Protection class of motor** F

**Liquid temperature range** da 0°C a +40°C

**Maximum depth of immersion** 20 metres

**Standard cables** 15 m of H07 RN F cable complete with SCHUKO EEC 7-VII-UNEL 47166-68 plug for the single-phase version. The single-phase versions can be supplied with or without floats for automatic operation.

# DIVER 6

## MULTISTAGE SUBMERSIBLE PUMPS

Multi-stage powerful submersible pumps ideal for rain water systems, operating sprinklers, pumping water from tanks, cisterns, ponds and other applications that require high pressure. Available with 2, 3 and 4 impellers. Suitable to pump clear water. Anti-corrosive and rust-proof materials. Motor with thermic overload protection. Wear resistant shaft. Anti-debris stainless steel strainer. Excellent cooling of the motor that enables the pump to operate even when it is partially submersible. Automatic version with start/ stop float switch. Supplied with power cable with plug, non return valve and 4-step fitting.

**Operating range** from 1 to 5,4 m<sup>3</sup>/h with head up to 46 metres.

**Pumped liquid** clean, free of solids and abrasives, non-aggressive.

**Liquid temperature range** from 0 °C to +35 °C.

**Max. immersion depth** 12 metres.

**Motor protection class** IP 68.

**Motor protection rating** F.

**Installation** fixed or portable, vertical position.

**Operation** manual or automatic with float switch (continuous duty with totally submerged pump).

**Discharge port diameter** 1".

**Pump maximum diameter** 150 mm.

## ELECTRONIC MULTISTAGE SUBMERSIBLE PUMPS

DIVERTRON

DIVERTRON X

Submersible multistage pumps with built-in integrated electronics, designed to automatically start and stop the pump. Built-in electronic board, pressure switch and flow sensor. Equipped with dry-run protection. Built-in non return valve. Easy to use. High reliability. Available with 3 or 4 impellers. Supplied with 15 m power cord. Available with screen filter or stainless steel ring for use of suction kit.

**Installation recommended with auxiliary tank. (page 304)**

**Operating range** from 1 to 5,4 m<sup>3</sup>/h with head up to 46 metres.

**Pumped liquid** clean, free of solids and abrasives, non-aggressive.

**Liquid temperature range** from 0 °C to +35 °C.

**Max. immersion depth** 12 metres.

**Motor protection class** IP 68.

**Motor protection rating** F.

**Installation** fixed or portable, vertical position.

**Operation** Manual or automatic with electronic ON/OFF (continuous duty with totally submerged pump).

**Discharge port diameter** 1".

**Pump maximum diameter** 150 mm.

## HIGH SPEED 3" SUBMERSIBLE PUMPS

**NEW MODELS**

Electric borehole pumps for 3" wells or larger. These units have a very extensive range of applications for lifting and distribution in domestic and industrial water systems, filling of pressure vessels and tanks, pressure booster and irrigation system.

Multi-stage centrifugal pump type. Pump and motor connected with rigid coupling. Noryl impellers and self-lubricating polyacetyl diffusers. Pump shell, shaft, coupling, filter and cableguard in stainless steel. Base support and delivery head in brass with incorporated non-return valve.

Asynchronous submersible two-pole motor, made of stainless steel AISI304 with brass supports. Squirrel cage rotor mounted on Kingsbury thrust bearing.

Stainless steel canned stator, filled with thermosetting resin with high insulation property and better thermal dissipation capability.

MICRA HS is supplied with ACTIVE DRIVER 2.2, pre-set to drive the pump at the operation frequency of 130 Hz.

### Power supply tolerance

230 V (+10% / -20%) single-phase

**Rotation speed** 7.600 rpm (130 Hz)

**Pump voltage** 230 V three-phase

### Operating range

from 1 to 5 m<sup>3</sup>/h with head up to 150 m

**Pumped liquid** clean, free of solid or abrasive contaminants, non-viscous, non-aggressive, chemically neutral, similar to water properties  
Maximum permissible sand quantity: 50 g/m<sup>3</sup>  
Liquid temperature range: from 0°C up to +35°C  
Installation: boreholes ≥ 3" diameter and tanks in vertical position. In case of horizontal installation, ensure a minimum load applied to the thrust bearings

**Power lead cable** 1,4 m or 60 m removable cable (available also as optional single unit shielded cable 30m, 60m, 90m long)

**The package contains the pump (hydraulic part and motor) with standard cable and Active Driver.**

**D CONNECT**

## 3" SUBMERSIBLE PUMPS

**BOOSTER**

Centrifugal type. Directly coupled pump and motor with rigid coupling. Impellers and thrust rings in Noryl and diffusers in self-lubricating polyacetyl. Pump liner, shaft and coupling, strainer and cable sheath in stainless steel. Base support and head in brass with check valve incorporated in head. Submersible asynchronous two-pole motor made entirely of AISI 304 stainless steel with brass bearings. Squirrel cage rotor in copper mounted on Kingsbury thrust block. Cooling of the thrust bearing assembly and the bushings is provided by water, thereby eliminating the risk of oil contamination. **Stainless steel canned stator, filled with thermosetting resin with high insulation property and better thermal dissipation capability.**

The automatic reset thermal protection device is integral with the motor.

**Liquid quality requirements** clean, free of solid or abrasive contaminants, non-viscous, chemically neutral, close to the properties of water.

**Liquid temperature range** da 0° C a +35° C

**Maximum permissible sand quantity** 40 g/m<sup>3</sup>

**Protection rating** IP 68

**Heat insulation class** F

**Max. no. of starts** 20/h

**Power cable**

MICRA 50 - 1 m.

MICRA 75 - 1,2 m.

MICRA 100 - 1,4 m.

Ready-to-install kit available including single phase electric pump with 15m cable and double capacitor control panel.

<sup>(1)</sup>Required for single-phase versions

# CS4 - WATER FILLED MOTOR

## 4" SUBMERSIBLE PUMPS

Multistage, centrifugal, submersible motor-driven pumps for 4" wells or larger, able to generate a vast range of heads and flow rates.

They can be employed in a wide range of lifting, distributing and pressurising applications in civil and industrial water installations, supplying autoclaves and cisterns, fire fighting and washing systems, irrigation systems.

Constructional characteristics:

Base support (with built-in filter) and upper head (with built-in check valve) in technopolymer. Plastic cable cover.

Two-pole, water-filled, submersible TESLA electric motor, built entirely in AISI 304 stainless steel for the parts in contact with the water. **Stainless steel cased stator, filled with thermosetting resin with high insulation property and better thermal dissipation capability.** Capacitor and manually resettable overload protection inside the panel.

Protection for the three-phase version is the responsibility of the user. Complete with Control Box, 15 or 30 m of electric wire (depending on the models) and safety cord.

**Pumped liquid** clean, free from solid or abrasive substances, chemically neutral and close to the characteristics of water

**Liquid temp. range** from 0°C to +40°C

**Motor protection level** IP 68

**Insulation class** F

**Special versions on request**

with different voltages and/or frequencies.

**Maximum content of sand** 120 g/m<sup>3</sup>

Available on request, for the single-phase version, a dual capacitor control panel (BOOSTER) to increase starting torque.

# CS4 - OIL FILLED MOTOR

## 4" SUBMERSIBLE PUMPS

ultistage electro pump, centrifugal, submersible for 4" wells or larger, able to produce a wide range of flow rates and heads.

They can be used in a wide range of applications for lifting, pressurizing and distribution, in civil and industrial installations, autoclave and cistern inlets supply, fire fighting, washing plants and irrigation systems.

### Construction features:

**Base support (with built-in filter) and upper head (with built-in check valve) in technopolymer. Cable cover in plastic.**

TESLA two-pole electric motor, oil-filled, submersible, made entirely of AISI 304 stainless steel for the parts in contact with water.

### Rewindable stator.

The condenser and overload protection with manual reset are placed in the control panel.

User protection for three-phase version.

Includes Control Box, 15 or 30 m cable (depending on the model) and safety lanyard.

Pumped liquid: clean, free from solids or abrasive substances, chemically neutral, close to water characteristics.

**Liquid temperature range** from 0° C to +40° C.

**Degree of motor protection** IP 68.

**Insulation class** F.

**Special features on request**

with other voltages and / or frequencies.

**Maximum admitted amount of sand** 120 g/m<sup>3</sup>.

Available on request, for the single-phase version, a dual capacitor control panel (BOOSTER) to increase starting torque.

# S4 - WATER FILLED MOTOR

## 4" SUBMERSIBLE PUMPS

Multistage, centrifugal, submersible motor-driven pumps for 4" wells or larger, able to generate a vast range of heads and flow rates.

They can be employed in a wide range of lifting, distributing and pressurising applications in civil and industrial water installations, supplying autoclaves and cisterns, fire fighting and washing systems, irrigation systems.

Constructional characteristics:

Base support and upper head (with built-in check valve) in stainless steel. Stainless steel cable cover.

Two-pole, water-filled, submersible TESLA electric motor, built entirely in AISI 304 stainless steel for the parts in contact with the water.

**Stainless steel canned stator, filled with thermosetting resin with high insulation property and better thermal dissipation capability.**

Capacitor and manually resettable overload protection inside the panel.

Protection for the three-phase version is the responsibility of the user.

**Pumped liquid** clean, free from solid or abrasive substances, chemically neutral and close to the characteristics of water

**Liquid temp. range** from 0°C to +40°C

**Motor protection level** IP 68

**Insulation class** F

**Special versions on request**

with different voltages and/or frequencies.

**Maximum content of sand**

120 gr/m<sup>3</sup> (S4A, S4B, S4C, S4D)

300 gr/m<sup>3</sup> (S4E, S4F)

Available on request, for the single-phase version, a dual capacitor control panel (BOOSTER) to increase starting torque.

**SAND  
RESISTANT**

**ACCESSORIES  
PAG. 301**

# S4 - OIL FILLED MOTOR

## 4" SUBMERSIBLE PUMPS

Multistage electropump, centrifugal, submersible for 4" wells or larger, able to produce a wide range of flow rates and heads.

They can be used in a wide range of applications for lifting, pressurizing and distribution in civil and industrial installations, autoclave and cistern inlets supply, fire fighting, washing plants and irrigation systems.

Construction features:

Base support and upper head (with built-in check valve) in stainless steel. Stainless steel cable cover.

TESLA two-pole electric motor, oil-filled, submersible, made entirely of AISI 304 stainless steel for the parts in contact with water.

Rewindable stator.

The condenser and overload protection with manual reset are placed in the control panel.

User protection for three-phase version.

**Pumped liquid** clean, free from solids or abrasive substances, chemically neutral, close to water characteristics.

**Liquid temperature range** from 0 °C to +40 °C.

**Degree of motor protection** IP 68.

**Insulation class** F.

**Special features on request**

with other voltages and / or frequencies.

**Maximum admitted amount of sand**

120 gr/m<sup>3</sup> (S4A, S4B, S4C, S4D)

300 gr/m<sup>3</sup> (S4E, S4F)

Available on request, for the single-phase version, a dual capacitor control panel (BOOSTER) to increase starting torque.

**ErP**  
ready

**SAND**  
RESISTANT

**ACCESSORIES**

## 4" SUBMERSIBLE MOTORS

4" Asynchronous two-poles submersible motor, **made in AISI 304 stainless steel** for parts in contact with water. Cooling and lubrication of the thrust bearing assembly and carbon bushes is provided by a **mixture of water and glycol**. Squirrel-cage rotor mounted on Kingsbury self-centring thrust bearing.

**Stainless steel canned stator, filled with thermosetting resin with high insulation property and better thermal dissipation capability.**

Removable cable connector to allow fast and easy maintenance. The cable is certified ACS, WRAS and KTW. Motor suitable for use with variable frequency drive (30 Hz – 50 Hz). Capacitor and manually resettable overload protection located in the electric panel that can be supplied separately for the single-phase 50 Hz version. Overload protection must be provided by user for the three-phase version.

**Flanging** NEMA - 4"

**Protection level** IP 68

**Insulation class** F

**Voltage**

single-phase 220-230 V / 50 Hz

Three-phase 400 V / 50 Hz - 230 V / 50 Hz

**Equipped with cable**

1,7 m for motor power up to 2,2 kW

2,7 m for motor power up to 3 kW

3,5 m for motor power of 7,5 kW

**Available on request** cables of different lengths, different supply voltage, thermal surge protector (50 Hz - PSC – from 0.5 HP to 1.5 HP)

**tesla**

**ACCESSORIES**

## 4" SUBMERSIBLE MOTORS

4" Asynchronous two-poles submersible motor, **made in full AISI 316 stainless steel**. Cooling and lubrication of the thrust bearing assembly and carbon brushes is provided by a **mixture of water and glycol**. Squirrel-cage rotor mounted on Kingsbury self-centring thrust bearing.

**Stainless steel canned stator, filled with thermosetting resin with high insulation property and better thermal dissipation capability.**

Removable cable connector to allow fast and easy maintenance. The cable is certified ACS, WRAS and KTW. Motor suitable for use with variable frequency drive (30 Hz – 50 Hz). Mechanical seal in silicon/carbide. Capacitor and manually resettable overload protection located in the electric panel that can be supplied separately for the single-phase 50 Hz version. Overload protection must be provided by user for the three-phase version.

**Flanging** NEMA - 4"

**Protection level** IP 68

**Insulation class** F

**Voltage**

single-phase 220-230 V / 50 Hz

Three-phase 400 V / 50 Hz - 230 V / 50 Hz

**Equipped with cable**

1,7 m for motor power up to 2,2 kW

2,7 m for motor power up to 3 kW

3,5 m for motor power of 7,5 kW

**Available on request** cables of different lengths, different supply voltage, thermal surge protector (50 Hz - PSC – from 0.5 HP to 1.5 HP)

**AISI 316**

# 4TW

## 4" SUBMERSIBLE MOTORS

The 4TW is a 4-inch single-phase submersible motor, designed for pressure boosting, gardening and irrigation, drawing water from subsoil in civil and commercial applications and for using water in irrigation systems also in agriculture.

Motor with the parts in contact with water made of AISI 304 stainless steel. Encapsulated and resin-filled stator. Cooled and lubricated with a mixture of water and glycol. Combined with the pump body, it is able to increase the water pressure, draw water from wells, tanks or reservoirs and to allow it to be used also for irrigating medium and large-sized vegetable gardens. It has an integrated condenser which does away with the external control panel.

**Flanging** NEMA 4"

**Insulation class** F

**Protection class** IP68

**Cooling flow speed** min. 0,3 m/s 35 °C

**Power supply tolerance** + 6 % / -10 %

**Max. starts** 20/h

**Max operating depth** 300 m

**Possible type of installation**

Vertical or horizontal

**Horizontal operation** 0,5 HP - 1,5 HP

**On request** cables of different lengths and different power input voltages

## 40L

## 4" SUBMERSIBLE MOTORS

4" Asynchronous two-poles submersible motor, rewindable-type, made in AISI 304 stainless steel for parts in contact with water. Cooling and lubrication of the ball bearings is provided by a special FDA-approved liquid. Stator housed in an external shell in AISI 304L (rewindable-type) connected with stainless steel pins to the upper support of the motor. Removable cable connector to allow fast and easy maintenance. The cable is certified ACS, WRAS and KTW. Motor suitable for use with variable frequency drive (30 Hz – 50 Hz). Mechanical seal in ceramic-carbon. Capacitor and manually resettable overload protection located in the electric panel that can be supplied separately for the single-phase version. Overload protection must be provided by user for the three-phase version. The motor can be equipped with a PT100 temperature sensor.

**Flanging** NEMA 4".

**Insulation class** F.

**Protection class** IP68.

**Cooling flow speed** min. 0,3 m/s 35 °C.

**Power supply tolerance** + 6 % / -10 %.

**Max. starts** 20/h.

**Max operating depth** 250 m.

**Horizontal operation** 0,5 HP - 10 HP.

# SS6

## 6" SUBMERSIBLE PUMPS

Multistage **semiaxial** submersible electric pumps for wells measuring 6" or above, able to generate a broad range of flow rates. These units are used extensively for lifting, distribution, and pressurisation in civil and industrial water systems, filling of booster pumps and tanks, fire-fighting systems and washing of irrigation systems. Application with clean, non-aggressive water free from solids or abrasive substances.

### Construction features of the pump

Pump body and impellers in pressed AISI 304 stainless steel.  
Pump with check valve of low pressure loss.

### For operation with inverter see the specifications of the coupled motor.

#### On request

- **Pump body:** in pressed AISI 316 stainless steel for use in aggressive water.
- **Impellers:** in pressed AISI 316 stainless steel for use in aggressive water.

### Performance range

flow up to 75 m<sup>3</sup>/h and max head of 670 m

**Max. quantity of sand/silt** 50g/m<sup>3</sup>

**Max. ambient temperature**

30°C (50°C available on request)

**Outlet connection diameter (inside threaded)**

SS6 A / SS6 B : 2 1/2"

SS6 C : 3"

SS6 D – SS6 E : 4"

Coupling with motors of 4", 6" or 8" depending on the required hydraulic power, and available in standard or stainless steel version:

**4GG:** encapsulated 4" submersible motor.

**4OL:** 4" submersible motor in oil bath.

**6GF:** encapsulated 6" submersible motor.

**TR6:** rewindable 6" submersible motor.

**TR8:** rewindable 8" submersible motor.

# SS7

## 7" SUBMERSIBLE PUMPS

Multistage semiaxial submersible electric pumps for wells measuring 7" or above, able to generate a broad range of flow rates. These units are used extensively for lifting, distribution, and pressurisation in civil and industrial water systems, filling of booster pumps and tanks, fire-fighting systems and washing of irrigation systems.

Application with clean, non-aggressive water free from solids or abrasive substances.

**Construction features of the pump**

Pump body and impellers in pressed AISI 304 stainless steel.  
Pump with check valve of low pressure loss.

**For operation with inverter see the specifications of the coupled motor.**

**On request**

- **Pump body:** in pressed AISI 316 stainless steel for use in aggressive water
- **Impellers:** in pressed AISI 316 stainless steel for use in aggressive water

**Performance range**

flow up to 110 m<sup>3</sup>/h and max head of 423 m

**Max. quantity of sand/silt** 50g/m<sup>3</sup>

**Max. ambient temperature**

30°C (50°C available on request)

**Outlet connection diameter (inside threaded)**  
5"

Coupling with motors of 6" or 8" depending on the required hydraulic power, and available in standard or stainless steel version:

**6GF:** encapsulated 6" submersible motor.

**TR6:** rewindable 6" submersible motor.

**TR8:** rewindable 8" submersible motor.

**ACCESSORIES**  
**PAG. 301**

## 8" SUBMERSIBLE PUMPS

Multistage **semiaxial** submersible electric pumps for wells measuring 8" or above, able to generate a broad range of flow rates. These units are used extensively for lifting, distribution, and pressurisation in civil and industrial water systems, filling of booster pumps and tanks, fire-fighting systems and washing of irrigation systems.

Application with clean, non-aggressive water free from solids or abrasive substances.

### Construction features of the pump

Pump body and impellers in pressed AISI 304 stainless steel.  
Pump with check valve of low pressure loss.

### For operation with inverter see the specifications of the coupled motor.

#### On request

- **Pump body:** in pressed AISI 316 stainless steel for use in aggressive water
- **Impellers:** in pressed AISI 316 stainless steel for use in aggressive water

### Performance range

flow up to 210 m<sup>3</sup>/h and max head of 555 m

**Max. quantity of sand/silt** 50g/m<sup>3</sup>

### Max. ambient temperature

30°C (50°C available on request)

**Outlet connection diameter (inside threaded)**  
6"

Coupling with motors of 6", 8" or 10" depending on the required hydraulic power, and available in standard or stainless steel version:  
**6GF:** encapsulated 6" submersible motor.  
**TR6:** rewindable 6" submersible motor.  
**TR8:** rewindable 8" submersible motor.  
**TR10:** rewindable 10" submersible motor.

## 10" SUBMERSIBLE PUMPS

Multistage **semiaxial** submersible electric pumps for wells measuring 10" or above, able to generate a broad range of flow rates. These units are used extensively for lifting, distribution, and pressurisation in civil and industrial water systems, filling of booster pumps and tanks, fire-fighting systems and washing of irrigation systems.

Application with clean, non-aggressive water free from solids or abrasive substances.

### Construction features of the pump

Pump body and impellers in pressed AISI 304 stainless steel.  
Pump with check valve of low pressure loss.

### For operation with inverter see the specifications of the coupled motor.

#### On request

- **Pump body:** in pressed AISI 316 stainless steel for use in aggressive water.
- **Impellers:** in pressed AISI 316 stainless steel for use in aggressive water

### Performance range

flow up to 290 m<sup>3</sup>/h and max head of 385 m

**Max. quantity of sand/silt** 50g/m<sup>3</sup>

**Max. ambient temperature**

30°C (50°C available on request)

**Outlet connection diameter (inside threaded)**

6"

Coupling with motors of 6", 8" or 10" depending on the required hydraulic power, and available in standard version or a version completely in stainless steel.

**6GF:** encapsulated 6" submersible motor.

**TR6:** rewindable 6" submersible motor.

**TR8:** rewindable 8" submersible motor.

**TR10:** rewindable 10" submersible motor.

## 6" SUBMERSIBLE PUMPS

Multistage semiaxial submersible electric pumps for wells measuring 6" or above, able to generate a broad range of flow rates and heads. They are used extensively for the lifting, distribution and pressurisation of industrial water systems, the supply of booster pumps and tanks, firefighting systems and irrigation systems. Application with clean, non-aggressive water free from solids or abrasive substances.

### Construction features of the pump

Cast iron pump body treated with cathaphoresis paint coating and dynamically balanced impellers in microcast AISI 304 stainless steel coupled on the shaft with pull tab. Shaft guided with coaxial bush bearings and fully protected with bushes.

Pump with check valve of low pressure loss. Threaded delivery port.

Refer to the technical data sheets of the specific model for the electrical characteristics of the coupled motors and the specifications for operation with inverter.

The SMN version completely in AISI 316 stainless steel is available on request.

### Operating range

up to 84 m<sup>3</sup>/h with head up to 452 m.

**Pumped liquid** clean, free of solids and abrasives, chemically neutral, with properties similar to water.

**Starts/hour** see the coupled motor

**Cooling flow** see the coupled motor

### Maximum permitted amount of sand

40 g/m<sup>3</sup>

**Ambient temperature** 30 °C

### Minimum recommended level on suction

line 1 m

**Installation** horizontal or vertical

Coupling with motors of 4", 6" or 8" depending on the required hydraulic power, and available in standard version or a version completely in stainless steel.

**4GG:** encapsulated 4" submersible motor.

**40L:** 4" submersible motor in oil bath.

**6GF:** encapsulated 6" submersible motor.

**TR6:** rewindable 6" submersible motor.

**TR8:** rewindable 8" submersible motor.

8" SUBMERSIBLE PUMPS

Multistage semiaxial submersible electric pumps for wells measuring 8" or above, able to generate a broad range of flow rates and heads. They are used extensively for the lifting, distribution and pressurisation of industrial water systems, the supply of booster pumps and tanks, firefighting systems and irrigation systems. Application with clean, non-aggressive water free from solids or abrasive substances.

### Construction features of the pump

Cast iron pump body treated with cathaphoresis paint coating and dynamically balanced impellers in microcast AISI 304 stainless steel coupled on the shaft with pull tab. Shaft guided with coaxial bush bearings and fully protected with bushes.

Pump with check valve of low pressure loss. Threaded delivery port.

Refer to the technical data sheets of the specific model for the electrical characteristics of the submersible motors and the specifications for operation with inverter.

The SMN version completely in AISI 316 stainless steel is available on request.

### Operating range

up to 192 m<sup>3</sup>/h with head up to 488 m.

**Pumped liquid** clean, free of solids and abrasives, chemically neutral, with properties similar to water.

**Start-ups/hour** see the coupled motor

**Cooling flow** see the coupled motor

### Maximum permitted amount of sand

40 g/m<sup>3</sup>

**Ambient temperature** 30 °C

**Minimum recommended level on suction line** 1,5 m.

**Installation** horizontal or vertical

Coupling with motors of 6" or 8" depending on the required hydraulic power, and available in standard version or a version completely in stainless steel.

**6GF:** encapsulated 6" submersible motor.

**TR6:** rewindable 6" submersible motor.

**TR8:** rewindable 8" submersible motor.

10" SUBMERSIBLE PUMPS

Multistage semiaxial submersible electric pumps for wells measuring 10" or above, able to generate a broad range of flow rates and heads. They are used extensively for the lifting, distribution and pressurisation of industrial water systems, the supply of booster pumps and tanks, firefighting systems and irrigation systems. Application with clean, non-aggressive water free from solids or abrasive substances.

### Construction features of the pump

Cast iron pump body treated with cathaphoresis paint coating and dynamically balanced impellers in microcast AISI 304 stainless steel coupled on the shaft with pull tab. Shaft guided with coaxial bush bearings and fully protected with bushes.

Pump with check valve of low pressure loss. Flanged delivery port and kit containing counter flange, bolts and gaskets.

Refer to the technical data sheets of the specific model for the electrical characteristics of the submersible motors and the specifications for operation with inverter.

The SMN version completely in AISI 316 stainless steel is available on request.

### Operating range

up to 400 m<sup>3</sup>/h with head up to 453 m.

**Pumped liquid** clean, free of solids and abrasives, chemically neutral, with properties similar to water.

**Start-ups/hour** see the coupled motor

**Cooling flow** see the coupled motor

**Maximum permitted amount of sand** 40 g/m<sup>3</sup>

**Ambient temperature** 30 °C

**Minimum recommended level on suction line** 2 m

**Installation** horizontal or vertical

Coupling with motors of 6", 8" or 10" depending on the required hydraulic power, and available in standard version or a version completely in stainless steel.

**6GF:** encapsulated 6" submersible motor.

**TR6:** rewindable 6" submersible motor.

**TR8:** rewindable 8" submersible motor.

**TR10:** rewindable 10" submersible motor.

12" SUBMERSIBLE PUMPS

Multistage semiaxial submersible electric pumps for wells measuring 12" or above, able to generate a broad range of flow rates and heads. They are used extensively for the lifting, distribution and pressurisation of industrial water systems, the supply of booster pumps and tanks, firefighting systems and irrigation systems. Application with clean, non-aggressive water free from solids or abrasive substances.

### Construction features of the pump

Cast iron pump body treated with cataphoresis paint coating and dynamically balanced impellers in microcast AISI 304 stainless steel coupled on the shaft with pull tab. Shaft guided with coaxial bush bearings and fully protected with bushes.

Pump with check valve of low pressure loss. Flanged delivery port and kit containing counter flange, bolts and gaskets.

Refer to the technical data sheets of the specific model for the electrical characteristics of the submersible motors and the specifications for operation with inverter.

The SMN version completely in AISI 316 stainless steel is available on request.

### Operating range

up to 540 m<sup>3</sup>/h with head up to 320 m.

**Pumped liquid** clean, free of solids and abrasives, chemically neutral, with properties similar to water.

**Start-ups/hour** see the coupled motor

**Cooling flow** see the coupled motor

**Maximum permitted amount of sand** 40 g/m<sup>3</sup>

**Ambient temperature** 30 °C

**Minimum recommended level on suction line** 2.5 m

**Installation** horizontal or vertical

Coupling with motors of 8", 10" or 12" depending on the required hydraulic power, and available in standard version or a version completely in stainless steel.

**TR8:** rewindable 8" submersible motor.

**TR10:** rewindable 10" submersible motor.

**TR12:** rewindable 12" submersible motor.

# 6GF / 6GX

6" SUBMERSIBLE MOTORS

6-inch submersible motors designed for pressure boosting, gardening and irrigation, drawing water from subsoil in civil and commercial applications and for using water in irrigation systems also in agriculture.

### 6GX model:

- made of AISI 316 stainless steel.
- with SiC/SiC mechanical seal.

### GF model:

- made of AISI 304 and cast iron protected with an electrophoretic paint coating for the part submerged in water. Encapsulated and resin-filled stator. Cooled and lubricated with a mixture of water and glycol. Combined with the pump body, it is able to draw water from wells of at least 6" (or tanks and cisterns). Single-phase versions to be combined with an external panel that integrates the capacitor and the manually resettable overload protection. Different versions are available with the addition, during installation, of the PT100 or PTC temperature sensor which can also come with star-delta start-up.

**Flanging** NEMA 6".

**Insulation class** F.

**Protection class** IP68.

**Cooling flow speed** min. 0,3 m/s 35 °C.

**Power supply tolerance** + 6 % / - 10 %.

**Max. starts** 25/h.

**Max operating depth** 300 m.

**Horizontal operation** 5,5 HP - 50 HP.

**On request** cables of a different length, different power input voltages, single-phase version (up to 15 HP).

# TR6

6" SUBMERSIBLE MOTORS

6" Asynchronous two-poles submersible motor, **rewindable type**, made in AISI 304 stainless steel and cast iron with paint coating (standard version). Cooling and lubrication of the thrust bearing assembly and carbon bushes is provided by a mixture of water and glycol. Squirrel-cage rotor mounted on Mitchell self-centring thrust bearing. The motor is available also in full stainless steel AISI 316 version and on demand AISI 904 version. Mechanical seal in ceramic/ carbon for the standard version, in silicon/carbide for the AISI 316 stainless steel version. On request it's available also a version suitable for use with variable frequency drive (30 Hz –60 Hz). The motor is equipped with 5 meters one-core round cable three-core flat cable directly connected with the windings and a ground cable, and it's available with DOL or STAR-DELTA starting type. The cable is certified ACS and WRAS. Overload protection must be provided by user. On request PT100 and PTC temperature sensors are available.

Standard version with PVC windings.

**AVAILABLE ON REQUEST A PE2 + PA WINDING VERSION FOR INVERTER APPLICATION.**

**Flanging** NEMA 6".

**Protection class** IP68.

**Cooling flow speed** 0,5 m/s.

**Power supply tolerance** + 6 % / -10 %.

**Max. starts** 15/h.

**Max operating depth** 300 m.

**Maximum operating pressure** 60 bar.

**Horizontal operation** 7,5 HP - 50 HP.

## 8" SUBMERSIBLE MOTORS

8" Asynchronous two-poles or four-poles submersible motor, rewindable type, with external shell made in AISI 316 stainless steel and supports in cast iron with paint coating (standard version). Cooling and lubrication of the thrust bearing assembly and carbon bushes is provided by a mixture of water and glycol. Squirrel-cage rotor mounted on Mitchell self-centring thrust bearing. The motor is available also in full stainless steel AISI 316 version and on demand AISI 904 version. Mechanical seal in silicon/carbide. On request it's available also a version suitable for use with variable frequency drive.

The motor is equipped with 5 meters one-core round cable three-core flat cable directly connected with the windings and it's available with DOL or STAR-DELTA starting type. The cable is certified ACS and WRAS. Overload protection must be provided by user. On request PT100 and PTC temperature sensors.

Standard version with PVC windings.  
AVAILABLE ON REQUEST A PE2 + PA WINDING VERSION FOR INVERTER APPLICATION.

**Flanging** NEMA 8".

**Protection class** IP58 (IP68 on request).

**Cooling flow speed** 0,5 m/s.

**Power supply tolerance** + 6 % / -10 %.

**Max. starts** 10/h.

**Max operating depth** 300 m.

**Maximum operating pressure** 60 bar.

**Horizontal operation** 30 HP - 125 HP.

10" SUBMERSIBLE MOTORS

10" Asynchronous two-poles or four-poles submersible motor, **rewindable type**, with external shell made in AISI 316 stainless steel and supports in cast iron with paint coating (standard version). Cooling and lubrication of the thrust bearing assembly and carbon bushes is provided by a mixture of water and glycol. Squirrel-cage rotor mounted on Mitchell self-centring thrust bearing. The motor is available also in full stainless steel AISI 316 version and on demand AISI 904 version. Mechanical seal in silicon/carbide. On request it's available also a version suitable for use with variable frequency drive. The motor is equipped with 8 meters single-core flat cables directly connected with the windings and it's available with DOL or STAR-DELTA starting type. The cables are certified ACS and WRAS. Overload protection must be provided by user. On request PT100 and PTC temperature sensors are available.

Standard version with PVC windings (except TR10 230 and TR10 260 standard, version PE2 + PA)

**AVAILABLE ON REQUEST A PE2 + PA WINDING VERSION FOR INVERTER APPLICATION.**

**Flanging** 10".

**Protection class** IP58 (IP68 on request).

**Cooling flow speed** 0,5 m/s.

**Power supply tolerance** + 6 % / - 10 %.

**Max. starts** 8/h.

**Max operating depth** 300 m.

**Maximum operating pressure** 60 bar.

**Horizontal operation** 100 HP - 230 HP.

## SUBMERSIBLE PUMPS AND SUBMERSIBLE MOTORS

For a correct junction, use a cable with a section greater or equal to the motor cable section.  
Size properly the section of the cable that has to be spliced, accordingly to the required length of the cable.

### ESC PLUS

Panel for protection and control of motor/single-phase/three-phase pump with direct start up.  
 Double set-up mode: automatic/manual  
 The motor/pump protection against dry running is assured by the major of the motor cos  $\phi$ ,  
 (level probes not required)  
 Casing made of shock-proof and self-extinguishing thermoplastic material with two antipull  
 plugs.  
 Main switch.  
 Power supply: Single-phase 230 V +/- 5%, Three-phase 400 V +/- 5%.  
 Digital display with status indications.  
 Four models available for powers from 0.5 HP to 15 HP.

Protection degree IP54. Starting  
 Capacitor for single phase version (to be order separately).  
 Optoisolated auxiliary contact for control by probes, pressure switch and float switch.  
 ON-OFF switch.  
 Functional features:  
 Overload protection.  
 Phase failure protection (threephase version).  
 Overvoltage protection.  
 Short circuit protection.  
 Protection against dry running.

### 4" CONTROL BOOSTER BOX

4" Control Booster Box

Control panel for increasing the starting torque of the single-phase electric pumps with capacities ranging from 0.37 to 3.7 kW single-phase containing the microdisgiuntore for overload protection with manual reset, the starting condenser and run condenser and terminal block for electrical connections.

Plug not included.

Degree of protection: IP 54

Ambient operating temperature: -10 °C + 40 °C

Wall mounting box in self-extinguishing thermoplastic material.

## SUBMERSIBLE PUMPS AND SUBMERSIBLE MOTORS

### ES 1 M - ES 3 M

Electric control unit for protecting single-phase electric borehole pumps from running without water (see table). The panel is protected and protects the electric pump from overloading and short circuits with a manually resettable device.  
Can work with 1, 2 or 3 probes depending on the use to which it is put.

Protection level: IP55.  
Temperature application range: from  $-10^{\circ}\text{C}$  to  $+40^{\circ}\text{C}$ .  
Supplied standard with an electric probe and wall bracket.  
Cabinet for wall mounting in flame-proof, thermoplastic material.

### ES 0,75 T - 1 T - 1,5 T - 3 T - 4 T - 7,5 T

Electric control unit for protecting three-phase electric borehole pumps from running without water (see table). The panel is protected and protects the electric pump from overloading and short circuits with a manually resettable device.  
Can work with 1, 2 or 3 probes depending on the use to which it is put.

Protection level: IP55. Temperature application range:  
from  $-10^{\circ}\text{C}$  to  $+40^{\circ}\text{C}$ .  
Supplied standard with an electric probe and wall bracket.  
Cabinet for wall mounting in flame-proof, thermoplastic material.

## SUBMERSIBLE PUMPS AND SUBMERSIBLE MOTORS

### COMMAND AND CONTROL SYSTEM - ES

Electrical panels for protection and automatic control using float/s for bore-hole three phase electric pumps, installed singularly.

Available for direct and star-delta starting.

Cabinet for wall mounting in flame-proof, thermoplastic material.

The panel is self-protected and protects the electric pump from overloading and short circuits, power failure with a manually resettable device.

Supplied complete with:

- power line switch with pad lockable door handle;
- self-protected transformer for 24V powering of external commands;

- terminals for connecting electric pump/s and min. and max. control float/s;
- Probes module for the running without water control;
- terminals for connecting a remote acoustic or luminous alarm (without potential);
- switch on the front of the panel for man - 0 - out operation of the electric pump
- Operating temperature range: -10°C +40°C
- Level of protection: IP55
- The panels are built to EN 60204-1 and EN 60439-1
- Supplied with standard electric probe.

## 2 E.SYBOX WITH E.SYTWIN

ELECTRONIC PRESSURIZATION SET

E.SYBOX + E.SYTWIN is the electronic water pressurization set for domestic and residential environments.

The installation of 2 E.SYBOX + E.SYTWIN does not require any additional components. It consists of two multistage self-priming pumps with inverter electronics, pressure and flow sensors, adjustable high resolution LCD display, and 2 litre built-in expansion vessel for each pump.

The water cooled motor, the sound-proofing ABS protection guards, the anti-vibration feet and the electronics, make this a completely silent (45 dB) and compact product.

The wireless device facilitates the creation of pressurisation sets and the connection to other DAB devices.

**The kit consists of two E.SYBOX and one E.SYTWIN. The components are supplied disassembled.**

**Protection class** IP X4

**Insulation class** F

**Pumped Liquid** clean, free of solids and abrasives, non-viscous, non-aggressive, non-crystallised and chemically neutral.

**Maximum temperature of liquid** 40 °C

**Maximum ambient temperature** 50 °C

**Maximum suction capacity** self-priming to 8 metres.

**Maximum operating pressure** 8 bar (800 kPa).

**D+CONNECT** PAG. 5

# 1/2/3 KVC AD

VARIABLE SPEED PRESSURISATION UNITS WITH ACTIVE DRIVER PLUS

1-2-3 KVC A.D. are **variable speed** pressurisation units with 1, 2 or 3 vertical axis multistage centrifugal pumps particularly suited for domestic use, and small civil or industrial systems. Thanks to the use of the Active Driver Plus inverter, they offer performance features capable of automatically adapting to the different needs of the systems to meet the **constant pressure** requirements of modern system engineering solutions. The constant pressure adjustment is a requirement in the most varied sectors: Water pipelines, Irrigation, Industry, Hotel, Residential building, Spas. **Their main features are reliability, simple operation, and minimum maintenance requirements.**

Construction features – main components:

- 1 to 3 KVC vertical axis multistage electric pumps (up to 4 pumps on request)
- Galvanized sheet steel base, complete with 4 anti-vibration rubber feet
- Suction and delivery manifolds in stainless steel
- 1 to 3 Active Driver Plus inverters on the delivery port of each pump
- 1 8-litre expansion vessel for each unit (for version 85/120 of 18 litres)
- 1 protection unit for units with 2 and 3 pumps

**Operating range** from 0.5 to 36 m<sup>3</sup>/h

**Pumped liquid** clean, free of solids and abrasives, non-viscous, non-aggressive, non-crystallised and chemically neutral, with properties similar to water.

**Liquid temperature range** from 0 °C to +40 °C

**Maximum ambient temperature** +40°C

**Maximum operating pressure** PN12 (12 bar)

**Protection class** IP44

**Special executions on request** up to 4 pumps and voltages and frequencies not on the price list available on request

**Up to 4 pumps on request**

**All the domestic units with Active Driver Plus have 1 8-litre expansion vessel and suction manifolds in AISI 304 stainless steel.**

<sup>(1)</sup> Available on request 3x400 V Three-phase version without neutral wire

The unit is supplied assembled and tested in a sturdy cardboard packaging on wooden pallet and with instruction leaflet with electric diagram.

# 2 JET AD / 2 EURO AD / 2 EUROINOX AD

VARIABLE SPEED PRESSURISATION UNITS WITH ACTIVE DRIVER PLUS

2JET A.D. – 2EURO A.D. – 2EUROINOX A.D. are **variable speed** pressurisation units with 2 horizontal axis centrifugal pumps particularly suited for domestic use, and small civil or industrial systems. Thanks to the use of the Active Driver Plus inverter, they offer performance features capable of automatically adapting to the different needs of the systems to meet the constant pressure requirements of modern system engineering solutions. The **constant pressure** adjustment is a requirement in the most varied sectors:

Water pipelines, Irrigation, Industry, Hotel, Residential building, Spas. **Their main features are reliability, simple operation, and minimum maintenance requirements.**

Construction features – main components:

- **2 JET A.D.** has 2 JET self-priming horizontal axis pumps with cast iron pump body
- **2 EURO A.D.** has 2 EURO self-priming horizontal axis pumps with cast iron pump body
- **2 EUROINOX A.D.** has 2 EUROINOX self-priming horizontal axis multistage pumps with stainless steel pump body
- Tropicalized sheet steel base, complete with 4 anti-vibration rubber feet
- Suction and delivery manifolds in galvanized steel (in stainless steel for 2EUROINOX A.D.)
- 2 Active Driver Plus inverters on the delivery port of each pump
- 1 8-litre expansion vessel for each unit
- 1 protection control unit

**Operating range** from 0.4 to 15 m<sup>3</sup>/h

**Pumped liquid** clean, free of solids and abrasives, non-viscous, non-aggressive, non-crystallised and chemically neutral, with properties similar to water.

**Liquid temperature range** from 0 °C to +40 °C

**Maximum ambient temperature** +40°C

**Maximum operating pressure** PN10 (10 bar)

**Protection class** IP44

**Special executions on request**

voltages and/or frequencies not on the price list

**Including 1 8-litre expansion vessel**

**D CONNECT**

# 1-2-3 KVE ADAC

VARIABLE SPEED PRESSURISATION UNITS WITH ADAC

1-2-3 KVE ADAC are variable speed pressurisation units with 1, 2 or 3 vertical axis multistage centrifugal pumps particularly suited for domestic use, and small civil, agricultural, or industrial systems for **applications with hot water up to 90°C**. The use of vertical axis multistage centrifugal electric pumps ensures high performance results. Their main features are limited space requirements, sturdiness and absolute reliability. Thanks to the use of the ADAC inverter, they offer performance features capable of automatically adapting to the different needs of the systems to meet the constant pressure requirements of modern system engineering solutions.

Construction features – main components:

- 1 to 3 KV vertical axis multistage electric pumps
- Galvanized sheet steel base, complete with 4 anti-vibration rubber feet
- Suction and delivery manifolds in galvanized steel with caps
- Delivery and suction on-off ball valves
- Check valves on the suction ports of each pump
- 1 8-litre expansion vessel for each unit
- 1 protection control unit
- 1 to 3 ADAC inverters on the pump

**Operating range** from 0.5 to 42 m<sup>3</sup>/h

**Pumped liquid** clean, free of solids and abrasives, non-viscous, non-aggressive, non-crystallised and chemically neutral, with properties similar to water.

**Liquid temperature range** from 0 °C to +90 °C

**Maximum ambient temperature** +40°C

**Maximum operating pressure** PN16 (16 bar)

**Protection class** IP44

**Special executions on request**

voltages and/or frequencies not on the price list

**Including 1 8-litre expansion vessel**

**D CONNECT**

# 1/2/3/4 NKVE 10 - 15 - 20 - 32 - 45 MCE/P

VARIABLE SPEED PRESSURISATION UNITS WITH MCE

## NEW MODELS

DAB's new NKVE units with pumps are variable speed pressurisation units for the recirculation of water for pressurisation in civil and commercial environments and irrigation systems also for agriculture. The NKVE units have 1, 2, 3 or 4 NKV multi-impeller pumps with MCE-P inverter installed as standard.

For all the models with NKV 10, 15, 20 S, the parts in contact with the liquid are made of AISI 304 stainless steel. The models with NKV 32, 45 have the pump body and upper flange in cathophoretic paint coated cast iron, and the impellers, diffusers and pump liner in AISI 304 stainless steel.

The MCE-P inverter installed on the pump permits constant pressure. There is a protection controller for each unit. Delivery check valve, pressure transmitter and expansion vessel for each pump. Suction and delivery manifolds in AISI 304 stainless steel.

Version X on request with materials in contact with the water made in AISI 316 stainless steel.

The units are provided already assembled, set up and tested directly at the factory, and with the installation and maintenance instructions and test report.

Pumps coupled by rigid coupling to IE3 high energy efficiency electric motors

**Operating range** from 0.5 a 280 m<sup>3</sup>/h with head of up to 140 metres

**Pumped liquid** Clean, free of solids and abrasives, non-viscous, non-aggressive, non-crystallised and chemically neutral

**Liquid temperature range** from 0°C to +120°C (80°C with expansion vessel installed)

**Maximum ambient temperature** +50°C

**Maximum operating pressure** 16 bar / 1600 kPa

**Protection class** IP55

**Special executions on request** Yes, different voltages or frequencies or support for certain liquids, units with up to six pumps, **version X with material in contact with water in AISI 316**

**The units are provided already assembled, set up and tested directly at the factory, and with the installation and maintenance instructions and test report.**

**The units comprise 1 x 18-litre expansion vessel for each pump and delivery and suction manifolds in AISI 304 stainless steel**

IE3 ≥ 0,75 kW

# 2 JET

## SETS WITH 2 SELF-PRIMING PUMPS

DAB's 2 Jet is a pressure set with 2 x Jet self-priming pumps and E.Box Plus electric panel (with display) installed as standard, designed for pressurisation and collection from the subsoil in domestic, residential, civil and commercial applications.

The Jet self-priming pumps can draw water from wells (up to 8 metres deep) even in the presence of air or sandy impurities.

The E.Box Plus panel can switch operation of the pumps at each start-up and provides dry run protection when combined with a float or pressure switch. Air supply connector included. Each Jet pump has an expansion vessel. The units are provided already assembled, set up and tested directly at the factory, and with the installation and maintenance instructions and test report.

**Operating range** from 1 to 14.4 m<sup>3</sup>/h, with head up to 62 m

**Pumped liquid** Clean, free of solids and abrasive substances, non-viscous, non-aggressive, non-crystallised and chemically neutral

**Liquid temperature range**  
From +0 °C to +40 °C

**Maximum ambient temperature** +40°C

**Maximum operating pressure** 10 bar /1000 kPa

**Special executions on request**

Yes, different voltages or frequencies

**Protection class** IP 44 (IP55 at the terminal board)

Including 2 18-litre expansion vessels

IE3 ≥ 0,75 kW

**D CONNECT** PAG. 5

The set is supplied assembled, tested, in a strong carton on a wooden pallet complete with instruction leaflet and wiring diagram.  
Available on request the 3x230 V version.

# 2 EURO / 2 EUROINOX

SETS WITH 2 HORIZONTAL MULTISTAGE EURO

DAB's 2 Euro and 2 Euroinox are pressurisation units with horizontal multi-impeller pumps for domestic, residential, civil and commercial applications.

2 Euro has the pump body in cast iron, 2 Euroinox is self-priming with pump body in stainless steel.

The units consist of two pumps, two expansion vessels and an E.Box panel with display (E.Box Plus) that can switch operation of the pumps at each start-up and provide dry run protection when combined with a float or pressure switch.

Air supply connector included. Each pump has an expansion vessel. The units are provided already assembled, set up and tested directly at the factory, and with the installation and maintenance instructions and test report.

**Operating range** from 1 to 14,5 m<sup>3</sup>/h with head up to 72 m

**Pumped liquid** Clean, free of solids and abrasive substances, non-viscous, non-aggressive, non-crystallised and chemically neutral

**Liquid temperature range**  
From +0 °C to +40 °C

**Maximum ambient temperature** +40°C  
Maximum operating pressure 10 bar / 1000 kPa

**Special executions on request** Yes, different voltages or frequencies

**Protection class** IP 44 (IP55 at the terminal board)

Including 2 18-litre expansion vessels

Available on request the 3x230 V version.

# 2 KI

## PRESSURE SETS WITH 2 AISI 304 STAINLESS STEEL 2KI SINGLE IMPELLER CENTRIFUGAL PUMPS

### NEWS

The pressurisation units are particularly suited for thermal waters, industrial washing and civil and industrial pressurisation (cold and hot liquids, and coolants), and for applications with hot water up to 90°C. They use 2 AISI 304 stainless steel KI single-stage centrifugal pumps that guarantee excellent corrosion resistant (special mechanical seals for aggressive liquids are available on request). The main features of the 2KI units are reliability, simple operation, and minimum maintenance requirements.

#### CONSTRUCTION FEATURES:

##### HYDRAULIC SECTION

- 2 AISI 304 stainless steel KI centrifugal electric pumps;
- Base, complete with 4 anti-vibration rubber feet;
- Threaded suction and delivery manifolds in AISI 304 stainless steel;
- 1 18-litre expansion vessel;
- Ball valves with unions on the suction and delivery ports of each pump;
- Check valve on the suction port of each pump;
- 2 AISI 304 stainless steel plug for closing the manifolds;
- 1 pressure transmitter on the delivery manifold (pressure detection).

##### ELECTRICAL SECTION

IP 55 protection class self-extinguishing, shock-resistant plastic E.Box electric control panel with display on the delivery manifold of the unit. The control panel protects the electric pumps and controls the sequence, keeping the system at a pressure value already preset. The average pressure value can be changed at the panel front display. The pump starting order is switched at each operating cycle.

#### Operating range

from 0.5 to 22 m<sup>3</sup>/h with head up to 40 m

**Pumped liquid** clean, free of solids and abrasives, non-viscous, non-crystallised and chemically neutral, with properties similar to water.

#### Liquid temperature range

from -10 °C to +90 °C

**Maximum ambient temperature** +40°C

**Maximum operating pressure** PN 8 (8 bar)

**Protection class** IP55

#### Special executions on request

- Special voltages (Three-phase 230-415V / 50Hz)
- Special manifolds in AISI 316 stainless steel
- Special mechanical seals (Ceramic/Carbon/FKM-Viton - SiC/SiC/FKM-Viton)

The 2KI sets comprise 1 18-litre expansion vessel for each pump and delivery and suction manifolds in AISI 304 stainless steel

# 2 K

## SETS WITH CENTRIFUGAL PUMPS TWIN IMPELLER

DAB's 2 K is a pressurisation unit comprising two K double impeller pumps, two expansion vessels and an E.Box panel with display installed as standard.

Units designed for pressurisation in civil and commercial environments and irrigation systems also for agriculture.

The 2 K unit is ideal for increasing the pressure of water and for irrigation systems also for agriculture. The E.Box Plus panel (with display) can, among other functions, switch operation of the pumps at each start-up and provide dry run protection when combined with a float or pressure switch. Air supply connector included.

The units are provided already assembled, set up and tested directly at the factory, and with the installation and maintenance instructions and test report.

**Operating range** from 1 to 19 m<sup>3</sup>/h with head up to 85 m

**Pumped liquid** Clean, free of solids and abrasive substances, non-viscous, non-aggressive, non-crystallised and chemically neutral

**Liquid temperature range** from -10 °C to +70 °C

**Maximum ambient temperature** +40°C

**Maximum operating pressure** 10 bar / 1000 kPa

**Special executions on request**

Yes, different voltages or frequencies on request in the place of the pressure sensor

**Protection class** IP 44 (IP55 at the terminal board)

Including 2 18-litre expansion vessels

IE3 ≥ 0,75 kW

**D+CONNECT** PAG. 5

The set is supplied assembled, tested, in a strong carton on a wooden pallet complete with instruction leaflet and wiring diagram.

# AQUATWIN TOP

## PRESSURIZATION GROUP FOR RAINWATER RECOVERY SYSTEM

Pressurization group for systems management and reuse of rainwater with 2 centrifugal pumps type EUROINOX or JETINOX. Complete with water reserve tank up to 150L implemented in the system. For medium to large systems.

### CONTROL PANEL

Automatic inverter for exchanging the order of pump starting at each start. General breaker switch. PLC for the management and monitoring of reserve water supplies. Low voltage auxiliary circuit complete with transformer, protection fuses and a three-way electric valves for switching rainwater tanks - public water network.

AQUATWIN comes with a black, cataforizzato steel structure, tank capacity up to 150L public network water accumulation, stainless steel storage delivery manifold with shut-off valve, expansion tank up to 8L. Including "Air gap", connection system to public water network according to UNI EN 1717: Protection against pollution of potable water in water installations and requirements of devices to prevent pollution from backflow.

**Line voltage** 230 V single phase.

**Voltage of electric pump** 230 V single phase.

**Power frequency** 50 Hz.

**Installation** vertical only.

**Pumped liquid temperature range** from 0 °C to +40 °C.

**Maximum ambient temperature** 40 °C.

**Max pressure** 5,5bar.

**Pumped liquid** clean, free from solids.

**Pressure regulation range** 3 to 5 bar.

**Suction diameter (DNA)** 1"

**Delivery diameter (DNM)** 1"1/2

**Protection class** IP44.

# 1/2/3 KVC

SET WITH 1-2-3 VERTICAL MULTISTAGE CENTRIFUGAL PUMPS

1-2-3 KVC are fixed speed pressurisation units with 1, 2 or 3 vertical axis multistage centrifugal pumps particularly suited for domestic use, and small civil or industrial systems. The use of the electric panel (units with 2 and 3 pumps) guarantees automatic switching of the pumps, control at the main switch and protection of the electric pumps with thermal magnetic circuit breakers. E.Box panel with display for the 2KVC units

**Their main features are reliability, simple operation, and minimum maintenance requirements.**

Construction features – main components:

1 to 3 KVC vertical axis multistage electric pumps  
Tropicalized sheet steel base, complete with 4 anti-vibration rubber feet

Suction and delivery manifolds in stainless steel

Control:

-1KVC --> the single-phase version has a 2-pole pressure switch with power input plug; while the three-phase version has a remote motor protector control panel with reset button.

- 2KVC --> with E.Box D panel with display.

- 3KVC --> with E3G panel with pressure switches.

**Operating range** from 1 to 36 m<sup>3</sup>/h

**Pumped liquid** Clean, free of solids and abrasives, non-viscous, non crystallised and chemically neutral, with properties similar to water.

**Liquid temperature range** from 0 °C to +40 °C

**Maximum ambient temperature** +40°C

**Maximum operating pressure** PN12 (12bar)

**Special executions on request**  
contact our sales network

**Protection class** IP55

**The units comprise 1 x 18-litre expansion vessel for each pump and delivery and suction manifolds in AISI 304 stainless steel**

IE3 ≥ 0,75 kW

**D CONNECT**

The units are supplied with tanks and air feeder connection.

# 1/2/3 KV 3- 6 -10

SETS WITH 1-2-3 VERTICAL MULTISTAGE PUMPS

1-2-3 KV are **fixed speed** pressurisation units with 1, 2 or 3 vertical axis multistage centrifugal pumps particularly suited for domestic use, and small civil, agricultural, or industrial systems for **applications with hot water up to 90°C**. The use of the electric panel (units with 2 and 3 pumps) guarantees automatic switching of the pumps, control at the main switch and protection of the electric pumps with thermal magnetic circuit breakers

The main features of the E.Box panel with display for 2KV units are limited space requirements, sturdiness and absolute reliability.

Construction features – main components:

1 to 3 KV vertical axis multistage electric pumps  
Tropicalized sheet steel base, complete with 4 anti-vibration rubber feet

Suction and delivery manifolds in galvanized steel

Control:

-1KVC --> the single-phase version has a 2-pole pressure switch with power input plug; while the three-phase version has a remote motor protector control panel with reset button.

-2KVC --> with E.Box D panel with display.

-3KVC --> with E3G panel with pressure switches.

**Operating range** from 0.5 to 40 m<sup>3</sup>/h

**Pumped liquid** Clean, free of solids and abrasives, non-viscous, non crystallised and chemically neutral, with properties similar to water

**Liquid temperature range**  
from -15 °C to +90 °C

**Maximum ambient temperature** +40°C

**Maximum operating pressure** PN16 (16bar)

**Special executions on request**  
contact our sales network

**Protection class** IP55

**Including 1 18-litre expansion vessel for each pump**

IE3 ≥ 0,75 kW

## FIXED SPEED PRESSURISATION UNITS

### NEW MODELS

1-2-3-4 NKVE MCE are **variable speed** pressurisation units with 1, 2, 3 or 4 NKV vertical axis multistage centrifugal pumps in stainless steel, suitable for water systems of medium and large users. The use of vertical axis multistage centrifugal electric pumps ensures high performance results. **All the parts in contact with the liquid are rust-proof.**

Construction features – main components:

- 1 to 4 NKV vertical axis multistage electric pumps in stainless steel
- Suction and delivery manifolds in AISI 304 stainless steel
- Delivery and suction on-off valves for each pump
- Check valves on the delivery ports of each pump
- 1 electric control panel with direct start up to 7.5 kW included, star-triangle start for higher voltages. AUT-0-MAN operation selectors and operation notification lamps on the front of the panel
- 1 18-litre expansion vessel for each pump
- 1 pressure transmitter for each pump

**The units are provided already assembled, set up and tested directly at the factory, and with the installation and maintenance instructions and test report.**

**Operating range** from 0.5 to 280 m<sup>3</sup>/h

**Pumped liquid** clean, free of solids and abrasives, non-viscous, non-aggressive, non-crystallised and chemically neutral, with properties similar to water.

**Liquid temperature range** from 0°C to +120°C (80°C with expansion vessel installed)

**Maximum ambient temperature** +50°C

**Maximum operating pressure**

PN16 (up to PN25 on request)

**Protection class** IP55

(IP55 motors on request)

**Special executions on request**

voltages and/or frequencies not on the price list

**Version "X", components in contact with the water made in AISI 316 stainless steel**

**The units comprise 1 x 18-litre expansion vessel for each pump and delivery and suction manifolds in AISI 304 stainless steel**

IE3 ≥ 0,75 kW

## 2 NKV 10/15/20 WITH E.BOX

PRESSURIZATION GROUPS WITH 2 MULTISTAGE CENTRIFUGAL PUMPS WITH A VERTICAL AXIS

### NEW MODELS

#### Construction features - Groups with 2 pumps

- Groups consisting of N. 2 main electric pumps centrifugal multistage on a vertical axis NKV.
- Impellers in stainless steel AISI 304, all parts in contact with liquid are stainless
- Three phase asynchronous motor, motor-pump by means of a rigid coupling.
- Pumps mounted on a single base in galvanized steel.

#### HYDRAULIC GROUP

Intake Manifold Inox, Stainless steel manifold, pressure transducer, electrical control panel, n. 2 expansion tanks, each suction pump with inlet shutoff valves, each pump with outlet shutoff and check valves.

#### ELECTRICAL CONTROL PANEL

E-box IP 54 switchboard mounted on the crankcase pumps. Direct start up to 5.5 kw including, front panel switches for AUT-O-MAN operation, warning lights.

**Line voltage** 400V three phase.

**Voltage of electric pump** 400V three phase.

**Power frequency** 50-60 Hz.

**Installation** vertical only.

**Operating range** from 4 to 280 m<sup>3</sup>/h

**Pumped liquid temperature range**  
from 0°C to +120°C  
(80°C with expansion vessel installed)

**Maximum ambient temperature** 50°C

**Max pressure** 16bar

**Pumped liquid** clean, free of solids

**Pressure control range** from 3 to 14 bar

**Protection class** IP55

The units comprise 1 x 18-litre expansion vessel for each pump and delivery and suction manifolds in AISI 304 stainless steel

IE3 ≥ 0,75 kW

**D+CONNECT** PAG. 5

# 1/2/3 NKP-G / K

SETS WITH CENTRIFUGAL PUMPS K - NKP-G

Water lifting sets suitable for civilian installation, condominiums, hotels, tourist facilities and industrial uses.

Lifting units equipped with 1-2-3 centrifugal pumps K series (twin impeller) and NKP / NKP-G series. All lifting are complete with galvanised steel base, suction and delivery manifold (for units with one pump only delivery manifold), one stop valve on suction side for each pump and stop valve and non return valve on delivery side for each pump.

1 - 2 or 3 20 liters membran tanks; pressure trasmitter (pressure switch for 2-3 K 55/200) and pressure gauge on delivery manifold.

Electrical panel: IP 55, direct starting for single motors inputs up to 7,5 kW (included) and star-delta starting for single motors from 9,2 kW.

- Weekly test included as standard for all units.
- Available, where indicated, also with the relative pilot pump KVCX series.
- The units is supplied assembled, tested, in a strong cardboard box with wooden pallet and instructions sheet with electrical diagram.

### Weekly test included

**Line voltage** 400V three phase.

**Voltage of electric pump** 400V three phase.

**Power frequency** 50-60 Hz.

**Installation** vertical only.

**Operating range** from 4 to 720 m<sup>3</sup>/h.

**Pumped liquid temperature range**

from -15 °C to + 70 °C

(max 40 °C for the version with jockey pump).

**Maximum ambient temperature** 40°C.

**Max pressure** 10bar.

**Pumped liquid** clean, free of solids.

**Protection class** IP55

IE3 ≥ 0,75 kW

# 1 KDN COMPACT

FIRE - FIGHTING BOOSTER SETS UNI EN12845 WITH ELECTRIC PUMP AND DIESEL PUMP

Diesel and electric motor fire-fighting sets, ideal for automatic sprinkler systems and/or hydrants of commercial buildings. Designed to be coupled with each other, in order to obtain all the versions and meet all the requirements of the EN 12845 and UNI 10779 standards.

The pump is coupled, by means of a spacer elastic coupling, to an electric motor or Diesel engine capable of providing the power absorbed by the pump at any pump load condition, from no-load, to a load corresponding to NPSH16m (as requested by section 10.1 of the UNI EN 12845 standard).

#### Modular design:

The UNI EN 12845 DAB fire-fighting sets are supplied in modular version. This setup facilitates transport, and the installation of DAB fire-fighting pump sets in pump rooms, even with narrow access doors. Thanks to a coupling kit (supplied as accessory), it is possible to obtain all the compositions contemplated by the standard (one, two, or three electric or Diesel pumps, with or without jockey pump).

**Operating range** from 10 to 650 m<sup>3</sup>/h

**Pumped liquid** clean, free of solids and abrasives, non-viscous, non-aggressive, non-crystallised and chemically neutral, with properties similar to water.

**Liquid temperature range** from 0 to 70°C

**Maximum ambient temperature** + 40°C

**Maximum operating pressure** 16 bar (1600kPa) PN16

#### Special executions on request

diesel version with water/water heat exchanger, 230 three-phase 50 or 60 Hz electric versions, bronze impeller

UNI EN 12845

ISTITUTO  
GIORDANO  
Qualità al Plurale

ACCESSORIES  
PAG. 347

## FEATURES

#### COLLECTION RESERVOIR

Reservoir for the collection of any fuel leaking out of the diesel tank, included up to 11kW pursuant to standard UNI 11292.

#### TANK

All the engine-drive pumps have a fuel pump sized to ensure 6 hours of operation, as required for the highest hazard classes pursuant to standard EN12845 - 10.9.6.

#### CLAPET VALVE

An inspectionable check valve is mounted on the delivery port of each main pump to facilitate maintenance.

#### FRAME

Compact steel frame painted RAL 3000 red to support the pump, with anti-vibration devices to dampen the vibrations transmitted to the system.

#### CONTROL PANELS

All the fire-fighting sets have an electric control panel pursuant to EN 12845 /UNI 10779 for each main pump and an electric control panel for the jockey pump, already connected to the main components (motor, pressure switches, sensor, batteries, etc.).

#### MOTORS

The motors of all the main pumps are sized in accordance with standard EN 12845 - 10.1 to supply the power absorbed by the pump under any load conditions up to an NPSH value of 16 m.c.w.

#### ALARM REMOTE CONTROL UNIT

Alarm notification and remote control unit suitable for sets with 1 to 3 pumps. The GSM module accessory makes it possible to receive notification text messages in real time on the status of the pumping system.

#### HIGH QUALITY

Fire-fighting sets designed and manufactured with components that guarantee a high standard of quality.

Available on request Diesel Fire-fighting Booster Sets with heat exchanger for diesel motor starting from the power P2=37 kW

# 1 KVT

## DIESEL AND ELECTRIC EN 12845 FIRE-FIGHTING SETS WITH VERTICAL TURBINE PUMPS

DIESEL MODULE      ELECTRIC MODULE

The new 1KVT fire-fighting pump sets with diesel engine or electric motor assembly, ideal for automatic sprinkler systems and/or hydrants of commercial buildings, are manufactured using vertical turbine pumps, in accordance with article 10.6.1 of UNI EN 12845 standards.

### Simple Maintenance:

Thanks to the submersible pump body and the motor assembly control above the surface, they eliminate any self-priming issues, in addition to making the job of the maintenance technician much easier.

### Modular design:

DAB pressurisation sets are designed to be coupled with each other, in order to obtain all the versions and meet all the requirements of the UNI EN 12845 standard.

### Available set models:

#### - 1 KVT ..... EN

, consisting of an axial flow submersible pump (vertical turbine pump) with electric motor, including submersible pump, cork plug, control head installed on appropriate base, electric control panel.

#### - 1 KVT ..... MD EN

, consisting of an axial flow submersible pump (vertical turbine pump) with air-cooled diesel engine or with radiator (with exchanger on request), including submersible pump, cork plug, control head installed on appropriate base, electric control panel, diesel tank ensuring 6 hours of operation, and with fuel collection tank for powers up to 26 kW.

**Operating range** from 4 to 300 m<sup>3</sup>/h

**Pumped liquid** clean, free of solids and abrasives, non-viscous, non-aggressive, non-crystallised and chemically neutral, with properties similar to water.

**Liquid temperature range** from 0 to 40°C

**Maximum ambient temperature** + 40°C

**Maximum operating pressure** 16 bar (1600kPa) PN16

### Special executions on request

diesel version with water/water heat exchanger, 230 three-phase 50 or 60 Hz electric versions, non standard performance.

## UNI EN 12845

ACCESSORIES  
PAG. 347

## FEATURES

### VERTICAL TURBINE PUMP

Vertical turbine pumps offer the great advantage of flooded suction installation even with an underground tank (UNI EN 12845 – 10.6.1). Vertical turbine pumps have a cataphoresis paint coating and cork plug, and can be coupled with an electric motor or diesel engine through a control head installed on an appropriate base.

### COUPLING KIT

In order to obtain all the versions contemplated by the standard (2-3 pump sets), DAB supplies as accessory a coupling kit, to be fitted between the delivery manifolds of the individual sets.

### TANK

Each diesel engine driven pump has a diesel tank that guarantees 6 hours of operation. For engine powers up to 26 kW, a collection tank is also included (in compliance with UNI 11292), for the containment of any fuel spillages.

### ANTI-VORTEX PLATE

Vertical turbine pumps can be equipped with anti-vortex plates to decrease the speed on the suction side (UNI EN 12845 – 9.3.5), in order to make the most of the volume of the storage tank.

### FLOW METER

The measuring kit with flow meter must be installed on a branch on the delivery manifold of the set. It is used to check the performance of the main pumps.

### AXIAL LINE

The axial line is a flanged pipe treated with black cataphoresis paint coating and equipped with a transmission shaft that connects the submersible pump to the control head, with the corresponding guide supports. (separate accessory)

### CONTROL HEAD

Control head connected to the motor with 3-part spacer coupling. This means the 2 components (motor or pump) can be removed separately in accordance with UNI EN 12845 – 10.1.

### JOCKEY PUMP

Submersible jockey pump with 20-litre expansion vessel and its own electric control panel.

# 1 KVT

DIESEL AND ELECTRIC EN 12845 FIRE-FIGHTING SETS WITH VERTICAL TURBINE PUMPS

## PERFORMANCE OF THE 1KVT

### RANGE OF THE 1KVT

FLOW: UP TO 300 m³/h

HEAD: UP TO 150 m.

# 1 KVT

DIESEL AND ELECTRIC EN 12845 FIRE-FIGHTING SETS WITH VERTICAL TURBINE PUMPS

## EXAMPLES OF INSTALLATION WITH 1KDN

### FLOODED SUCTION INSTALLATION

The standards set down, in order of preference, the various ways in which a pump for a fire-fighting set can be installed.

End-suction horizontal pumps must be installed with flooded suction whenever possible, and the standard EN12845 clearly defines the parameters for flooded suction installation:

- at least two thirds the effective capacity of the suction tank must be above the axial line of the pump;
- the axial line of the pump must not be more than 2 m above the minimum level of water in the supply tank.

### SUCTION LIFT INSTALLATION

Suction lift installation is the alternative when flooded suction installation is not possible. Standard EN12845, however, advises against suction lift installation and specifies that it should be considered only when flooded suction installation is not feasible.

The standard indicates a maximum distance of 3.2 m between the axial line of the pumps and the lowest point of the suction piping.

Specific priming pumps must also be installed above the main pumps (1 per main pump) to ensure that these are all primed.

## EXAMPLES OF INSTALLATION WITH 1KVT

### FLOODED SUCTION INSTALLATION

Standard EN12845 recommends the use of vertical turbine pumps when flooded suction installation with end-suction horizontal pumps is not possible. Vertical turbine pumps offer the great advantage, in fact, of flooded suction installation even with an underground tank.

Thanks to the submersible pump body and the motor assembly control above the surface, they eliminate any self-priming issues, in addition to making the job of the maintenance technician much easier.

FIRE FIGHTING UNITS UNI STANDARDS EN 12845 WITH 4" - 6" - 7" - 8" SUBMERSIBLE ELECTRIC PUMPS

## TECHNICAL DATA

Fire-fighting pump groups made according to the specifications of the European standard UNI EN 12845. Fixed fire-fighting installations-automatic sprinkler systems.

All pumps (main and jockey) are equipped with 15 meter power input cable.

The 6" - 7" - 8" pumps are fully made of AISI 304 stainless steel.

## OVERVIEW OF THE UNI-EN 12845

The UNI-EN 12845, the Italian version of the European standard UNI-EN 12845, establishes the criteria for the design, installation and maintenance of sprinkler systems.

An automatic sprinkler system is designed to detect the presence of fire and extinguish it in the initial stage or to keep the flames under control until the extinction can be completed by other means. The classic sprinkler system includes:

a water supply, a group of fire pumps, control valves and a network of pipelines with sprinkler.  
The main pump continues to run until it is stopped manually using the STOP button on the control panel. In the case of fire hydrant networks, you should refer to the UNI 10779 - July 07. UNI 10779, in addition to requiring the power pumps according to EN 12845, admits, in the case of activity not constantly manned, the automatic shutdown of the pumps after 20 minutes of closing the hydrants. DAB groups are suited for both sprinkler networks with manual shutdown and for hydrant networks with automatic stop.

## OPERATION OF FIRE FIGHTING PUMP GROUPS AS PER UNI EN 12845

Under normal conditions (zero water demand), the system is under static pressure. On the first request of water the compensating pump is started that restores the system pressure. If the demand for water is significant (fire sprinkler opening) the system pressure drops until the two pressure switches connected in series activate the main pump. The two pressure starter switches must be calibrated so that you can start the pumps at the following pressure values:

**Operating range** from 4 to 160 m<sup>3</sup>/h

**Pumped liquid** clean, free of solids and abrasives, non-viscous, non-aggressive, non-crystallised and chemically neutral, with properties similar to water.

**Pumped liquid temperature range** from -15 to 70 °C.

**Maximum ambient temperature** + 25 °C

**Maximum operating pressure**

16 bar (1600kPa) PN16

**Special executions on request**

execution with joined cable available on request.

The control panels of the sets with submerged pumps are already fitted on base for quicker installation.

The main and pilot pumps are provided as standard with a 15-metre power cable.

All the 6" and 8" electric pumps (SS6 – SS7 and SS8) are entirely in AISI 304 stainless steel.

## FIRE-FIGHTING PUMP UNITS TO EN 12845 WITH VERTICAL NKV PUMPS

### TECHNICAL DATA

Fire-fighting pump units manufactured in compliance with the prescriptions of European standard UNI EN 12845. Fixed fire-fighting installations – Automatic sprinkler systems

### NOTES ON UNI EN 12845

UNI EN 12845, the Italian version of European standard EN 12845, establishes design, installation and maintenance criteria for sprinkler systems and it replaces the earlier Italian standards UNI 9489 and UNI 9490.

An automatic sprinkler system is designed to detect the presence of fire and extinguish it in the initial stages, or to keep flames under control until they can be extinguished fully using ancillary means.

The classic sprinkler system is composed of: a water source, a fire-fighting pump unit, a series of control valves, and a sprinklers circuit.

The main pump continues to run until it is stopped manually by pressing the STOP pushbutton on the control panel.

In the case of hydrant circuits refer to the prescriptions of UNI 10779-July 07. UNI 10779, as well as stating that fire-fighting pumps must be in compliance with the requirements of UNI EN 12845, also permits, in the case of work not constantly supervised, automatic

stopping of the pumps 20 minutes after closure of the hydrants.

DAB pump sets are suitable for sprinkler installations with manual stopping and for hydrant installations with automatic stopping.

### OPERATION OF EN 12845 FIRE-FIGHTING PUMP SET

In normal conditions (zero water demand) the system is maintained under static pressure.

The first demand for water results in start-up of the jockey pump, which restores system pressure. If a significant flow rate of water is demanded (opening of sprinklers), the pressure will drop until the two pressure switches connected in series trip to start up the main pump.

The two start-up pressure switches must be calibrated in such a way as to start the pumps at the following pressure values.

**Operating range** from 4 to 29 m<sup>3</sup>/h

**Pumped liquid** clean, free of solids and abrasives, non-viscous, non-aggressive, non-crystallised and chemically neutral, with properties similar to water.

**Pumped liquid temperature range** from -15 to 70 °C.

**Maximum ambient temperature** + 40°C

**Maximum operating pressure** 16 bar (1600 kPa) PN16

### UNI EN 12845

ACCESSORIES  
PAG. 347

ONE PUMP SETS	P = 0,8 X MAX. PUMP PRESSURE	
SETS WITH TWO PUMPS	PUMP 1: P1 = 0,8 X MAX PRESSURE	PUMP 2: P2 = 0,6 X MAX PRESSURE

Es: Max. pressure 10 bar - pump 1 starts at 8 bar, pump 2 starts at 6 bar

# GENERAL WARRANTY CONDITIONS

## 1.1. DURATION OF THE WARRANTY

DAB Pumps Spa is committed to supply Products in compliance with the agreements and free from defects that make them unsuitable for the use for which products of the same type are normally intended.

All the products, including spare parts, are guaranteed against construction material and processing defects for a period of 24 months from the date of delivery or purchase. Such date shall be demonstrated by the delivery document or the invoice issued by DAB Pumps Spa. Should such documentation not be available, the 24-month period shall be calculated from the date of production indicated on the product identification plate.

## 1.2. WARRANTY TERMS

- 1.2.1** Product conformity defects and faults must be notified in writing, under penalty of expiration of the warranty, within 8 days from the date of delivery of the product, or discovery, in case of hidden conformity defect or fault, or from the date when the buyer could have discovered the conformity defect or fault through an accurate analysis of the product, or, again, from the actual date of receipt of the claim and/or request from third party relating to the Product. All this notwithstanding the General sales conditions.
- 1.2.2** The warranty terms shall be fulfilled through total replacement of the product, or replacement of some components, or free repair, or a price reduction, or, should the payment have already been made, partial return of the amount paid, taking into account the level of use of the product and its age, and only after the existence of the manufacturing defect has been confirmed by the DAB or DAB Service Partner. The latter shall also be requested to check the delivery/purchase documentation before applying the terms of the warranty.
- 1.2.3** The replacement of the product, or any components, shall not result in any changes to the terms of the warranty. This means that the warranty period for the replaced product, or any replaced components, shall still be calculated from the date of purchase or delivery of the original product.
- 1.2.4** The product repaired/replaced under the terms of the warranty shall be returned with freight charges for the account of the recipient (ex our works).
- 1.2.5** The warranty does not cover any direct and indirect damages caused by DAB Pumps Products, including any costs for their removal and reinstallation, or costs for the installation of replacement products, including any products installed while the repairs are being carried out.
- 1.2.6** No warranty related issues shall authorise the Customer to withdraw from its contractual commitments.
- 1.2.7** The warranty is subjected to the compliance by the Customer with the agreed payment terms.
- 1.2.8** The standard warranty terms applied by DAB Pumps Spa do not affect the statutory rights of consumers pursuant to the 1999/44/EU European Directive, acknowledged in Italy with Italian Legislative Decree no. 206/2005, applicable to consumer end users.

## 1.3. LIMITS OF THE WARRANTY

DAB Pumps Spa shall not be liable for conformity defects and products faults in the following cases:

- 1.3.1** if the conformity defect or fault is due to drawings, designs, information, instructions, software, materials, semi-finished products, component or else, supplied by the Buyer, or by any other parties on behalf of the same;
- 1.3.2** if the conformity defect or fault is due to product tampering, or repairs/modifications not carried out by DAB, or by third parties authorised by the same;
- 1.3.3** if the conformity defect or fault is due to incorrect installation of the product;
- 1.3.4** if the conformity defect or fault is due to a failure to protect the product, or to inappropriate protection, or to errors in the connection of the product;
- 1.3.5** if the conformity defect or fault is due to the use of corrosive liquids and/or any liquids not contemplated in the documentation delivered with the product;
- 1.3.6** if the conformity defect or fault is due to the use of liquids with the presence of suspended solids in quantities greater than what is permitted;
- 1.3.7** if the conformity defect or fault is due to normal wear and tear;
- 1.3.8** if the conformity defect or fault is due to an incorrect use of the product (e.g. overloading beyond the limits of the product);
- 1.3.9** If the conformity defect or fault is due to an occurrence taking place after the risks have been transferred to the Buyer;
- 1.3.10** if the conformity defect or fault is due to a proven shortfall or default of the electric system, the supply system, or changes resulting from environmental or climate conditions, or conditions of any other nature;
- 1.3.11** if all the product installation, energy network (electric and water lines) connection, use and maintenance activities have not been carried out in strict compliance with the instructions of the Instruction Booklet, or the documentation delivered with the product;
- 1.3.12** if the conformity defect or fault is due to improper and incorrect use of the product, not in compliance or against the indications of the User and Maintenance Booklet, or if the product is used for purposes other than its intended purpose;
- 1.3.13** if the conformity defect or fault is due to the installation and use of the product not in compliance with technical and safety standards;
- 1.3.14** if the conformity defect or fault has been caused by defects in the plant or equipment to which the product is connected;
- 1.3.15** if the product or goods are damaged during transport carried out by the customer or by appointed transporters;
- 1.3.16** Moreover, the warranty shall not apply in case of:
- use of non-original spare parts;
  - regular maintenance activities, or replacement of components subjected to normal wear;
  - new products, never installed and still sealed;

In general, the warranty does not cover defects not caused by objectively identified construction or material faults.

THE INTERNATIONAL CERTIFICATION NETWORK

## CERTIFICATE

CISQ/IMQ has issued an IQNet recognized certificate that the organization:

**DWT HOLDING SPA**  
 VIA MARCO POLO 14 - 35035 MESTRINO (PD)  
 BRENDOLA (VI) - CASTELLO DI GODEGO (TV) - BIENTINA (PI) -  
 VAL LIONA (VI) - PRC CHINA - HUNGARY

has implemented and maintains a  
**Quality Management System**

for the following scope:  
**Design, production, sale and assistance of components and electronic controls for pumps, electropumps and pump sets for cold and hot water for civil, industrial and agricultural use**

Further clarifications regarding the applicability of ISO 9001:2015 requirements may be obtained by consulting the organization,  
 which fulfills the requirements of the following standard:  
**ISO 9001:2015**

Issued on: **2018 - 05 - 21**  
 Expires on: **2021 - 05 - 27**

This attestation is directly linked to the IQNet Partner's original certificate and shall not be used as a stand-alone document

Registration Number: IT - 824
